RECOMMENDATIONS

Council is recommended to approve:-

- 1.1. **The Treasury Management Strategy Statement and the Treasury Management Policy and Practises.**
- 1.2. **To delegate any further minor amendments to the Head of Finance in consultation with the Portfolio Holder for Resources.**

2. PURPOSE OF REPORT

The purpose of the report is to obtain Council approval of the updated Treasury Management Strategy Statement (TMS) and Treasury Management Policy and Practises (TMP).

3. BACKGROUND

- 3.1 This is an annual update of the Treasury Management Strategy Statement (Appendix 1) and the Treasury Management Policy and Practices (Appendix 2), based upon the Chartered Institute of Public Finance and Accountancy's (CIPFA) Treasury Management and Prudential Codes 2017.
- 3.2 Treasury management is concerned with how organisations manage their cash resources and its scope covers borrowing, investment and hedging instruments and techniques. Risk is inherent in all treasury management activities and it is necessary to balance risk and return. In the public services it is generally considered that the priority is to protect capital rather than maximize return.
- 3.3 The Treasury Management Strategy Statement for 2021/22 at Appendix 1 is written in conjunction with both the revenue budget for 2021/22 and the Capital Strategy and Capital Programme 2021/22 to 2024/25 which are also being placed before members for consideration, specifically in respect of the TMSS at Appendix 1:
 - Capital Strategy at 1.2.1
 - Capital Expenditure at 2.1 and 5.1.1
 - The Capital Financing Requirement (CFR) at 2.2
 - Minimum Revenue Provision (MRP) and Voluntary Revenue Provision (VRP) at 2.4
 - Interest expenditure and income at 5.1.2

- 3.4 The interest rates quoted at paragraphs 3.3 and 5.2 of the strategy reflect the average of samples gathered by Link Asset Services as at the 1st January 2021 from city and non-city forecasters, including HM Treasury. The forecasts are an estimate based on today's financial climate. Whilst forecasters are comparatively confident about their estimates for the coming financial year, those for longer term are far less reliable.
- 3.5 The Treasury Management Strategy Statement covers:
- treasury controls and reporting mechanisms required to limit the treasury risk and activities of the Council
 - the current and expected cash and reserve balances (2.3)
 - the borrowing requirement and borrowing limits (3.1)
 - prospects for interest rates (3.3)
 - policy on borrowing in advance of need (3.5)
 - the investment strategy and expected rates of return (4.4)
 - Prudential Indicators and the MRP strategy (5.1)
 - treasury management scheme of delegation (5.6) and the relevant roles and responsibilities of delegated officers (5.7)
- 3.6 As part of the council's budget-setting work the estimates of future interest rates, capital resources and expenditure and capital financing costs (through the Minimum Revenue Provision) have been included in arriving at a balanced budget for 2020/21.
- 3.7 Members' attention is drawn to the change to the maximum deposit with any one bank on page 35. In light of the current economic climate, officers recommend that the maximum deposit limit with the UK Government's Debt Management Office (DMO) is removed. In times of economic uncertainty the UK Government is considered the most secure counterparty to hold our cash deposits.
- 3.8 Members are asked to note the proposed change in Minimum Revenue Provision (MRP) Policy on page 7, section 2.4. Officers recommend the move from a straight line or reducing balance method of calculation to an annuity method, which unlike the current method takes account of the time value of money.
- 3.9 The Treasury Management Policy and Practices at Appendix 2 provide further operational detail on the plans within the Treasury Management Strategy Statement. For 2021/22 there have been only very minor amendments to the Treasury Management Policy and Practises to cover the works with related parties and subsidiaries and to keep it in line with updates in the TMSS above.
- 3.10 The Treasury Management Practises cover :
- risk management arrangements and techniques
 - performance measurement
 - decision making and operational controls within the day to day administration of treasury and cash flow management
 - measures to prevent money laundering
 - training requirements for staff included within the delegation arrangements in the Treasury Management Strategy Statement
 - further details on the use of external service providers
- 3.11 At times of low interest rates from banks, one alternative use of resources open to the council is the pre-payment of revenue creditors in order to achieve early payment discounts. These transactions are not treated as investments, therefore do not fall under the TMS or TMPs in the appendices attached. However, the same considerations of risk

and reward should be considered prior to entering into any such agreement. The Head of Finance must be sure of the nature and obligation of the future transactions, their expected value and the credit worthiness of the supplier/counterparty involved.

3.12 The impact on the UK from coronavirus, lockdown measures, the rollout of vaccines, as well as the new trading arrangements with the European Union, will remain major influences on the council's treasury management strategy for 2021/22.

4. RISK

4.1 The key risks associated with the strategy include:

- Overpayment of contributions cannot be returned.
- An unexpected increase in bank base rates.
- Agreeing the accounting treatment with external auditors.
- An unexpected reduction in cash balances. Each individual opportunity would be assessed on its own merits and reported to members at the next available opportunity.

4.2 All the issues raised and the recommendations in this report involve risk considerations as set out below:

- Failure to comply with legal statute, Codes of Practice and regulations of the council.
- Financial risks and credit risks exposure as a result of treasury management decisions. The TMS lays the ground rules for balancing the desire to maximize interest earning capacity with the potential risks of investments in the financial sector, especially in the current economic climate.

5. FINANCE

Financial matters are dealt within the report.

6. LEGAL

There are no material implications.

7. POLICY AND EQUALITIES IMPLICATIONS

7.1 Consultation has taken place with the council's treasury management advisors - Link Asset Services.

7.2 Officers have ensured that the documents attached meet the requirements of the current CIPFA revised Treasury Management Code of Practice and revised Prudential Code 2017 by adopting the proforma documents provided by Link Asset Services with only minor adaptations for local considerations.

8. CONCLUSIONS

8.1 Following consideration at Full Council, Members are asked to approve the adoption of the updated Treasury Management Strategy Statement and Treasury Management Policy and Practises, which will ensure continued compliance with the Code and continue to manage the council's exposure to financial risk.

8.2 In light of the current economic climate and resultant changing cash flow requirements, Members are asked to delegate any minor amendments required within year to the Head of Finance in consultation with the Portfolio Holder for Resources.

1.INTRODUCTION

1.1 Background

The Council is required to operate a balanced budget, which broadly means that cash raised during the year will meet cash expenditure. Part of the treasury management operation is to ensure that this cash flow is adequately planned, with cash being available when it is needed. Surplus monies are invested in low risk counterparties or instruments commensurate with the Council's low risk appetite, providing adequate liquidity initially before considering investment return.

The second main function of the treasury management service is the funding of the Council's capital plans. These capital plans provide a guide to the borrowing need of the Council, essentially the longer-term cash flow planning, to ensure that the Council can meet its capital spending obligations. This management of longer-term cash may involve arranging long or short-term loans, or using longer-term cash flow surpluses. On occasion, when it is prudent and economic, any debt previously drawn may be restructured to meet Council risk or cost objectives.

The contribution the treasury management function makes to the authority is critical, as the balance of debt and investment operations ensure liquidity or the ability to meet spending commitments as they fall due, either on day-to-day revenue or for larger capital projects. The treasury operations will see a balance of the interest costs of debt and the investment income arising from cash deposits affecting the available budget. Since cash balances generally result from reserves and balances, it is paramount to ensure adequate security of the sums invested, as a loss of principal will in effect result in a loss to the General Fund Balance.

CIPFA defines treasury management as:

"The management of the local authority's borrowing, investments and cash flows, its banking, money market and capital market transactions; the effective control of the risks associated with those activities; and the pursuit of optimum performance consistent with those risks."

This authority has not engaged in any commercial investments and has no non-treasury investments.

1.2 Reporting requirements

1.2.1 Capital Strategy

The CIPFA 2017 Prudential and Treasury Management Codes require all local authorities to prepare a capital strategy report which will provide the following:

- a high-level long term overview of how capital expenditure, capital financing and treasury management activity contribute to the provision of services
- an overview of how the associated risk is managed
- the implications for future financial sustainability

The aim of this capital strategy is to ensure that all elected members on the full council fully understand the overall long-term policy objectives and resulting capital strategy requirements, governance procedures and risk appetite.

Responsible Section/Team	Finance	Version/Status	2021/22 v1
Responsible Author	Finance Manager	Report submitted to	Full Council
Date Amended now	Feb 2021	Meeting date	24 Feb 2021
Due for Review	Feb 2022	Page	2

1.2.2 Treasury Management reporting

The Council is currently required to receive and approve, as a minimum, three main treasury reports each year, which incorporate a variety of policies, estimates and actuals.

- a. **Prudential and treasury indicators and treasury strategy** (this report) - The first, and most important report is forward looking and covers:
- the capital plans, (including prudential indicators);
 - a minimum revenue provision (MRP) policy, (how residual capital expenditure is charged to revenue over time);
 - the treasury management strategy, (how the investments and borrowings are to be organised), including treasury indicators; and
 - an investment strategy, (the parameters on how investments are to be managed).

This report is required to be adequately reviewed and scrutinised by Cabinet before being recommended for approval by the Council.

- b. **A mid-year treasury management report** – This is primarily a progress report and will update members on the capital position, amending prudential indicators as necessary, and whether any policies require revision. This is included within each of the Council's monitoring reports presented to Cabinet quarterly.

- c. **An annual treasury report** – This is a backward looking review document and provides details of a selection of actual prudential and treasury indicators and actual treasury operations compared to the estimates within the strategy. This is included within the Council's end of year financial monitoring report presented to Cabinet.

1.3 Treasury Management Strategy for 2021/22

The strategy for 2021/22 covers two main areas:

Capital issues

- the capital expenditure plans and the associated prudential indicators;
- the minimum revenue provision (MRP) policy.

Treasury management issues

- the current treasury position;
- treasury indicators which limit the treasury risk and activities of the Council;
- prospects for interest rates;
- the borrowing strategy;
- policy on borrowing in advance of need;
- debt rescheduling;
- the investment strategy;
- creditworthiness policy; and
- the policy on use of external service providers.

Responsible Section/Team	Finance	Version/Status	2021/22 v1
Responsible Author	Finance Manager	Report submitted to	Full Council
Date Amended now	Feb 2021	Meeting date	24 Feb 2021
Due for Review	Feb 2022	Page	3

These elements cover the requirements of the Local Government Act 2003, the CIPFA Prudential Code, MHCLG MRP Guidance, the CIPFA Treasury Management Code and MHCLG Investment Guidance.

1.4 Training

The CIPFA Code requires the responsible officer to ensure that members with responsibility for treasury management receive adequate training in treasury management. This especially applies to members responsible for scrutiny. Financial training for Members is undertaken annually in June. The training needs of treasury management officers is reviewed annually.

1.5 Treasury management consultants

The Council uses Link Group, Treasury solutions as its external treasury management advisors.

The Council recognises that responsibility for treasury management decisions remains with the organisation at all times and will ensure that undue reliance is not placed upon the services of our external service providers. All decisions will be undertaken with regards to all available information, including, but not solely, our treasury advisers.

It also recognises that there is value in employing external providers of treasury management services in order to acquire access to specialist skills and resources. The Council will ensure that the terms of their appointment and the methods by which their value will be assessed are properly agreed and documented and subjected to regular review.

2 THE CAPITAL PRUDENTIAL INDICATORS 2021/22 – 2024/25

The Prudential and Treasury Management Codes require local authorities to undertake financial planning for periods longer than the three years required for prudential and treasury indicators.

The Council's capital expenditure plans are the key driver of treasury management activity. The output of the capital expenditure plans is reflected in the prudential indicators, which are designed to assist members' overview and confirm capital expenditure plans.

2.1 Capital expenditure

This prudential indicator is a summary of the Council's capital expenditure plans, both those agreed previously, and those forming part of this budget cycle. Members are asked to approve the capital expenditure forecasts:

Table 1

Capital Expenditure	2020/21 £'000	2021/22 £'000	2022/23 £'000	2023/24 £'000	2024/25 £'000	Total Expenditure £'000
Operations & Communities	994	1,374	892	486	607	4,353
Corporate Services & Buildings	837	100	100	100	100	1,237
Housing	2,866	1,600	1,500	1,500	1,500	8,966
Regeneration	5,260	2,915	1,771	1,250	-	11,196
Climate change	-	250	250	250	250	1,000
Estimated Expenditure	9,957	6,239	4,513	3,586	2,457	26,752

Long Term Liabilities – The Council currently has two loans from PWLB, the first taken out in 2010 over a period of 25 years, for which the annual repayment of principle is £184k, the second was taken out in 2019 over 20 years for which the annual repayment of principle is £100k.

The table below summarises the above capital expenditure plans and how these plans are being financed by capital or revenue resources. Any shortfall of resources results in a funding borrowing need.

Table 2

Financing of Capital Expenditure	2020/21 £'000	2021/22 £'000	2022/23 £'000	2023/24 £'000	2024/25 £'000	Total Expenditure £'000
Capital Receipts	4,622	1,210	-	-	-	5,832
Capital Grants	5,065	2,587	2,262	1,955	1,000	12,869
Capital Reserves	-	-	-	-	-	0
Earmarked Reserves	186	45	73	67	-	371
Revenue	84	-	-	-	-	84
Total in-year resources	9,957	3,842	2,335	2,022	1,000	19,156
Net Financing need for year	-	2,398	2,178	1,564	1,457	7,597

2.2 The Council's borrowing need (the Capital Financing Requirement)

Responsible Section/Team	Finance	Version/Status	2021/22 v1
Responsible Author	Finance Manager	Report submitted to	Full Council
Date Amended now	Feb 2021	Meeting date	24 Feb 2021
Due for Review	Feb 2022	Page	5

The second prudential indicator is the Council's Capital Financing Requirement (CFR). The CFR is simply the total historic outstanding capital expenditure which has not yet been paid for from either revenue or capital resources. It is essentially a measure of the Council's indebtedness and so it's the underlying borrowing need. Any capital expenditure above, which has not immediately been paid for through a revenue or capital resource, will increase the CFR.

The Council is asked to approve the CFR projections below:

Table 3

Capital Financing Requirement (CFR)	2019/20 Actual £'000	2020/21 Estimate £'000	2021/22 Estimate £'000	2022/23 Estimate £'000	2023/24 Estimate £'000	2024/25 Estimate £'000
Opening CFR	11,407	14,063	18,225	21,352	23,080	24,070
Movement in CFR	2,656	4,162	3,127	1,728	990	769
Closing CFR	14,063	18,225	21,352	23,080	24,070	24,839
Movement in CFR is represented by						
Net Financing need for year	3,195	-	2,398	2,178	1,564	1,457
Less MRP repayments	539	460	480	450	574	688
Movement in CFR	2,656	(460)	1,918	1,728	990	769

The CFR does not increase indefinitely, as the minimum revenue provision (MRP) is a statutory annual revenue charge which broadly reduces the indebtedness in line with each asset's life, and so charges the economic consumption of capital assets as they are used.

The movement in CFR in 2021/22 is £3,127k, which includes the following projects:

- The operational vehicle/equipment replacement plan
- Empty Homes Scheme

The actual movement in the CFR is dependant on whether new schemes are added and the timing of existing schemes.

2.3 Core funds and expected investment balances

The application of resources (capital receipts, reserves etc.) to either finance capital expenditure or other budget decisions to support the revenue budget will have an ongoing impact on investments unless resources are supplemented each year from new sources (asset sales etc.).

Detailed below are estimates of the year-end balances for each resource and anticipated day-to-day cash flow balances.

*Working capital balances shown are estimated year-end; these may be higher mid-year

2.4 Minimum revenue provision (MRP) policy statement

Introduction

Where the Council finances capital expenditure by debt, it must put aside resources to repay that debt in later years. The amount charged to the revenue budget for the repayment of debt is known as Minimum Revenue Provision (MRP), although there has been no statutory minimum since 2008. The Local Government Act 2003 requires the Council to have regard to the Ministry of Housing, Communities and Local Government's Guidance on Minimum Revenue Provision (the MHCLG Guidance) most recently issued in 2018.

The broad aim of the MHCLG Guidance is to ensure that capital expenditure is financed over a period that is either reasonably commensurate with that over which the capital expenditure provides benefits, or, in the case of borrowing supported by Government Revenue Support Grant, reasonably commensurate with the period implicit in the determination of that grant.

The MHCLG Guidance requires the Council to approve an Annual MRP Statement each year and recommends a number of options for calculating a prudent amount of MRP, but authorities retain flexibility over their determination of what is prudent.

The proposed methodologies for use within Rossendale Borough Council are set out below and reflect the basic principles set out in the guidance, along with some locally determined and prudent modifications to make the MRP more straightforward to calculate.

Proposed MRP Policy Statement for 2021/22

The following MRP Policy is proposed, under guidance issued by the MHCLG is as follows:

- (a) *For capital expenditure that is self-financed from debt arising in 2007/08 and thereafter* - to charge the expenditure over the expected useful life of the relevant asset ("the Asset Life Method"), but to use the annuity variant, based on the average PWLB annuity rates prevailing in the year of the expenditure (rather than charging on a straight line basis over the asset life).

Responsible Section/Team	Finance	Version/Status	2021/22 v1
Responsible Author	Finance Manager	Report submitted to	Full Council
Date Amended now	Feb 2021	Meeting date	24 Feb 2021
Due for Review	Feb 2022	Page	7

- (b) For assets acquired by leases MRP will be determined as being equal to the element of the rent or charge that goes to write down the balance sheet liability.
- (c) In those cases where asset lives cannot be readily determined - to use a default period of 20 or 25 years in line with government guidance. However the Council may make its own determination in exceptional circumstances, if the recommendation of the guidance would not be appropriate.

Change in Policy from Previous Years

The above policy in respect of capital expenditure financed from debt arising in 2007/08 and thereafter represents a change from those reported in the MRP statement presented for 2020/21. The proposed policy for 2021/22 is for MRP to be charged over the expected useful life of the relevant asset using an annuity variant, based on the PWLB rate prevailing in the year of the expenditure. Previously MRP has been charged over the same period but on a straight-line basis or reducing balance basis.

The annuity method makes provision for an annual charge to the General Fund which, unlike the current Straight Line method, takes account of the time value of money. The annual MRP charges made by using the annuity method results in a consistent charge over an asset's life, taking into account the real value of the annual charges when they fall due.

It is proposed that these changes in policy are implemented for 2020/21 and subsequent years.

As some types of capital expenditure incurred by the Council are not capable of being related to an individual asset, asset lives will be assessed on a basis which most reasonably reflects the anticipated period of benefit that arises from the expenditure.

Also, whatever type of expenditure is involved, it will be grouped together in a manner which reflects the nature of the main component of expenditure and will only be divided up in cases where there are two or more major components with substantially different useful economic lives.

Capital expenditure incurred during 2021/22 will not be subject to a MRP charge until 2022/23.

Therefore, in the determination of MRP, the Council will be both:

- (a) **prudent** - working within the principle that debt be repaid over a period reasonably commensurate with that over which the capital expenditure provides benefits, and
- (b) **practical** - making detailed determinations where the impact of the calculation will be material, but allowing a more general approach if that would be reasonable.

MRP Overpayments - A change introduced by the revised MHCLG MRP Guidance was the allowance that any charges made over the statutory minimum revenue provision (MRP), voluntary revenue provision or overpayments, can, if needed, be reclaimed in later years if deemed necessary or prudent. In order for these sums to be reclaimed for use in the budget, this policy must disclose the

cumulative overpayment made each year. In 2018/19 the Council made VRP overpayments of £657k.

3 BORROWING

The capital expenditure plans set out in Section 2 provide details of the service activity of the Council. The treasury management function ensures that the Council's cash is organised in accordance with the relevant professional codes, so that sufficient cash is available to meet this service activity and the Council's capital strategy. This will involve both the organisation of the cash flow and, where capital plans require, the organisation of appropriate borrowing facilities. The strategy covers the relevant treasury / prudential indicators, the current and projected debt positions and the annual investment strategy.

3.1 Current portfolio position

The overall treasury management portfolio as at 31 March 2020 and for the position as at 31/12/2020 are shown below for both borrowing and investments.

Table 5

	31/03/2020	31/12/2020
	Actual	Current Portfolio
	£000	£000
External Borrowing:		
Public Works Loan Board Loan 1	2,760	2,668
Public Works Loan Board Loan 2	1,950	1,900
Total External Borrowing	4,710	4,568
Treasury Investments:	9,420	9,136
Nat West SIBA	5,491	4,469
Handelsbanken Instant	-	3,000
Handelsbanken 35 Day	-	2,000
Lloyds 32 Day	1,000	-
Lloyds Instant	1,500	-
Lloyds Treasury Call Account	-	8,000
Total Treasury Investments	7,991	17,469
Net Borrowing / (Lending)	(3,281)	(12,901)

The Council's forward projections for borrowing are summarised below. The table shows the actual external debt, against the underlying capital borrowing need, (the Capital Financing Requirement - CFR), highlighting any over or under borrowing.

Due for Review	Feb 2022	Page	10

Table 6

Borrowing Position	2019/20	2020/21	2021/22	2022/23	2023/24	2024/25
	Actual £000	Estimate £000	Estimate £000	Estimate £000	Estimate £000	Estimate £000
Debt at 1st April	2,944	4,710	4,426	6,540	8,334	9,414
Debt Repayments	(234)	(284)	(284)	(384)	(484)	(364)
New Debt	2,000		2,398	2,178	1,564	1,457
Debt at 31st March	4,710	4,426	6,540	8,334	9,414	10,507
Original PWLB Loan	2,760	2,576	2,392	2,208	2,024	1,840
Futures Park Plot 5	1,950	1,850	1,750	1,650	1,550	1,450
Estimated New Debt			2,398	4,476	5,840	7,217
Capital financing Requirement (CFR)	14,063	18,225	21,352	23,080	24,070	24,839
Under / (over) Borrowing	9,353	13,799	14,813	14,747	14,657	14,333

Within the range of prudential indicators there are a number of key indicators to ensure that the Council operates its activities within well-defined limits. One of these is that the Council needs to ensure that its gross debt does not, except in the short term, exceed the total of the CFR in the preceding year plus the estimates of any additional CFR for 2021/22 and the following two financial years. This allows some flexibility for limited early borrowing for future years but ensures that borrowing is not undertaken for revenue or speculative purposes.

The Head of Finance reports that the Council complied with this prudential indicator in the current year and does not envisage difficulties for the future. This view takes into account current commitments, existing plans, and the proposals in this budget report.

3.2 Treasury Indicators: limits to borrowing activity

The operational boundary. This is the limit beyond which external debt is not normally expected to exceed. In most cases, this would be a similar figure to the CFR, but may be lower or higher depending on the levels of actual debt and the ability to fund under-borrowing by other cash resources.

Table 7

Operational Boundary	2020/21 £000	2021/22 £000	2022/23 £000	2023/24 £000	2024/25 £000
Total External Debt	20,750	20,900	21,900	22,100	22,800

The authorised limit for external debt. This is a key prudential indicator and represents a control on the maximum level of borrowing. This represents a legal limit beyond which external debt is prohibited, and this limit needs to be set or revised by the full Council. It reflects the level of external debt which, while not desired, could be afforded in the short term, but is not sustainable in the longer term.

1. This is the statutory limit determined under section 3 (1) of the Local Government Act 2003. The Government retains an option to control either the total of all councils' plans, or those of a specific council, although this power has not yet been exercised.
2. The Council is asked to approve the following authorised limit:

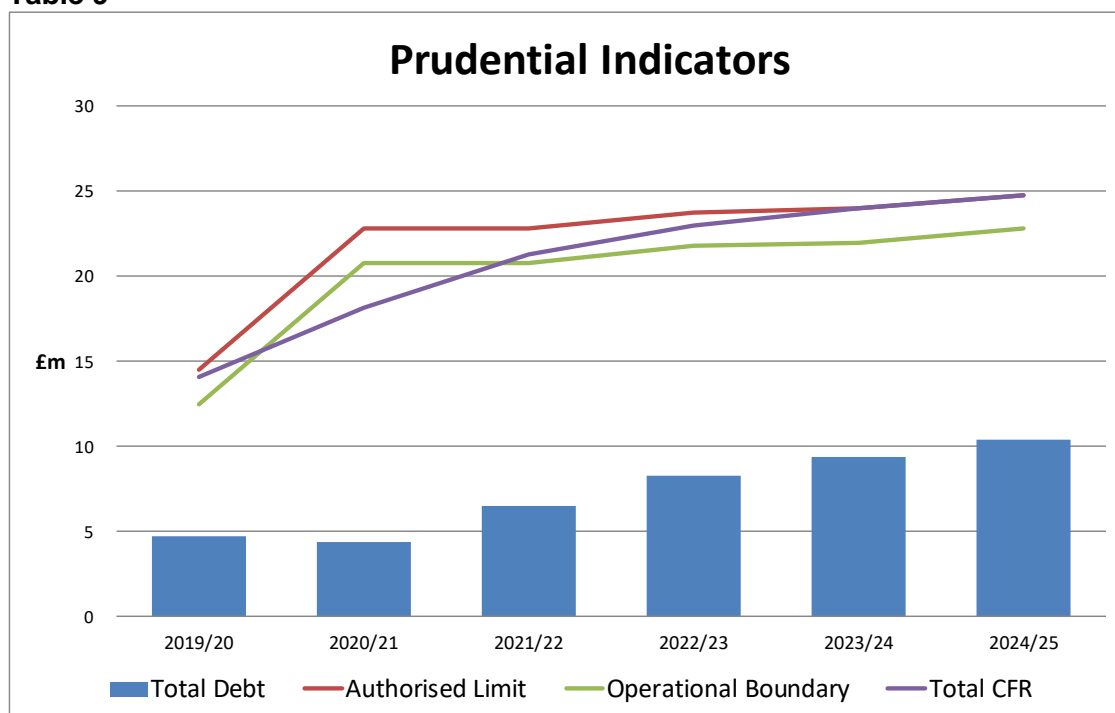

Table 8

Responsible Section/Team	Finance	Version/Status	2021/22 v1
Responsible Author	Finance Manager	Report submitted to	Full Council
Date Amended now	Feb 2021	Meeting date	24 Feb 2021
Due for Review	Feb 2022	Page	11

Authorised Limit	2020/21 £000	2021/22 £000	2022/23 £000	2023/24 £000	2024/25 £000
Total External Debt	22,750	22,900	23,900	24,100	24,800

In graphical terms the relationship between the total CFR, the current external borrowing and the suggested authorised and operational debt boundaries can be shown as follows, the prudent level of future potential borrowing is clearly visible as the gap between the predicted CFR and the current borrowing level.

Table 9

3.3 Prospects for interest rates

The Council has appointed Link Group as its treasury advisor and part of their service is to assist the Council to formulate a view on interest rates. Link provided the following forecasts on 26/11/20.

Table 10

Link Group Interest Rate View		9.11.20												
These Link forecasts have been amended for the reduction in PWLB margins by 1.0% from 26.11.20														
	Dec-20	Mar-21	Jun-21	Sep-21	Dec-21	Mar-22	Jun-22	Sep-22	Dec-22	Mar-23	Jun-23	Sep-23	Dec-23	Mar-24

The coronavirus outbreak has done huge economic damage to the UK and economies around the world. After the Bank of England took emergency action in March to cut

Responsible Section/Team	Finance	Version/Status	2021/22 v1
Responsible Author	Finance Manager	Report submitted to	Full Council
Date Amended now	Feb 2021	Meeting date	24 Feb 2021
Due for Review	Feb 2022	Page	12

Bank Rate to first 0.25%, and then to 0.10%, it left Bank Rate unchanged at its subsequent meetings to 5th November, although some forecasters had suggested that a cut into negative territory could happen. However, the Governor of the Bank of England has made it clear that he currently thinks that such a move would do more damage than good and that more quantitative easing is the favoured tool if further action becomes necessary. As shown in the forecast table above, no increase in Bank Rate is expected in the forecast table above as economic recovery is expected to be only gradual and, therefore, prolonged.

Gilt Yields/PWLB Loan Rates

There was much speculation during the second half of 2019 that bond markets were in a bubble which was driving bond prices up and yields down to historically very low levels. The context for that was a heightened expectation that the US could have been heading for a recession in 2020. In addition, there were growing expectations of a downturn in world economic growth, especially due to fears around the impact of the trade war between the US and China, together with inflation generally at low levels in most countries and expected to remain subdued. Combined, these conditions were conducive to very low bond yields. While inflation targeting by the major central banks has been successful over the last thirty years in lowering inflation expectations, the real equilibrium rate for central rates has fallen considerably due to the high level of borrowing by consumers. This means that central banks do not need to raise rates as much now to have a major impact on consumer spending, inflation, etc. The consequence of this has been the gradual lowering of the overall level of interest rates and bond yields in financial markets over the last 30 years. Over the year prior to the coronavirus crisis, this has seen many bond yields up to 10 years turn negative in the Eurozone. In addition, there has, at times, been an inversion of bond yields in the US whereby 10 year yields have fallen below shorter term yields. In the past, this has been a precursor of a recession. The other side of this coin is that bond prices are elevated as investors would be expected to be moving out of riskier assets i.e. shares, in anticipation of a downturn in corporate earnings and so selling out of equities.

As the interest forecast table for PWLB certainty rates above shows, there is expected to be little upward movement in PWLB rates over the next two years as it will take economies, including the UK, a prolonged period to recover all the momentum they have lost in the sharp recession caused during the coronavirus shut down period. From time to time, gilt yields, and therefore PWLB rates, can be subject to exceptional levels of volatility due to geo-political, sovereign debt crisis, emerging market developments and sharp changes in investor sentiment, (as shown on 9th November when the first results of a successful COVID-19 vaccine trial were announced). Such volatility could occur at any time during the forecast period.

Investment and borrowing rates

- **Investment returns** are likely to remain exceptionally low during 2021/22 with little increase in the following two years.
- **Borrowing interest rates** fell to historically very low rates as a result of the COVID crisis and the quantitative easing operations of the Bank of England: indeed, gilt yields up to 6 years were negative during most of the first half of 20/21. The policy of avoiding new borrowing by running down spare cash balances has served local authorities well over the last few years. The unexpected increase of 100 bps in PWLB rates on top of the then current margin over gilt yields of 80 bps in October 2019, required an initial major rethink of local authority treasury management strategy and risk management. However, in March 2020, the Government started a consultation process for reviewing the margins over gilt rates for PWLB borrowing

Responsible Section/Team	Finance	Version/Status	2021/22 v1
Responsible Author	Finance Manager	Report submitted to	Full Council
Date Amended now	Feb 2021	Meeting date	24 Feb 2021
Due for Review	Feb 2022	Page	13

for different types of local authority capital expenditure. *(Please note that Link has concerns over this approach, as the fundamental principle of local authority borrowing is that borrowing is a treasury management activity and individual sums that are borrowed are not linked to specific capital projects.)* It also introduced the following rates for borrowing for different types of capital expenditure: -

- **PWLB Standard Rate** is gilt plus 200 basis points (G+200bps)
 - **PWLB Certainty Rate** is gilt plus 180 basis points (G+180bps)
 - **PWLB HRA Standard Rate** is gilt plus 100 basis points (G+100bps)
 - **PWLB HRA Certainty Rate** is gilt plus 80bps (G+80bps)
 - **Local Infrastructure Rate** is gilt plus 60bps (G+60bps)
- As a consequence of these increases in margins, many local authorities decided to refrain from PWLB borrowing unless it was for HRA or local infrastructure financing, until such time as the review of margins was concluded.
 - On 25.11.20, the Chancellor announced the conclusion to the review of margins over gilt yields for PWLB rates; the standard and certainty margins were reduced by 1% but a prohibition was introduced to deny access to borrowing from the PWLB for any local authority which had purchase of assets for yield in its three year capital programme. The new margins over gilt yields are as follows: -
 - **PWLB Standard Rate** is gilt plus 100 basis points (G+100bps)
 - **PWLB Certainty Rate** is gilt plus 80 basis points (G+80bps)
 - **PWLB HRA Standard Rate** is gilt plus 100 basis points (G+100bps)
 - **PWLB HRA Certainty Rate** is gilt plus 80bps (G+80bps)
 - **Local Infrastructure Rate** is gilt plus 60bps (G+60bps)
 - **Borrowing for capital expenditure.** As Link's long-term forecast for Bank Rate is 2.00%, and all PWLB rates are under 2.00%, there is now value in borrowing from the PWLB for all types of capital expenditure for all maturity periods, especially as current rates are at historic lows. However, greater value can be obtained in borrowing for shorter maturity periods so the Council will assess its risk appetite in conjunction with budgetary pressures to reduce total interest costs. Longer-term borrowing could also be undertaken for the purpose of certainty, where that is desirable.
 - While this authority will not be able to avoid borrowing to finance new capital expenditure, due to the rundown of reserves, there will be a cost of carry, (the difference between higher borrowing costs and lower investment returns), to any new borrowing that causes a temporary increase in cash balances as this position will, most likely, incur a revenue cost.

3.4 Borrowing strategy

The Council is currently maintaining an under-borrowed position. This means that the capital borrowing need, (the Capital Financing Requirement), has not been fully funded with loan debt as cash supporting the Council's reserves, balances and cash flow has been used as a temporary measure. This strategy is prudent as investment returns are low and counterparty risk is still an issue that needs to be considered.

Against this background and the risks within the economic forecast, caution will be adopted with the 2021/22 treasury operations. The Head of Finance will monitor interest rates in financial markets and adopt a pragmatic approach to changing circumstances:

Responsible Section/Team	Finance	Version/Status	2021/22 v1
Responsible Author	Finance Manager	Report submitted to	Full Council
Date Amended now	Feb 2021	Meeting date	24 Feb 2021
Due for Review	Feb 2022	Page	14

- *if it was felt that there was a significant risk of a sharp FALL in borrowing rates, then borrowing will be postponed.*
- *if it was felt that there was a significant risk of a much sharper RISE in borrowing rates than that currently forecast, perhaps arising from an acceleration in the rate of increase in central rates in the USA and UK, an increase in world economic activity, or a sudden increase in inflation risks, then the portfolio position will be re-appraised. Most likely, fixed rate funding will be drawn whilst interest rates are lower than they are projected to be in the next few years.*

Any decisions will be reported to Cabinet at the next available opportunity.

3.5 Policy on borrowing in advance of need

The Council will not borrow more than or in advance of its needs purely in order to profit from the investment of the extra sums borrowed. Any decision to borrow in advance will be within forward approved Capital Financing Requirement estimates and will be considered carefully to ensure that value for money can be demonstrated and that the Council can ensure the security of such funds.

Borrowing in advance will be made within the constraints that:

- It will be limited to no more than 100% of the expected increase in borrowing need (CFR) over the three year planning period; and
- The authority would not look to borrow more than 18 months in advance of need.

Risks associated with any borrowing in advance activity will be subject to prior appraisal and subsequent reporting through the mid-year or annual reporting mechanism.

New financial institutions as a source of borrowing and / or types of borrowing

Currently the PWLB Certainty Rate is set at gilts + 80 basis points for both HRA and non-HRA borrowing. However, consideration may still need to be given to sourcing funding from the following sources for the following reasons:

- Local authorities (primarily shorter dated maturities out to 3 years or so – still cheaper than the Certainty Rate).
- Financial institutions (primarily insurance companies and pension funds but also some banks, out of forward dates where the objective is to avoid a “cost of carry” or to achieve refinancing certainty over the next few years).
- Municipal Bonds Agency (possibly still a viable alternative depending on market circumstances prevailing at the time).

Our advisors will keep us informed as to the relative merits of each of these alternative funding sources.

3.6 Approved Sources of Long and Short term Borrowing

The approved sources of long-term and short-term borrowing are:

- Public Works Loan Board (PWLB) and any successor body
- Any institution approved for investments

Responsible Section/Team	Finance	Version/Status	2021/22 v1
Responsible Author	Finance Manager	Report submitted to	Full Council
Date Amended now	Feb 2021	Meeting date	24 Feb 2021
Due for Review	Feb 2022	Page	15

- Any other bank or building society authorised to operate in the UK
- Any other UK public sector body
- UK public and private sector pension funds (except Lancashire County Pension Fund as it is the Council's own pension fund)
- Capital market bond investors
- UK Municipal Bonds Agency plc and other special purpose companies created to enable local authority bond issues

Other sources of debt finance: In addition, capital finance may be raised by the following methods that are not borrowing, but may be classed as debt liabilities:

- Leasing
- Hire purchase
- Sale and leaseback and similar arrangements

4 ANNUAL INVESTMENT STRATEGY

4.1 Investment policy – management of risk

The Council's investment policy has regard to the following: -

- MHCLG's Guidance on Local Government Investments ("the Guidance")
- CIPFA Treasury Management in Public Services Code of Practice and Cross Sectoral Guidance Notes 2017 ("the Code")
- CIPFA Treasury Management Guidance Notes 2018

The Council's investment priorities will be security first, portfolio liquidity second and then yield, (return). The Council will aim to achieve the optimum return (yield) on its investments commensurate with proper levels of security and liquidity and with the Council's risk appetite. In the current economic climate it is considered appropriate to keep investments short term to cover cash flow needs. However, where appropriate (from an internal as well as external perspective), the Council will also consider the value available in periods up to 12 months with high credit rated financial institutions.

The above guidance from the MHCLG and CIPFA places a high priority on the management of risk. This authority has adopted a prudent approach to managing risk and defines its risk appetite by the following means: -

1. Minimum acceptable **credit criteria** are applied in order to generate a list of highly creditworthy counterparties. This also enables diversification and thus avoidance of concentration risk. The key ratings used to monitor counterparties are the short term and long-term ratings.
2. **Other information:** ratings will not be the sole determinant of the quality of an institution; it is important to continually assess and monitor the financial sector on both a micro and macro basis and in relation to the economic and political environments in which institutions operate. The assessment will also take account of information that reflects the opinion of the markets. To achieve this consideration the Council will engage with its advisors to maintain a monitor on market pricing such as "**credit default swaps**" and overlay that information on top of the credit ratings.
3. **Other information sources** used will include the financial press, share price and other such information pertaining to the financial sector in order to establish the most robust scrutiny process on the suitability of potential investment counterparties.
4. Investment instruments identified for use in the financial year are listed in appendix 5.4 under the 'Specified' and 'Non-Specified' Investments categories. Counterparty limits will be as set through the Council's Treasury Management Practices – Schedules.

Regular monitoring of investment performance will be carried out during the year.

Changes in risk management policy from last year.

The above criteria are unchanged from last year.

4.2 Creditworthiness policy

The primary principle governing the Council's investment criteria is the security of its investments, although the yield or return on the investment is also a key consideration. After this main principle, the Council will ensure that:

- It maintains a policy covering both the categories of investment types it will invest in, criteria for choosing investment counterparties with adequate security, and monitoring their security. This is set out in the specified and non-specified investment sections below; and
- It has sufficient liquidity in its investments. For this purpose, it will set out procedures for determining the maximum periods for which funds may prudently be committed. These procedures also apply to the Council's prudential indicators covering the maximum principal sums invested.

The Head of Finance will maintain a counterparty list in compliance with the following criteria and will revise the criteria and submit them to Council for approval as necessary. These criteria are separate to that which determines which types of investment instrument are either specified or non-specified as it provides an overall pool of counterparties considered high quality which the Council may use, rather than defining what types of investment instruments are to be used.

Credit rating information is supplied by the Link Group, our treasury advisors, on all active counterparties that comply with the criteria below. Any counterparty failing to meet the criteria would be omitted from the counterparty (dealing) list. Any rating changes, rating Watches (notification of a likely change), rating Outlooks (notification of the longer-term bias outside the central rating view) are provided to officers almost immediately after they occur and this information is considered before dealing. For instance, a negative rating Watch applying to counterparty at the minimum Council criteria will be suspended from use, with all others being reviewed in light of market conditions.

The criteria for providing a pool of high-quality investment counterparties, (both specified and non-specified investments) is:

- Banks 1 - good credit quality – the Council will only use banks which:
 - i. are UK banks; and/or
 - ii. are non-UK and domiciled in a country which has a minimum sovereign Long Term rating of AAAand have, as a minimum, the following Fitch, Moody's and Standard & Poor's credit ratings (where rated):
 - i. Short Term – F1
 - ii. Long Term – A
- Banks 2 – Part nationalised UK bank – Royal Bank of Scotland ring-fenced operations. This bank can be included provided they continue to be part nationalised or meet the ratings in Banks 1 above.
- Banks 3 – The Council's own banker for transactional purposes if the bank falls below the above criteria, although in this case balances will be minimised in both monetary size and time invested.

Responsible Section/Team	Finance	Version/Status	2021/22 v1
Responsible Author	Finance Manager	Report submitted to	Full Council
Date Amended now	Feb 2021	Meeting date	24 Feb 2021
Due for Review	Feb 2022	Page	18

- Bank subsidiary and treasury operation -. The Council will use these where the parent bank has provided an appropriate guarantee or has the necessary ratings outlined above.
- Money Market Funds – using only those with AAA long term rating backed up with lowest volatility rating (MR1+)
- UK Government (including gilts, Treasury Bills and the DMADF)
- Local authorities, parish councils etc
- Housing associations
- Rossendale Leisure Trust to a maximum of £100k
- Other related parties (where a charge can be placed on land or equity to preserve the Councils right to its resources)

Creditworthiness.

Although the credit rating agencies changed their outlook on many UK banks from Stable to Negative during the quarter ended 30.6.20 due to upcoming risks to banks' earnings and asset quality during the economic downturn caused by the pandemic, the majority of ratings were affirmed due to the continuing strong credit profiles of major financial institutions, including UK banks. However, during Q1 and Q2 2020, banks made provisions for *expected* credit losses and the rating changes reflected these provisions. As we move into future quarters, more information will emerge on *actual* levels of credit losses. (Quarterly earnings reports are normally announced in the second half of the month following the end of the quarter.) This has the potential to cause rating agencies to revisit their initial rating adjustments earlier in the current year. These adjustments could be negative or positive, although it should also be borne in mind that banks went into this pandemic with strong balance sheets. This is predominantly a result of regulatory changes imposed on banks following the Great Financial Crisis. Indeed, the Financial Policy Committee (FPC) report on 6th August 2020 revised down their expected credit losses for the UK banking sector to "somewhat less than £80bn". It stated that in its assessment, "banks have buffers of capital more than sufficient to absorb the losses that are likely to arise under the MPC's central projection". The FPC stated that for real stress in the sector, the economic output would need to be twice as bad as the MPC's projection, with unemployment rising to above 15%.

All three rating agencies have reviewed banks around the world with similar results in many countries of most banks being placed on Negative Outlook, but with a small number of actual downgrades.

CDS prices

Although bank CDS prices (these are market indicators of credit risk) spiked upwards at the end of March / early April 2020 due to the heightened market uncertainty and ensuing liquidity crisis that affected financial markets, they have returned to more average levels since then. Nevertheless, prices are still elevated compared to end-February 2020. Pricing is likely to remain volatile as uncertainty continues. However, sentiment can easily shift, so it will remain important to undertake continual monitoring of all aspects of risk and return in the current circumstances. Link monitor CDS prices as part of their creditworthiness service to local authorities and the Council has access to this information via its Link-provided Passport portal.

Due for Review	Feb 2022	Page	19

4.3 Other Considerations

Due care will be taken to consider the country, group and sector exposure of the Council's investments. For the foreseeable future this Council will only invest in UK based institutions.

Use of additional information other than credit ratings.

Additional requirements under the Code require the Council to supplement credit rating information. Whilst the above criteria relies primarily on the application of credit ratings to provide a pool of appropriate counterparties for officers to use, additional operational market information will be applied before making any specific investment decision from the agreed pool of counterparties. This additional market information (for example Credit Default Swaps, rating Watches/Outlooks) will be applied to compare the relative security of differing investment opportunities.

Time and monetary limits applying to investments.

All investments will be made for no more than 365 days, i.e. short term.

The proposed criteria for Specified and Non-Specified investments are shown in Appendix 5.4 for approval.

4.4 Investment strategy

In-house funds. Investments will be made with reference to the core balance and cash flow requirements and the outlook for short-term interest rates (i.e. rates for investments up to 12 months).

Investment returns expectations.

Bank Rate is unlikely to rise from 0.10% for a considerable period. It is very difficult to say when it may start rising so it may be best to assume that investment earnings from money market-related instruments will be sub 0.50% for the foreseeable future.

The suggested budgeted investment earnings rates for returns on investments placed for periods up to about three months during each financial year are as follows (the long term forecast is for periods over 10 years in the future):

Table 11

Average earnings in each year	
2020/21	0.10%
2021/22	0.10%
2022/23	0.10%
2023/24	0.10%
2024/25	0.25%
Long term later years	2.00%

- The overall balance of risks to economic growth in the UK is probably now skewed to the upside, but is subject to major uncertainty due to the virus and how quickly successful vaccines may become available and widely administered to the population. It may also be affected by the deal the UK has agreed part of Brexit.
- There is relatively little UK domestic risk of increases or decreases in Bank Rate and significant changes in shorter term PWLB rates. The Bank of England has effectively ruled out the use of negative interest rates in the near term and increases in Bank Rate are likely to be some years away given the underlying economic

Responsible Section/Team	Finance	Version/Status	2021/22 v1
Responsible Author	Finance Manager	Report submitted to	Full Council
Date Amended now	Feb 2021	Meeting date	24 Feb 2021
Due for Review	Feb 2022	Page	20

expectations. However, it is always possible that safe haven flows, due to unexpected domestic developments and those in other major economies, or a return of investor confidence in equities, could impact gilt yields, (and so PWLB rates), in the UK.

Negative investment rates

While the Bank of England said in August / September 2020 that it is unlikely to introduce a negative Bank Rate, at least in the next 6 -12 months, and in November omitted any mention of negative rates in the minutes of the meeting of the Monetary Policy Committee, some deposit accounts are already offering negative rates for shorter periods. As part of the response to the pandemic and lockdown, the Bank and the Government have provided financial markets and businesses with plentiful access to credit, either directly or through commercial banks. In addition, the Government has provided large sums of grants to local authorities to help deal with the COVID crisis; this has caused some local authorities to have sudden large increases in cash balances searching for an investment home, some of which was only very short term until those sums were able to be passed on.

As for money market funds (MMFs), yields have continued to drift lower. Some managers have already resorted to trimming fee levels to ensure that net yields for investors remain in positive territory where possible and practical. Investor cash flow uncertainty, and the need to maintain liquidity in these unprecedented times, has meant there is a surfeit of money swilling around at the very short end of the market. This has seen a number of market operators, now including the DMADF, offer nil or negative rates for very short term maturities. This is not universal, and MMFs are still offering a marginally positive return, as are a number of financial institutions for investments at the very short end of the yield curve.

Inter-local authority lending and borrowing rates have also declined due to the surge in the levels of cash seeking a short-term home at a time when many local authorities are probably having difficulties over accurately forecasting when disbursements of funds received will occur or when further large receipts will be received from the Government.

Investment treasury indicator and limit - total principal funds invested for greater than 365 days. These limits are set with regard to the Council's liquidity requirements and to reduce the need for early sale of an investment and are based on the availability of funds after each year-end.

The Council is asked to approve the following treasury indicator and limit:

Table 12

Upper limit for principal sums invested for longer than 365 days			
£m	2021/22	2022/23	2023/24
Principal sums invested for longer than 365 days	£m Nil	£m Nil	£m Nil

For its cash flow generated balances, the Council will seek to utilise its business reserve instant access and notice accounts, in order to benefit from the compounding of interest.

5.1 THE CAPITAL PRUDENTIAL AND TREASURY INDICATORS 2021/22 – 2023/24

The Council's capital expenditure plans are the key driver of treasury management activity. The output of the capital expenditure plans is reflected in the prudential indicators, which are designed to assist members' overview and confirm capital expenditure plans.

5.1.1 Capital expenditure

Table 13

Capital Expenditure	2020/21 £'000	2021/22 £'000	2022/23 £'000	2023/24 £'000	2024/25 £'000	Total Expenditure £'000
Operations & Communities	994	1,374	892	486	607	4,353
Corporate Services & Buildings	837	100	100	100	100	1,237
Housing	2,866	1,600	1,500	1,500	1,500	8,966
Regeneration	5,260	2,915	1,771	1,250	-	11,196
Climate change	-	250	250	250	250	1,000
Estimated Expenditure	9,957	6,239	4,513	3,586	2,457	26,752

5.1.2 Affordability prudential indicators

The previous sections cover the overall capital and control of borrowing prudential indicators, but within this framework prudential indicators are required to assess the affordability of the capital investment plans. These provide an indication of the impact of the capital investment plans on the Council's overall finances. The Council is asked to approve the following indicators:

5.1.3 Ratio of financing costs to net revenue stream

This indicator identifies the trend in the cost of capital, (borrowing and other long-term obligation costs net of investment income), against the net revenue stream.

Table 14

Ratio of financing costs to net revenue stream	2019/20 Actual £000	2020/21 Estimate £000	2021/22 Estimate £000	2022/23 Estimate £000	2023/24 Estimate £000	2024/25 Estimate £000
Interest Payable - Services	143	158	193	199	219	206
Interest Receivable	(88)	(4)	(5)	(5)	(5)	(5)
Net cost of capital	55	154	188	194	214	201
Net Revenue Stream	8,220	8,320	8,297	8,222	8,372	8,654
Ratio of financing costs to net revenue stream	0.67%	1.85%	2.27%	2.36%	2.56%	2.32%

The estimates of financing costs include current commitments and the proposals in this budget report.

5.1.4 Maturity structure of borrowing

These gross limits are set to reduce the Council's exposure to large fixed rate sums falling due for refinancing, and are required for upper and lower limits.

The Council is asked to approve the following treasury indicators and limits:

Responsible Section/Team	Finance	Version/Status	2021/22 v1
Responsible Author	Finance Manager	Report submitted to	Full Council
Date Amended now	Feb 2021	Meeting date	24 Feb 2021
Due for Review	Feb 2022	Page	24

Table 15

Maturity structure of fixed interest rate borrowing 2021/22		
	Lower	Upper
Under 12 months	0%	40%
12 months to 2 years	0%	50%
2 years to 5 years	0%	50%
5 years to 10 years	0%	60%
10 years and above	0%	100%
Maturity structure of variable interest rate borrowing 2021/22		
	Lower	Upper
Under 12 months	0%	0%
12 months to 2 years	0%	0%
2 years to 5 years	0%	0%
5 years to 10 years	0%	0%
10 years and above	0%	0%

No lower limit is set in order to allow flexibility when managing the debt portfolio in the current economic conditions.

5.1.4. Control of interest rate exposure

Please see paragraphs 3.3, 3.4 and 4.4.

5.3 ECONOMIC BACKGROUND

- **UK.** The key quarterly meeting of the Bank of England Monetary Policy Committee kept **Bank Rate** unchanged on 5.11.20. However, it revised its economic forecasts to take account of a second national lockdown from 5.11.20 to 2.12.20 which is obviously going to put back economic recovery and do further damage to the economy. It therefore decided to do a further tranche of **quantitative easing (QE) of £150bn**, to start in January when the current programme of £300bn of QE, announced in March to June, runs out. It did this so that “announcing further asset purchases now should support the economy and help to ensure the unavoidable near-term slowdown in activity was not amplified by a tightening in monetary conditions that could slow the return of inflation to the target”.
- Its forecasts appeared, at that time, to be rather optimistic in terms of three areas:
 - The economy would recover to reach its pre-pandemic level in Q1 2022
 - The Bank also expected there to be excess demand in the economy by Q4 2022.
 - CPI inflation was therefore projected to be a bit above its 2% target by the start of 2023 and the “inflation risks were judged to be balanced”.
- Significantly, there was no mention of **negative interest rates** in the minutes or Monetary Policy Report, suggesting that the MPC remains some way from being persuaded of the case for such a policy, at least for the next 6 -12 months. However, rather than saying that it “stands ready to adjust monetary policy”, the MPC this time said that it will take “whatever additional action was necessary to achieve its remit”. The latter seems stronger and wider and may indicate the Bank’s willingness to embrace new tools.
- One key addition to **the Bank’s forward guidance in August** was a new phrase in the policy statement, namely that “it does not intend to tighten monetary policy until there is clear evidence that significant progress is being made in eliminating spare capacity and achieving the 2% target sustainably”. That seems designed to say, in effect, that even if inflation rises to 2% in a couple of years’ time, do not expect any action from the MPC to raise Bank Rate – until they can clearly see that level of inflation is going to be persistently above target if it takes no action to raise Bank Rate. Our Bank Rate forecast currently shows no increase, (or decrease), through to quarter 1 2024 but there could well be no increase during the next five years as it will take some years to eliminate spare capacity in the economy, and therefore for inflationary pressures to rise to cause the MPC concern. **Inflation** is expected to briefly peak at just over 2% towards the end of 2021, but this is a temporary short lived factor and so not a concern.
- However, the minutes did contain several references to **downside risks**. The MPC reiterated that the “recovery would take time, and the risks around the GDP projection were judged to be skewed to the downside”. It also said “the risk of a more persistent period of elevated unemployment remained material”. Downside risks could well include severe restrictions remaining in place in some form during the rest of December and most of January too. **Upside risks** included the early roll out of effective vaccines.
- **COVID-19 vaccines.** We had been waiting expectantly for news that various COVID-19 vaccines would be cleared as being safe and effective for administering to the general public. The Pfizer announcement on 9th November was very encouraging as its 90% effectiveness was much higher than the 50-60% rate of effectiveness of flu vaccines which might otherwise have been expected. However, this vaccine has demanding cold storage requirements of minus 70c that impairs the speed of application to the general population. It has therefore been particularly welcome that the Oxford University/AstraZeneca vaccine has now also been approved which is much cheaper and only requires fridge temperatures

Responsible Section/Team	Finance	Version/Status	2021/22 v1

Date Amended now	Feb 2021	Meeting date	24 Feb 2021
Due for Review	Feb 2022	Page	26

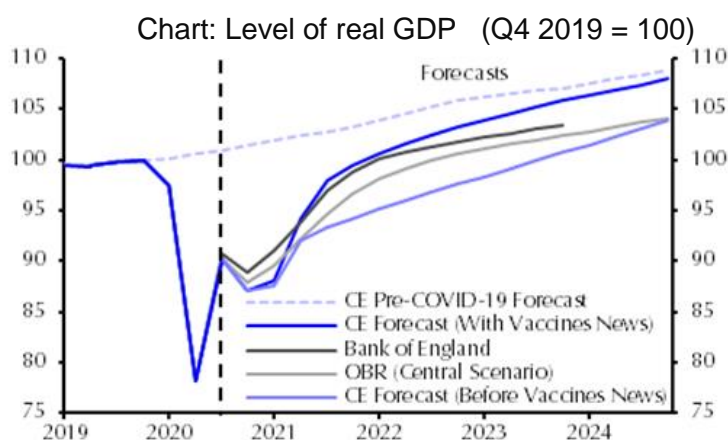

for storage. The Government has 60m doses on order and is aiming to vaccinate at a rate of 2m people per week starting in January, though this rate is currently restricted by a bottleneck on vaccine production; (a new UK production facility is due to be completed in June).

- These announcements, plus expected further announcements that other vaccines could be approved soon, have enormously boosted confidence that **life could largely return to normal during the second half of 2021**, with activity in the still-depressed sectors like restaurants, travel and hotels returning to their pre-pandemic levels; this would help to bring the unemployment rate down. With the household saving rate having been exceptionally high since the first lockdown in March, there is plenty of pent-up demand and purchasing power stored up for these services. A comprehensive roll-out of vaccines might take into late 2021 to fully complete; but if these vaccines prove to be highly effective, then there is a possibility that restrictions could start to be eased, beginning possibly in Q2 2021 once vulnerable people and front-line workers have been vaccinated. At that point, there would be less reason to fear that hospitals could become overwhelmed any more. Effective vaccines would radically improve the economic outlook once they have been widely administered; it may allow GDP to rise to its pre-virus level a year earlier than otherwise and mean that the unemployment rate peaks at 7% in 2021 instead of 9%.
- **Public borrowing** was forecast in November by the Office for Budget Responsibility (the OBR) to reach £394bn in the current financial year, the highest ever peace time deficit and equivalent to 19% of GDP. In normal times, such an increase in total gilt issuance would lead to a rise in gilt yields, and so PWLB rates. However, the QE done by the Bank of England has depressed gilt yields to historic low levels, (as has similarly occurred with QE and debt issued in the US, the EU and Japan). This means that new UK debt being issued, and this is being done across the whole yield curve in all maturities, is locking in those historic low levels through until maturity. In addition, the UK has one of the longest average maturities for its entire debt portfolio, of any country in the world. Overall, this means that the total interest bill paid by the Government is manageable despite the huge increase in the total amount of debt. The OBR was also forecasting that the government will still be running a budget deficit of £102bn (3.9% of GDP) by 2025/26. However, initial impressions are that they have taken a pessimistic view of the impact that vaccines could make in the speed of economic recovery.
- Overall, **the pace of recovery** was not expected to be in the form of a rapid V shape, but a more elongated and prolonged one. The initial recovery was sharp after quarter 1 saw growth at -3.0% followed by -18.8% in quarter 2 and then an upswing of +16.0% in quarter 3; this still left the economy 8.6% smaller than in Q4 2019. It is likely that the one month national lockdown that started on 5th November, will have caused a further contraction of 8% m/m in November so the economy may have then been 14% below its pre-crisis level.
- **December 2020 / January 2021**. Since then, there has been rapid back-tracking on easing restrictions due to the spread of a new mutation of the virus, and severe restrictions were imposed across all four nations. These restrictions were changed on 5.1.21 to national lockdowns of various initial lengths in each of the four nations as the NHS was under extreme pressure. It is now likely that wide swathes of the UK will remain under these new restrictions for some months; this means that the near-term outlook for the economy is grim. However, the distribution of vaccines and the expected consequent removal of COVID-19 restrictions, should allow GDP to rebound rapidly in the second half of 2021 so that the economy could climb back to its pre-pandemic peak

as soon as late in 2022. Provided that both monetary and fiscal policy are kept loose for a few years yet, then it is still possible that in the second half of this decade, the economy may be no smaller than it would have been if COVID-19 never happened. The significant

Responsible Section/Team	Finance	Version/Status	2021/22 v1

Due for Review	Feb 2022	Page	27

caveat is if another mutation of COVID-19 appears that defeats the current batch of vaccines. However, now that science and technology have caught up with understanding this virus, new vaccines ought to be able to be developed more quickly to counter such a development and vaccine production facilities are being ramped up around the world.

(if unable to print in colour..... the key describing each line in the above graph is in sequential order from top to bottom in parallel with the lines in the graph.)

This recovery of growth which eliminates the effects of the pandemic by about the middle of the decade would have major repercussions for public finances as it would be consistent with the government deficit falling to around 2.5% of GDP without any tax increases. This would be in line with the OBR's most optimistic forecast in the graph below, rather than their current central scenario which predicts a 4% deficit due to assuming much slower growth. However, Capital Economics forecasts assumed that there is a reasonable Brexit deal and also that politicians do not raise taxes or embark on major austerity measures and so, (perversely!), depress economic growth and recovery.

(if unable to print in colour..... the key describing each line in the above graph is in sequential order from top to bottom in parallel with the lines in the graph.)

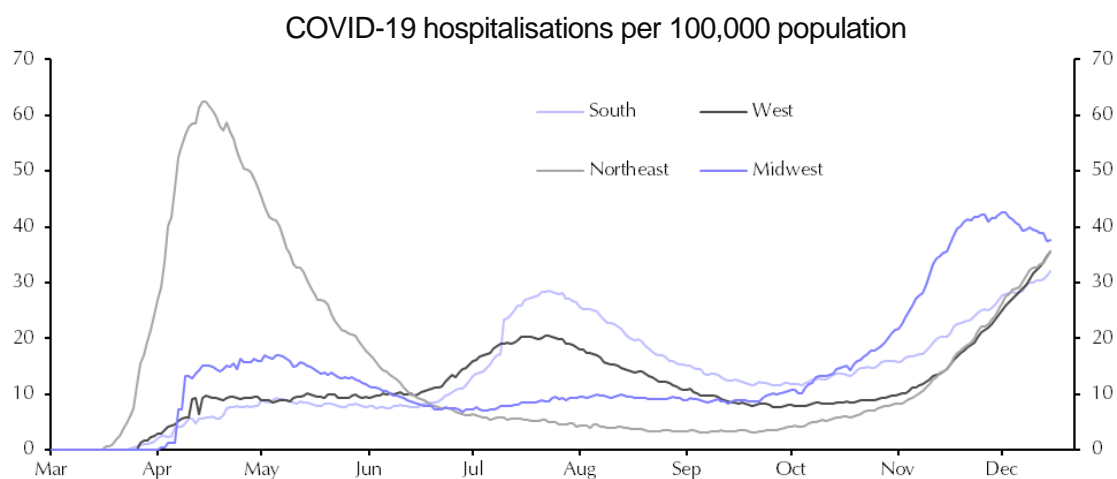

- There will still be some **painful longer term adjustments** as e.g. office space and travel by planes, trains and buses may not recover to their previous level of use for several years, or possibly ever, even if vaccines are fully successful in overcoming the current virus. There is also likely to be a reversal of globalisation as this crisis has exposed how vulnerable long-distance supply chains are. On the other hand, digital services are one area that has already seen huge growth.

Responsible Section/Team	Finance	Version/Status	2021/22 v1
Responsible Author	Finance Manager	Report submitted to	Full Council

Due for Review	Feb 2022	Page	28

- **Brexit.** While the UK has been gripped by the long running saga of whether or not a deal would be made by 31.12.20, the final agreement on 24.12.20, followed by ratification by Parliament and all 27 EU countries in the following week, has eliminated a significant downside risk for the UK economy. The initial agreement only covers trade so there is further work to be done on the services sector where temporary equivalence has been granted in both directions between the UK and EU; that now needs to be formalised on a permanent basis. As the forecasts in this report were based on an assumption of a Brexit agreement being reached, there is no need to amend these forecasts.
- **Monetary Policy Committee meeting of 17 December.** All nine Committee members voted to keep interest rates on hold at +0.10% and the Quantitative Easing (QE) target at £895bn. The MPC commented that the successful rollout of vaccines had reduced the downsides risks to the economy that it had highlighted in November. But this was caveated by it saying, “Although all members agreed that this would reduce downside risks, they placed different weights on the degree to which this was also expected to lead to stronger GDP growth in the central case.” So, while the vaccine is a positive development, in the eyes of the MPC at least, the economy is far from out of the woods. As a result of these continued concerns, the MPC voted to extend the availability of the Term Funding Scheme, (cheap borrowing), with additional incentives for small and medium size enterprises for six months from 30.4.21 until 31.10.21. (The MPC had assumed that a Brexit deal would be agreed.)
- **Fiscal policy.** In the same week as the MPC meeting, the Chancellor made a series of announcements to provide further support to the economy: -
 - An extension of the COVID-19 loan schemes from the end of January 2021 to the end of March.
 - The furlough scheme was lengthened from the end of March to the end of April.
 - The Budget on 3.3.21 will lay out the “next phase of the plan to tackle the virus and protect jobs”. This does not sound like tax rises are imminent, (which could hold back the speed of economic recovery).
- The **Financial Policy Committee** (FPC) report on 6.8.20 revised down their expected credit losses for the banking sector to “somewhat less than £80bn”. It stated that in its assessment, “banks have buffers of capital more than sufficient to absorb the losses that are likely to arise under the MPC’s central projection”. The FPC stated that for real stress in the sector, the economic output would need to be twice as bad as the MPC’s projection, with unemployment rising to above 15%.
- **US.** The result of **the November elections** meant that while the Democrats gained the presidency and a majority in the House of Representatives, it looks as if the Republicans could retain their slim majority in the Senate provided they keep hold of two key seats in Georgia in elections in early January. If those two seats do swing to the Democrats, they will then control both Houses and President Biden will consequently have a free hand to determine policy and to implement his election manifesto.
- **The economy** had been recovering quite strongly from its contraction in 2020 of 10.2% due to the pandemic with GDP only 3.5% below its pre-pandemic level and the unemployment rate dropping below 7%. However, the rise in new cases during quarter 4, to the highest level since mid-August, suggests that the US could be in the early stages of a fourth wave. While the first wave in March and April was concentrated in the Northeast, and the second wave in the South and West, the third wave in the Midwest looks as if it now abating. However, it also looks as if the virus is rising again in the rest of the country. The latest upturn poses a threat that the recovery in the economy could stall. This is **the**

Responsible Section/Team	Finance	Version/Status	2021/22 v1

Due for Review	Feb 2022	Page	29

single biggest downside risk to the shorter term outlook – a more widespread and severe wave of infections over the winter months, which is compounded by the impact of the regular flu season and, as a consequence, threatens to overwhelm health care facilities. Under those circumstances, states might feel it necessary to return to more draconian lockdowns.

- The restrictions imposed to control the spread of the virus are once again weighing on the economy with employment growth slowing sharply in November and retail sales dropping back. The economy is set for further weakness in December and into the spring. However, a \$900bn fiscal stimulus deal passed by Congress in late December will limit the downside through measures which included a second round of direct payments to households worth \$600 per person and a three-month extension of enhanced unemployment insurance (including a \$300 weekly top-up payment for all claimants). GDP growth is expected to rebound markedly from the second quarter of 2021 onwards as vaccines are rolled out on a widespread basis and restrictions are loosened.
- After Chair Jerome Powell unveiled the **Fed's adoption of a flexible average inflation target** in his Jackson Hole speech in late August 2020, the mid-September meeting of the Fed agreed by a majority to a toned down version of the new inflation target in his speech - that *"it would likely be appropriate to maintain the current target range until labour market conditions were judged to be consistent with the Committee's assessments of maximum employment and inflation had risen to 2% and was on track to moderately exceed 2% for some time."* This change was aimed to provide more stimulus for economic growth and higher levels of employment and to avoid the danger of getting caught in a deflationary "trap" like Japan. It is to be noted that inflation has actually been under-shooting the 2% target significantly for most of the last decade, (and this year), so financial markets took note that higher levels of inflation are likely to be in the pipeline; long-term bond yields duly rose after the meeting. The FOMC's updated economic and rate projections in mid-September showed that officials expect to leave the fed funds rate at near-zero until at least end-2023 and probably for another year or two beyond that. There is now some expectation that where the Fed has led in changing its inflation target, other major central banks will follow. The increase in tension over the last year between the US and China is likely to lead to a lack of momentum in progressing the initial positive moves to agree a phase one trade deal.
- The Fed's meeting on **5 November** was unremarkable - but at a politically sensitive time around the elections. At its **16 December** meeting the Fed tweaked the guidance for its monthly asset quantitative easing purchases with the new language implying

Responsible Section/Team	Finance	Version/Status	2021/22 v1

Due for Review	Feb 2022	Page	30

those purchases could continue for longer than previously believed. Nevertheless, with officials still projecting that inflation will only get back to 2.0% in 2023, the vast majority expect the fed funds rate to be still at near-zero until 2024 or later. Furthermore, officials think the balance of risks surrounding that median inflation forecast are firmly skewed to the downside. The key message is still that policy will remain unusually accommodative – with near-zero rates and asset purchases – continuing for several more years. This is likely to result in keeping Treasury yields low – which will also have an influence on gilt yields in this country.

- **EU.** In early December, the figures for Q3 GDP confirmed that the economy staged a rapid rebound from the first lockdowns. This provides grounds for optimism about growth prospects for next year. In Q2, GDP was 15% below its pre-pandemic level. But in Q3 the economy grew by 12.5% q/q leaving GDP down by “only” 4.4%. That was much better than had been expected earlier in the year. However, growth is likely to stagnate during Q4 and in Q1 of 2021, as a second wave of the virus has affected many countries: it is likely to hit hardest those countries more dependent on tourism. The €750bn fiscal support package eventually agreed by the EU after prolonged disagreement between various countries, is unlikely to provide significant support, and quickly enough, to make an appreciable difference in the countries most affected by the first wave.
- With inflation expected to be unlikely to get much above 1% over the next two years, **the ECB** has been struggling to get inflation up to its 2% target. It is currently unlikely that it will cut its central rate even further into negative territory from -0.5%, although the ECB has stated that it retains this as a possible tool to use. The ECB’s December meeting added a further €500bn to the PEPP scheme, (purchase of government and other bonds), and extended the duration of the programme to March 2022 and re-investing maturities for an additional year until December 2023. Three additional tranches of TLTRO, (cheap loans to banks), were approved, indicating that support will last beyond the impact of the pandemic, implying indirect yield curve control for government bonds for some time ahead. The Bank’s forecast for a return to pre-virus activity levels was pushed back to the end of 2021, but stronger growth is projected in 2022. The total PEPP scheme of €1,850bn of QE which started in March 2020 is providing protection to the sovereign bond yields of weaker countries like Italy. There is therefore unlikely to be a euro crisis while the ECB is able to maintain this level of support. However, as in the UK and the US, the advent of highly effective vaccines will be a game changer, although growth will struggle before later in quarter 2 of 2021.
- **China.** After a concerted effort to get on top of the virus outbreak in Q1, economic recovery was strong in Q2 and then into Q3 and Q4; this has enabled China to recover all of the contraction in Q1. Policy makers have both quashed the virus and implemented a programme of monetary and fiscal support that has been particularly effective at stimulating short-term growth. At the same time, China’s economy has benefited from the shift towards online spending by consumers in developed markets. These factors help to explain its comparative outperformance compared to western economies. However, this was achieved by major central government funding of yet more infrastructure spending. After years of growth having been focused on this same area, any further spending in this area is likely to lead to increasingly weaker economic returns in the longer term. This could, therefore, lead to a further misallocation of resources which will weigh on growth in future years.
- **Japan.** A third round of fiscal stimulus in early December took total fresh fiscal spending this year in response to the virus close to 12% of pre-virus GDP. That’s huge by past standards, and one of the largest national fiscal responses. The budget deficit

Responsible Section/Team	Finance	Version/Status	2021/22 v1
Responsible Author	Finance Manager	Report submitted to	Full Council
Date Amended now	Feb 2021	Meeting date	24 Feb 2021
Due for Review	Feb 2022	Page	31

is now likely to reach 16% of GDP this year. Coupled with Japan's relative success in containing the virus without draconian measures so far, and the likelihood of effective vaccines being available in the coming months, the government's latest fiscal effort should help ensure a strong recovery and to get back to pre-virus levels by Q3 2021 – around the same time as the US and much sooner than the Eurozone.

- **World growth.** World growth will have been in recession in 2020. Inflation is unlikely to be a problem for some years due to the creation of excess production capacity and depressed demand caused by the coronavirus crisis.
- Until recent years, world growth has been boosted by increasing **globalisation** i.e. countries specialising in producing goods and commodities in which they have an economic advantage and which they then trade with the rest of the world. This has boosted worldwide productivity and growth, and, by lowering costs, has also depressed inflation. However, the rise of China as an economic superpower over the last thirty years, which now accounts for nearly 20% of total world GDP, has unbalanced the world economy. The Chinese government has targeted achieving major world positions in specific key sectors and products, especially high tech areas and production of rare earth minerals used in high tech products. It is achieving this by massive financial support, (i.e. subsidies), to state owned firms, government directions to other firms, technology theft, restrictions on market access by foreign firms and informal targets for the domestic market share of Chinese producers in the selected sectors. This is regarded as being unfair competition that is putting western firms at an unfair disadvantage or even putting some out of business. It is also regarded with suspicion on the political front as China is an authoritarian country that is not averse to using economic and military power for political advantage. The current trade war between the US and China therefore needs to be seen against that backdrop. It is, therefore, likely that we are heading into a period where there will be a **reversal of world globalisation and a decoupling of western countries** from dependence on China to supply products. This is likely to produce a backdrop in the coming years of weak global growth and so weak inflation.

Summary

Central banks are, therefore, likely to support growth by maintaining loose monetary policy through keeping rates very low for longer. Governments could also help a quicker recovery by providing more fiscal support for their economies at a time when total debt is affordable due to the very low rates of interest. They will also need to avoid significant increases in taxation or austerity measures that depress demand in their economies.

If there is a huge surge in investor confidence as a result of successful vaccines which leads to a major switch out of government bonds into equities, which, in turn, causes government debt yields to rise, then there will be pressure on central banks to actively manage debt yields by further QE purchases of government debt; this would help to suppress the rise in debt yields and so keep the total interest bill on greatly expanded government debt portfolios within manageable parameters. It is also the main alternative to a programme of austerity.

INTEREST RATE FORECASTS

Brexit. The interest rate forecasts provided by Link in paragraph 3.3 were predicated on an assumption of a reasonable agreement being reached on trade negotiations between the UK and

Responsible Section/Team	Finance	Version/Status	2021/22 v1
Responsible Author	Finance Manager	Report submitted to	Full Council
Date Amended now	Feb 2021	Meeting date	24 Feb 2021
Due for Review	Feb 2022	Page	32

the EU by 31.12.20. There is therefore no need to revise these forecasts now that a trade deal has been agreed. Brexit may reduce the economy's potential growth rate in the long run. However, much of that drag is now likely to be offset by an acceleration of productivity growth triggered by the digital revolution brought about by the COVID crisis.

The balance of risks to the UK

- The overall balance of risks to economic growth in the UK is probably now skewed to the upside, but is still subject to some uncertainty due to the virus and the effect of any mutations, and how quick vaccines are in enabling a relaxation of restrictions.
- There is relatively little UK domestic risk of increases or decreases in Bank Rate and significant changes in shorter term PWLB rates. The Bank of England has effectively ruled out the use of negative interest rates in the near term and increases in Bank Rate are likely to be some years away given the underlying economic expectations. However, it is always possible that safe haven flows, due to unexpected domestic developments and those in other major economies, could impact gilt yields, (and so PWLB rates), in the UK.

Downside risks to current forecasts for UK gilt yields and PWLB rates currently include:

- **UK government** takes too much action too quickly to raise taxation or introduce austerity measures that depress demand in the economy.
- **UK - Bank of England** takes action too quickly, or too far, over the next three years to raise Bank Rate and causes UK economic growth, and increases in inflation, to be weaker than we currently anticipate.
- A resurgence of the **Eurozone sovereign debt crisis**. The ECB has taken monetary policy action to support the bonds of EU states, with the positive impact most likely for “weaker” countries. In addition, the EU agreed a €750bn fiscal support package. These actions will help shield weaker economic regions for the next two or three years. However, in the case of Italy, the cost of the virus crisis has added to its already huge debt mountain and its slow economic growth will leave it vulnerable to markets returning to taking the view that its level of debt is unsupportable. There remains a sharp divide between northern EU countries favouring low debt to GDP and annual balanced budgets and southern countries who want to see jointly issued Eurobonds to finance economic recovery. This divide could undermine the unity of the EU in time to come.
- Weak capitalisation of some **European banks**, which could be undermined further depending on extent of credit losses resultant of the pandemic.
- **German minority government & general election in 2021**. In the German general election of September 2017, Angela Merkel's CDU party was left in a vulnerable minority position dependent on the fractious support of the SPD party, as a result of the rise in popularity of the anti-immigration AfD party. The CDU has done badly in subsequent state elections but the SPD has done particularly badly. Angela Merkel has stepped down from being the CDU party leader but she will remain as Chancellor until the general election in 2021. This then leaves a major question mark over who will be the major guiding hand and driver of EU unity when she steps down.
- **Other minority EU governments**. Austria, Sweden, Spain, Portugal, Netherlands, Ireland and Belgium also have vulnerable minority governments dependent on coalitions which could prove fragile.
- **Austria, the Czech Republic, Poland and Hungary** now form a strongly anti-immigration bloc within the EU, and they had threatened to derail the 7 year EU budget until a compromise was thrashed out in late 2020. There has also been a rise in anti-immigration sentiment in Germany and France.
- **Geopolitical risks**, for example in China, Iran or North Korea, but also in Europe and other Middle Eastern countries, which could lead to increasing safe haven flows.

Upside risks to current forecasts for UK gilt yields and PWLB rates

Responsible Section/Team	Finance	Version/Status	2021/22 v1
Responsible Author	Finance Manager	Report submitted to	Full Council
Date Amended now	Feb 2021	Meeting date	24 Feb 2021

- **UK** - a significant rise in inflationary pressures e.g. caused by a stronger than currently expected recovery in the UK economy after effective vaccines are administered quickly to the UK population, leading to a rapid resumption of normal life and return to full economic activity across all sectors of the economy.
- The **Bank of England is too slow** in its pace and strength of increases in Bank Rate and, therefore, allows inflationary pressures to build up too strongly within the UK economy, which then necessitates a rapid series of increases in Bank Rate to stifle inflation.

5.4 TREASURY MANAGEMENT PRACTICE (TMP1) – CREDIT AND COUNTERPARTY RISK MANAGEMENT

The MHCLG issued Investment Guidance in 2018, and this forms the structure of the Council’s policy below. These guidelines do not apply to either trust funds or pension funds which operate under a different regulatory regime.

The key intention of the Guidance is to maintain the current requirement for councils to invest prudently, and that priority is given to security and liquidity before yield. In order to facilitate this objective the guidance requires this Council to have regard to the CIPFA publication Treasury Management in the Public Services: Code of Practice and Cross-Sectoral Guidance Notes. This Council adopted the Code on 24/02/2010 and will apply its principles to all investment activity. In accordance with the Code, the Head of Finance has produced its treasury management practices (TMPs). This part, TMP 1(1), covering investment counterparty policy requires approval each year.

Annual investment strategy - The key requirements of both the Code and the investment guidance are to set an annual investment strategy, as part of its annual treasury strategy for the following year, covering the identification and approval of following:

- The strategy guidelines for choosing and placing investments, particularly non-specified investments.
- The principles to be used to determine the maximum periods for which funds can be committed.
- Specified investments that the Council will use. These are high security (i.e. high credit rating, although this is defined by the Council, and no guidelines are given), and high liquidity investments in sterling and with a maturity of no more than a year.
- Non-specified investments, clarifying the greater risk implications, identifying the general types of investment that may be used and a limit to the overall amount of various categories that can be held at any time.

The investment policy proposed for the Council is:

Strategy guidelines – The main strategy guidelines are contained in the body of the treasury strategy statement.

Specified investments – These investments are sterling investments of not more than one-year maturity, or those which could be for a longer period but where the Council has the right to be repaid within 12 months if it wishes. These are considered low risk assets where the possibility of loss of principal or investment income is small. These would include sterling investments which would not be defined as capital expenditure with:

1. The UK Government (such as the Debt Management Account deposit facility, UK treasury bills or a gilt with less than one year to maturity).
2. Supranational bonds of less than one year’s duration.
3. A local authority, housing association, parish council or community council.

Responsible Section/Team	Finance	Version/Status	2021/22 v1
Responsible Author	Finance Manager	Report submitted to	Full Council
Date Amended now	Feb 2021	Meeting date	24 Feb 2021
Due for Review	Feb 2022	Page	34

4. Pooled investment vehicles (such as money market funds) that have been awarded a high credit rating by a credit rating agency. For category 4 this covers pooled investment vehicles, such as money market funds, rated A by Standard and Poor's, Moody's and / or Fitch rating agencies.
5. A body that is considered of a high credit quality (such as a bank or building society). For category 5 this covers bodies with a minimum Short-Term rating of A (or the equivalent) as rated by Standard and Poor's, Moody's and / or Fitch rating agencies.

Within these bodies, and in accordance with the Code, the Council has set additional criteria to set the time and amount of monies which will be invested in these bodies. **These criteria are:**

- **the limit with any one bank is 12 months and up to £8m, or 50% of the resources available at the time of investing, whichever is the larger.**
- **The limit with the Governments Debt Management Office is 12 months and £unlimited.**

Non-specified investments – In response to falling bank interest rates and the challenges of the MTFS, the Head of Finance will explore alternative investment opportunities in order to save ongoing revenue costs or earn additional revenue incomes/interest. The counterparties in these cases will generally be related parties (as defined in the Accounting Code of Practice applicable to the year in which the investment decision was made).

The monitoring of investment counterparties - The credit rating of counterparties will be monitored regularly. The Council receives credit rating information (changes, rating watches and rating outlooks) from Link as and when ratings change, and counterparties are checked promptly. On occasion ratings may be downgraded when an investment has already been made. The criteria used are such that a minor downgrading should not affect the full receipt of the principal and interest. Any counterparty failing to meet the criteria will be removed from the list immediately by the Head of Finance, and if required new counterparties which meet the criteria will be added to the list.

5.5 APPROVED COUNTRIES FOR INVESTMENTS

This list is based on those countries which have sovereign ratings of AA- or higher, (we show the lowest rating from Fitch, Moody's and S&P) and also, (except - at the time of writing - for Hong Kong, Norway and Luxembourg), have banks operating in sterling markets which have credit ratings of green or above in the Link credit worthiness service.

Based on lowest available rating

AAA

- Australia
- Denmark
- Germany
- Luxembourg
- Netherlands
- Norway
- Singapore
- Sweden
- Switzerland

AA+

- Canada
- Finland
- U.S.A.

AA

- Abu Dhabi (UAE)
- France

AA-

- Belgium
- Hong Kong
- Qatar
- **U.K.**

In practice officers intend to only use UK banks.

5.6 TREASURY MANAGEMENT SCHEME OF DELEGATION

(i) Full Council

- receiving and reviewing reports on treasury management policies, practices and activities;
- approval of annual strategy.
- approval of individual non-specified investment decisions during the financial year.

(ii) Cabinet

- approval of/amendments to the organisation's adopted clauses, treasury management policy statement and treasury management practices;
- budget consideration and approval;
- approval of the division of responsibilities;
- receiving and reviewing regular monitoring reports and acting on recommendations;
- approving the selection of external service providers and agreeing terms of appointment.
- reviewing the treasury management policy and procedures and making recommendations to full Council
- consideration and recommendation of individual non-specified investment decisions during the financial year..

5.7 THE TREASURY MANAGEMENT ROLE OF THE SECTION 151 OFFICER

The S151 (responsible) officer

- recommending clauses, treasury management policy/practices for approval, reviewing the same regularly, and monitoring compliance;
- submitting regular treasury management policy reports;
- submitting budgets and budget variations;
- receiving and reviewing management information reports;
- reviewing the performance of the treasury management function;
- ensuring the adequacy of treasury management resources and skills, and the effective division of responsibilities within the treasury management function;
- ensuring the adequacy of internal audit, and liaising with external audit;
- recommending the appointment of external service providers.
- preparation of a capital strategy to include capital expenditure, capital financing, nonfinancial investments and treasury management, with a long term timeframe (say 20+ years – to be determined in accordance with local priorities.)
- ensuring that the capital strategy is prudent, sustainable, affordable and prudent in the long term and provides value for money
- ensuring that due diligence has been carried out on all treasury and non-financial investments and is in accordance with the risk appetite of the authority
- ensure that the authority has appropriate legal powers to undertake expenditure on nonfinancial assets and their financing
- ensuring the proportionality of all investments so that the authority does not undertake a level of investing which exposes the authority to an excessive level of risk compared to its financial resources
- ensuring that an adequate governance process is in place for the approval, monitoring and ongoing risk management of all non-financial investments and long term liabilities
- provision to members of a schedule of all non-treasury investments including material investments in subsidiaries, joint ventures, loans and financial guarantees
- ensuring that members are adequately informed and understand the risk exposures taken on by an authority
- ensuring that the authority has adequate expertise, either in house or externally provided, to carry out the above
- creation of Treasury Management Practices which specifically deal with how non treasury investments will be carried out and managed
 - Risk management (TMP1 and schedules), including investment and risk management criteria for any material non-treasury investment portfolios;
 - Performance measurement and management (TMP2 and schedules), including methodology and criteria for assessing the performance and success of non-treasury investments;
 - Decision making, governance and organisation (TMP5 and schedules), including a statement of the governance requirements for decision making in relation to non-treasury investments; and appropriate professional due diligence is carried out to support decision making;

Responsible Section/Team	Finance	Version/Status	2021/22 v1
Responsible Author	Finance Manager	Report submitted to	Full Council
Date Amended now	Feb 2021	Meeting date	24 Feb 2021

- Reporting and management information (TMP6 and schedules), including where and how often monitoring reports are taken;
- Training and qualifications (TMP10 and schedules), including how the relevant knowledge and skills in relation to non-treasury investments will be arranged.

The Deputy S151 officer (being the Finance Manager)

In the absence of the S151 officer, the Deputy S151 officer will take over the responsibilities noted above.

The Finance Officer (Exchequer Services)

- Transfer of Funds between the Council's approved call accounts.

Authorised Signatories

The following posts have been designated as those authorised to act as bank signatories for the Council.

- Head of Finance
- Finance Manager
- Finance Officer (Exchequer Services)
- Senior Accountant
- Accounts Technician

APPENDIX 5.8 Glossary

Authorised Limit for External Debt

The Authorised Limit, like all other prudential indicators, has to be set and revised by elected members. It should not be set so high that it would never in any possible circumstances be breached but rather reflect a level of borrowing which while not desired, could be afforded, but may not be sustainable

bps – basis points – a common unit of measure for interest rates

Capital Expenditure

Expenditure on the acquisition of a fixed asset or expenditure which adds to and not merely maintains the value of an existing fixed asset.

Capital Financing Requirement

This important component of an authority's capital strategy is the amount of capital spending that has not been financed by capital receipts, capital grants, and contributions from revenue. It is a measure of the underlying need to borrow for capital purposes.

CIPFA – Chartered Institute of Public Finance and Accountancy.

CPI – Consumer Price Index – measures change in the price level of a weighted average market basket of consumer goods.

Debt Rescheduling

Similar to re-mortgaging a house, in so far as, loans are repaid before maturity, and replaced with new loans, usually at a more advantageous rate of interest.

DCLG - Department of Communities and Local Government.

ECB – European Central Bank

GDP – Gross Domestic Product

IMF – International Monetary Fund

LIBOR – London Inter Bank Offer Rate

Liquidity - Access to cash deposits at very short notice.

Long term Investments - Investments with a duration of more than one year.

Market Loans

Loans borrowed from financial institutions such as banks and building societies.

Maturity - The date at which loans are due for repayment.

Net Borrowing Requirement

The Council's borrowings less cash and short term investments.

Operational Boundary for External Debt

This indicator is, as its name suggest, the focus of day to day treasury management activity within the authority. It is a means by which the authority manages its external debt to ensure that it

Responsible Section/Team	Finance	Version/Status	2021/22 v1
Responsible Author	Finance Manager	Report submitted to	Full Council
Date Amended now	Feb 2021	Meeting date	24 Feb 2021
Due for Review	Feb 2022	Page	40

remains within the self imposed 'Authorised Limit'. However it differs from the 'Authorised Limit' in being based on expectations of the maximum external debt of the authority according to probable- not simply possible-events and being consistent with the maximum level of external debt projected by the estimates.

Prudential Borrowing

This is borrowing wholly supported by the Council and would include 'invest to save projects'. Market conditions permitting it may well be cheaper to borrow rather than lease vehicles and or plant.

Public Works Loan Board (PWLB)

A Government agency that provides longer term loans to local authorities.

Ratio of Financing costs to Net Revenue Stream

This is the proportion of interest payments plus debt repaid less interest receipts expressed as a proportion of the revenue stream. In the case of General Fund the revenue stream equates to the net budget requirement of less use of internal reserves (as funded by external income from Business Rates and Council Tax).

Short-term investment

Investments with a duration of less than or equal to 365 days.

Term Deposit

Investments for a pre-defined period of time at a fixed interest rate.

Upper Limit for fixed/variable interest rate exposure

This relates to the limit in loans which can be held in either fixed interest rates or variable interest rates. Whilst fixed interest-rate borrowing can contribute significantly to reducing the uncertainty surrounding future interest rate scenarios, the pursuit of optimum performance may justify, or even demand, retaining a degree of flexibility through the use of variable interest rates.

Volatility

Sudden upward or downward movements in interest rates in reaction to economic, market and political events.

The Treasury Management Policy Statement

The treasury management policy statement

This council defines its treasury management activities as:

1. The management of the organisation's borrowing, investments and cash flows, its banking, money market and capital market transactions; the effective control of the risks associated with those activities; and the pursuit of optimum performance consistent with those risks.
2. This organisation regards the successful identification, monitoring and control of risk to be the prime criteria by which the effectiveness of its treasury management activities will be measured. Accordingly, the analysis and reporting of treasury management activities will focus on their risk implications for the organisation, and any financial instruments entered into to manage these risks.
3. This council acknowledges that effective treasury management will provide support towards the achievement of its business and service objectives. It is therefore committed to the principles of achieving value for money in treasury management, and to employing suitable comprehensive performance measurement techniques, within the context of effective risk management.

Clauses to be formally adopted

1. This Council will create and maintain, as the cornerstones for effective treasury management:
 - a Treasury Management Policy Statement (TMSS), stating the policies, objectives and approach to risk management of its treasury management activities
 - suitable Treasury Management Practices (TMPs), setting out the manner in which the organisation will seek to achieve those policies and objectives, and prescribing how it will manage and control those activities.

The content of the policy statement and TMPs will follow the recommendations contained in Sections 6 and 7 of the CIPFA Treasury Management Code (the Code), subject only to amendment where necessary to reflect the particular circumstances of this organisation. Such amendments will not result in the organisation materially deviating from the Code's key principles.

2. This Council will receive reports on its treasury management policies, practices and activities, including, as a minimum, an annual strategy and plan in advance of the year, a mid-year review and an annual report after its close, in the form prescribed in its TMPs.
3. This Council delegates responsibility for the implementation and regular monitoring of its treasury management policies and practices to Head of Finance, and for the execution and administration of treasury management decisions to the Head of Finance, who will act in accordance with the organisation's policy statement and TMPs
4. This organisation nominates Head of Finance to be responsible for ensuring effective scrutiny of the treasury management strategy and policies.

Responsible Section/Team	Finance	Version/Status	2020/21 v1
Responsible Author	Finance Manager	Report submitted to	Full Council
Date last Amended	Feb 2020	Meeting date	26 Feb 2020
Due for Review	Feb 2021	Page	3

TMP 1 RISK MANAGEMENT

The responsible officer (in the case of Rossendale Borough Council, The Head of Finance) will design, implement and monitor all arrangements for the identification, management and control of treasury management risk, will report at least annually on the adequacy/suitability thereof, and will report, as a matter of urgency, the circumstances of any actual or likely difficulty in achieving the organisation's objectives in this respect, all in accordance with the procedures set out in TMP6 Reporting requirements and management information arrangements. In respect of each of the following risks, the arrangements which seek to ensure compliance with these objectives are set out in the schedule to this document.

1. Credit and Counterparty Risk Management

Credit and counter-party risk is the risk of failure by a counterparty to meet its contractual obligations to the organisation under an investment, borrowing, capital project or partnership financing, particularly as a result of the counterparty's diminished creditworthiness, and the resulting detrimental effect on the organisation's capital or current (revenue) resources.

This organisation regards a key objective of its treasury management activities to be the security of the principal sums it invests. Accordingly, it will ensure that its counterparty lists and limits reflect a prudent attitude towards organisations with whom funds may be deposited, and will limit its investment activities to the instruments, methods and techniques referred to in TMP4 Approved Instruments Methods And Techniques and listed in the schedule to this document. It also recognises the need to have, and will therefore maintain, a formal counterparty policy in respect of those organisations from which it may borrow, or with whom it may enter into other financing arrangements.

1.1. Policy on the use of credit risk analysis techniques

- 1.1.1. The Council will use credit criteria in order to select creditworthy counterparties for placing investments with.
- 1.1.2. Credit ratings will be used as supplied from all three rating agencies - Fitch, Moodys and Standard & Poors
- 1.1.3. Treasury Management Consultants will provide regular updates of changes to all ratings relevant to the council.
- 1.1.4. The responsible officer will formulate suitable criteria for assessing and monitoring the credit risk of investment counterparties and shall construct a lending list comprising maturity periods, type, group, sector, country and counterparty limits. This organisation will use the Sector creditworthiness service based on using colours determined by minimum combinations of ratings to derive maturity limits as follows: -
 - Yellow 5 years
 - Purple 2 years
 - Blue 1 year (only applies to nationalised or semi nationalised UK Banks)
 - Orange 1 year
 - Red 6 months
 - Green 3 months
 - No Colour not to be used

Responsible Section/Team	Finance	Version/Status	2021/22 v1
Responsible Author	Finance Manager	Report submitted to	Full Council
Date Amended now	Feb 2021	Meeting date	24 Feb 2021
Due for Review	Feb 2022	Page	4

In addition, a credit default swap overlay is used as a further safeguard to give early warning of potential creditworthiness problems which may only belatedly lead to actual changes in credit ratings.

As this methodology is complex, readers are referred to the document produced by Link Asset Services “Treasury Solutions Credit Policy Guide December 2015” for a full explanation.

- 1.1.5. Credit ratings for individual counterparties can change at any time. The Head of Finance is responsible for applying approved credit rating criteria for selecting approved counterparties. Treasury management staff will add or delete counterparties to/from the approved counterparty list in line with the policy on criteria for selection of counterparties.
- 1.1.6. This organisation will not rely solely on credit ratings in order to select and monitor the creditworthiness of counterparties. In addition to credit ratings it will therefore use other sources of information including: -
- The quality financial press
 - Market data
 - Information on government support for banks and
 - The credit ratings of that government support
- 1.1.7. Maximum maturity periods and amounts to be placed in different types of investment instrument are shown below. At present the maximum investment period for Specified Investments is 365 days.
- 1.1.8. Diversification: this organisation will avoid concentrations of lending and borrowing by adopting a policy of diversification. It will therefore use the following: -
- Maximum amount to be placed with any one institution - £8m or 50%, whichever is greater at the time the decision is made.
 - Group limits where a number of institutions are under one ownership – maximum of £10m
 - Country limits – normally, a minimum sovereign rating of AAA is required for an institution to be placed on our approved lending list. However, UK banks will be considered regardless of the UK’s sovereign rating at the time of investment.
- 1.1.9. Investments will not be made with counterparties that do not have a credit rating in their own right, other than in the case of Non-specified Investments where the counterparty is one of the Council’s related parties and where a charge can be placed on land or equity in order to preserve the Council’s rights to its resources.
- 1.1.10. The definition of ‘high credit quality’ in order to determine what are specified investments as opposed to non specified investments which do not have high credit ratings is set out at the end of TMP1 in schedule 1.
- 1.1.11. Should the Council ever begin to use **external fund manager(s)** they will adhere to the counterparty credit criteria and maximum individual limits set by the Council; however, it is understood that fund manager(s) may use a subset of the counterparty list so derived.

Responsible Section/Team	Finance	Version/Status	2021/22 v1
Responsible Author	Finance Manager	Report submitted to	Full Council
Date Amended now	Feb 2021	Meeting date	24 Feb 2021
Due for Review	Feb 2022	Page	5

1.2 Liquidity Risk Management

This is the risk that cash will not be available when it is needed, that ineffective management of liquidity creates additional unbudgeted costs, and that the organisation's business/service objectives will be thereby compromised.

This organisation will ensure it has adequate though not excessive cash resources, borrowing arrangements, overdraft or standby facilities to enable it at all times to have the level of funds available to it which are necessary for the achievement of its business/service objectives. This organisation will only borrow in advance of need where there is a clear business case for doing so and will only do so for the current capital programme or to finance future debt maturities.

1.2.1. Amounts of approved minimum cash balances and short-term investments

The Finance Officers shall seek to minimise the balance held in the Council's main bank accounts at the close of each working day. The use of alternative call accounts and short-term notice accounts (under 90 days) shall be used in order to achieve this aim.

1.2.2. Details of:

a. Standby facilities

At the end of each financial day the balance in the Council's current account is automatically transferred to/from the Special Business Investment Account (SIBA) to maximise the interest available on the Council's operational bank accounts. In practice the current account and the SIBA account are now operated as one account. Individual daily debit balances on the current account are not treated as an overdraft.

The Council also maintain one or more on-call, and notice accounts up to 90 days with other banks. These accounts are used for reserve cash balances which may be required without notice. Such instant access is possible, but would lead to some loss of interest commensurate with the notice period waived.

b. Bank overdraft arrangements

Previous overdraft facilities have now ceased due to the sweeping action described above and following the bank imposing an arrangement fee for overdrafts on the SIBA account.

c. Short-term borrowing facilities

The Council accesses temporary loans through approved brokers on the London money market. The approved operational borrowing limit for short term debt in 2021/22 is £14.7m.

d. Insurance/guarantee facilities

There are no specific insurance or guarantee facilities as the above arrangements are regarded as being adequate to cover all unforeseen occurrences.

Responsible Section/Team	Finance	Version/Status	2021/22 v1
Responsible Author	Finance Manager	Report submitted to	Full Council
Date Amended now	Feb 2021	Meeting date	24 Feb 2021
Due for Review	Feb 2022	Page	6

1.3 Interest Rate Risk Management

The risk that fluctuations in the levels of interest rates create an unexpected or unbudgeted burden on the organisation's finances, against which the organisation has failed to protect itself adequately.

This organisation will manage its exposure to fluctuations in interest rates with a view to containing its interest costs, or securing its interest revenues, in accordance with the amounts provided in its budgetary arrangements as amended in accordance with TMP6 Reporting requirements and management information arrangements.

It will achieve this by the prudent use of its approved financing and investment instruments, methods and techniques, primarily to create stability and certainty of costs and revenues, but at the same time retaining a sufficient degree of flexibility to take advantage of unexpected, potentially advantageous changes in the level or structure of interest rates. This should be the subject to the consideration and, if required, approval of any policy or budgetary implications.

1.3.1 Policies concerning the use of instruments for interest rate management.

a. forward dealing

Consideration will be given to dealing from forward periods dependant upon market conditions.

b. callable deposits (England and Wales only)

The Council may use callable deposits as part as of its Annual Investment Strategy (AIS), which now forms part of the Annual Treasury Management Strategy Statement. The credit criteria and maximum periods are set out in the Schedule of Specified and Non Specified Investments appended to the AIS.

1.4 Exchange Rate Risk Management

The risk that fluctuations in foreign exchange rates create an unexpected or unbudgeted burden on the organisation's finances, against which the organisation has failed to protect itself adequately.

The Council will manage its exposure to fluctuations in exchange rates so as to minimise any detrimental impact on its budgeted income/expenditure levels.

1.5 Refinancing Risk Management

The risk that maturing borrowings, capital projects or partnership financings cannot be refinanced on terms that reflect the provisions made by the organisation for those refinancing, both capital and current (revenue), and/or that the terms are inconsistent with prevailing market conditions at the time.

This organisation will ensure that its borrowing, private financing and partnership arrangements are negotiated, structured and documented, and the maturity profile of the monies so raised are managed, with a view to obtaining offer terms for renewal or refinancing, if required, which are competitive and as favourable to the organisation as can reasonably be achieved in the light of market conditions prevailing at the time.

Responsible Section/Team	Finance	Version/Status	2021/22 v1
Responsible Author	Finance Manager	Report submitted to	Full Council
Date Amended now	Feb 2021	Meeting date	24 Feb 2021
Due for Review	Feb 2022	Page	7

The Council will actively manage its relationships with its counterparties in these transactions in such a manner as to secure this objective, and will avoid overreliance on any one source of funding if this might jeopardise achievement of the above.

1.5.1. Debt/Other Capital Financing, Maturity Profiling, Policies and Practices

The Council will establish through its Prudential and Treasury Indicators the amount of debt maturing in any year/period.

Any debt rescheduling will be considered when the difference between the refinancing rate and the redemption rate is most advantageous and the situation will be continually monitored in order to take advantage of any perceived anomalies in the yield curve. The reasons for any rescheduling to take place will include:

- a) the generation of cash savings at minimum risk;
- b) to reduce the average interest rate;
- c) to amend the maturity profile and /or the balance of volatility of the debt portfolio.

Rescheduling will be reported to the Cabinet at the meeting immediately following its action.

1.5.2. Projected Capital Investment Requirements

The Finance Manager will prepare a three year plan for capital expenditure for the Council. The capital plan will be used to prepare a three year revenue budget for all forms of financing charges. In addition, the responsible officer will draw up a capital strategy report which will give a longer term view.

The definition of capital expenditure and long term liabilities used in the Code will follow recommended accounting practice as per the Code of Practice on Local Authority Accounting.

1.5.3 Policy Concerning Limits on Affordability and Revenue Consequences of Capital Financing

In considering the affordability of its capital plans, the Council will consider all the resources currently available/estimated for the future together with the totality of its capital plans, revenue income and revenue expenditure forecasts for the forthcoming year and the two following years and the impact these will have on council tax. It will also take into account affordability in the longer term beyond this three year period.

The Council will use the definitions provided in the Prudential Code for borrowing (65), capital expenditure (66), capital financing requirement (67), debt (68), financing costs (69), investments (70), net borrowing (71), net revenue stream (72), other long term liabilities (73).

1.6 Legal and Regulatory Risk Management

The risk that the organisation itself, or an organisation with which it is dealing in its treasury management activities, fails to act in accordance with its legal powers or regulatory requirements, and that the organisation suffers losses accordingly.

This organisation will ensure that all of its treasury management activities comply with its statutory powers and regulatory requirements. It will demonstrate such compliance, if required to do so, to all parties with whom it deals in such activities. In framing its

Responsible Section/Team	Finance	Version/Status	2021/22 v1
Responsible Author	Finance Manager	Report submitted to	Full Council
Date Amended now	Feb 2021	Meeting date	24 Feb 2021
Due for Review	Feb 2022	Page	8

credit and counterparty policy under TMP1[1] credit and counterparty risk management, it will ensure that there is evidence of counterparties' powers, authority and compliance in respect of the transactions they may affect with the organisation, particularly with regard to duty of care and fees charged.

This organisation recognises that future legislative or regulatory changes may impact on its treasury management activities and, so far as it is reasonably able to do so, will seek to minimise the risk of these impacting adversely on the organisation.

1.6.1. References to Relevant Statutes and Regulations

The treasury management activities of the Council shall comply fully with legal statute, guidance, Codes of Practice and the regulations of the Council. These are:

- Local Government Finance Act 1988 section 114 – duty on the responsible officer to issue a report if the Council is likely to get into a financially unviable position.
- Requirement to set a balanced budget - Local Government Finance Act 1992 section 32 for billing authorities and section 43 for major precepting authorities.

- CIPFA Local Authority Capital Accounting - a reference manual for practitioners 2014 Edition
- CIPFA Guide for Chief Financial Officers on Treasury Management in Local Authorities 1996
- CIPFA Standard of Professional Practice on Treasury Management 2002
- CIPFA Standard of Professional Practice on Continuous professional Development 2005
- CIPFA Standard of Professional Practice on Ethics 2006
- The Good Governance Standard for Public Services 2004
- LAAP Bulletins
- IFRS - Code of Practice on Local Authority Accounting in the United Kingdom: A Statement of recommended Practice
- PWLB circulars on Lending Policy
- The Non-Investment Products Code (NIPS) - (formerly known as The London Code of Conduct) for principals and broking firms in the wholesale markets.
- Financial Conduct Authority's Code of Market Conduct
- The Council's Standing Orders relating to Contracts
- The Council's Financial Regulations
- The Council's Scheme of Delegated Functions

1.6.2 Procedures for Evidencing the Council's Powers/Authorities to Counterparties

The Council's powers to borrow and invest are contained in legislation.

Investing: Local Government Act 2003, section 12

Borrowing: Local Government Act 2003, section 1

In addition, it will make available on request the following the scheme of delegation of treasury management activities contained in Treasury Management Strategy which states

- which officers carry out these duties
- which officers are the authorised signatories

Required Information on Counterparties

Lending shall only be made to counterparties on the Approved Lending list. This list has been compiled using advice from the Council's treasury advisers based upon credit ratings supplied by Fitch, Moodys and Standard & Poors. Lending can also be made to one of the Council's related parties or subsidiaries.

1.6.3 Statement on the Council's Political Risks and Management of Same

Responsible Section/Team	Finance	Version/Status	2021/22 v1
Responsible Author	Finance Manager	Report submitted to	Full Council
Date Amended now	Feb 2021	Meeting date	24 Feb 2021
Due for Review	Feb 2022	Page	10

The Head of Finance shall take appropriate action with the Council, the Chief Executive Officer and the Leader of the Council to respond to and manage appropriately political risks such as change of majority group, leadership in the Council, change of Government etc.

1.6.4 Monitoring Officer

It is the duty of the monitoring officer to ensure that the treasury management activities of the Council are lawful.

1.6.5. Chief Financial Officer

The Chief Financial Officer is the Head of Finance. The duty of this officer is to ensure that the financial affairs of the Council are conducted in a prudent manner and to make a report to the Council if he has concerns as to the financial prudence of its actions or its expected financial position.

1.7 Fraud, Error and Corruption, and Contingency Management

The risk that the Council fails to identify the circumstances in which it may be exposed to the risk of loss through fraud, error, corruption or other eventualities in its treasury management dealings, and fails to employ suitable systems and procedures and maintain effective contingency management arrangements to these ends. It includes the area of risk commonly referred to as operational risk.

This Council will ensure that it has identified the circumstances which may expose it to the risk of loss through fraud, error, corruption or other eventualities in its treasury management dealings. Accordingly, it will employ suitable systems and procedures, and will maintain effective contingency management arrangements, to these ends.

The Council will therefore:-

- a) Seek to ensure an adequate division of responsibilities and maintenance at all times of an adequate level of internal check which minimises such risks.
- b) Fully document all its treasury management activities so that there can be no possible confusion as to what proper procedures are.
- c) Staff will not be allowed to take up treasury management activities until they have had proper training in procedures and are then subject to an adequate and appropriate level of supervision.
- d) Records will be maintained of all treasury management transactions so that there is a full audit trail and evidence of the appropriate checks being carried out.

1.7.1. Details of Systems and Procedures to be Followed, Including Internet Services

Authority

- The Scheme of Delegation to Officers sets out the delegation of duties to officers.
- All loans and investments are negotiated by the responsible officer or authorised persons.
- Loan procedures are defined in the Financial Regulations section of the Council's Constitution.

Procedures

Responsible Section/Team	Finance	Version/Status	2021/22 v1
Responsible Author	Finance Manager	Report submitted to	Full Council
Date Amended now	Feb 2021	Meeting date	24 Feb 2021
Due for Review	Feb 2022	Page	11

- The electronic banking procedures include internet access to the Council's bank accounts for both downloading statements and entering one-off same-day transactions. The electronic authorisation of transactions through chip and pin cards and passwords follows the same pattern of required signatories as paper transactions do (i.e. one signature up to £5,000 and two signatures for transactions over £5,000).
- Autopay online is the system used by the Council for the transfer of payment and collection files to the BACs processing centre. BACs collection and payment files are generated by the payroll, creditors, benefits and revenues software systems and transferred through a secure internet portal by the authorised signatories. Files must be generated, approved and sent by two different people.
- Full details of operational procedures are maintained by the Finance Officer (Exchequer Services).

Investment and borrowing transactions

- A detailed register of all loans and investments is maintained by the Finance Officer (Exchequer Services). A written acknowledgement of each deal is sent promptly to the lending or borrowing institution where transactions are done directly with the organisation.
- Written confirmation is received and checked against the dealer's records for the transaction.
- Any discrepancies are immediately reported to the Head of Finance for resolution.
- All transactions placed through brokers are confirmed by a broker note showing details of the loan arranged. Written confirmation is received and checked against the dealer's records for the transaction. Any discrepancies are immediately reported to the Head of Finance for resolution.

Regularity and security

- Lending is only made to institutions on the Approved List of Counterparties.
- All loans raised, and repayments made, go directly to and from the bank account of approved counterparties.
- Counterparty limits are set for every institution that the Council invests with.
- Brokers have a list of named officials authorised to agree deals.
- There is a separation of duties in the section between dealers and the checking and authorisation of all deals.
- The Council's bank holds a list of Council officials who are authorised signatories for treasury management transactions.
- Payments can only be authorised in a formal letter by an authorised signatory, the list of signatories having previously been agreed with the current provider of our banking services.
- The NatWest Bankline system can only be accessed by a password and online payments require chip and pin authorisation from one or more of the bank signatories (two for payments over £5,000).
- There is adequate insurance cover for employees involved in loans management and accounting.

Checks

- The bank reconciliation is carried out monthly from the bank statement to the financial ledger.
- A debt charge/investment income listing is produced every month when a review is undertaken against the budget for interest earnings and debt costs.

Responsible Section/Team	Finance	Version/Status	2021/22 v1
Responsible Author	Finance Manager	Report submitted to	Full Council
Date Amended now	Feb 2021	Meeting date	24 Feb 2021
Due for Review	Feb 2022	Page	12

Calculations

- The calculation of repayment of principal and interest notified by the lender or borrower is checked for accuracy against the amount calculated by the Finance Officer (Exchequer Services). This is used to check the amount paid to lenders.
- Average weighted capital loans fund interest rates and debt management expenses are calculated monthly using information from the financial ledger.
- These interest and expense rates are then used to calculate the principal, interest and debt management expense charges to the General Fund.

1.7.2. Emergency and Contingency Planning Arrangements Disaster Recovery Plan.

The Council's main Business Continuity Plan includes a detailed section covering the essential financial systems and procedures, including banking, payments and revenue collection. All members of the treasury management team are familiar with this plan and new members will be briefed on it. The plan is reviewed and updated at regular intervals with both paper and electronic copies being available.

All computer files are backed up on the server to enable files to be accessed from remote sites.

1.7.3. Insurance Cover Details

Fidelity Insurance

The Council has 'Fidelity' insurance cover with Zurich Municipal which covers the loss of cash by fraud or dishonesty of employees. This cover is limited to £5.5m for any one event with an excess of £1k for any one event.

Professional Indemnity Insurance

The Council also has an 'Officials Indemnity' insurance policy with Zurich Municipal which covers loss to the Council from the actions and advice of its officers which are negligent and without due care. This cover is limited to £5m for any one event with an excess of £nil for any one event.

1.8 Market Risk Management

The risk that, through adverse market fluctuations in the value of the principal sums an organisation borrows and invests, its stated treasury management policies and objectives are compromised, against which effects it has failed to protect itself adequately.

This organisation will seek to ensure that its stated treasury management policies and objectives will not be compromised by adverse market fluctuations in the value of the principal sums it invests, and will accordingly seek to protect itself from the effects of such fluctuations.

1.8.1. Details of Approved Procedures and Limits for Controlling Exposure to Investments Whose Capital Value May Fluctuate (Gilts, CDs, Etc.)

These are controlled through setting limits on investment instruments where the principal value can fluctuate. The limits are determined and set through the Annual Investment Strategy (which now forms part of the Annual Treasury Management Strategy Statement).

Responsible Section/Team	Finance	Version/Status	2021/22 v1

TMP 2 PERFORMANCE MEASUREMENT

2.1 Evaluation and Review of Treasury Management Decisions

The Council has a number of approaches to evaluating treasury management decisions:

- a. monthly reviews carried out by the Head of Finance and Finance Manager, reported as part of the regular financial monitoring reports to Cabinet.
- b. weekly review reports from our treasury management consultants detailing current markets, forecasts and model portfolio returns.
- c. annual review of performance and strategy with our treasury management consultants.
- d. comparative reviews with neighbouring authorities.

2.1.2 Reviews with our treasury management consultants

The Head of Finance meets with our consultants every 12 months to review the performance of the investment and debt portfolios.

2.1.3 Annual Review after the end of the financial year

In addition to the regular financial monitoring reports to Cabinet, the end of March out-turn report includes an annual treasury management report which reviews the performance of the debt and investment portfolios. This report contains the following:

- a. total debt and investments at the beginning and close of the financial year and average interest rates
- b. borrowing strategy for the year compared to actual strategy
- c. investment strategy for the year compared to actual strategy
- d. explanations for variance between original strategies and actual
- e. debt rescheduling done in the year
- f. actual borrowing and investment rates available through the year
- g. comparison of return on investments to the investment benchmark
- h. compliance with Prudential and Treasury Indicators

2.1.4 Comparative reviews

When data becomes available, comparative reviews are undertaken to see how the performance of the authority on debt and investments compares to other authorities with similar size portfolios (but allowing for the fact that Prudential and Treasury Indicators are locally set). Data can be sourced from: -

- CIPFA Treasury Management statistics published each year for the last complete financial year
- Neighbouring Lancashire authorities
- Link Asset Services model portfolio

Responsible Section/Team	Finance	Version/Status	2021/22 v1
Responsible Author	Finance Manager	Report submitted to	Full Council
Date Amended now	Feb 2021	Meeting date	24 Feb 2021
Due for Review	Feb 2022	Page	14

2.2 Benchmarks and Calculation Methodology:

2.2.1 Debt management

- Average rate on all external debt
- Average period to maturity of external debt
- Average period to maturity of new loans in previous year

2.2.2 Investment

The performance of investment earnings will be measured against the following benchmarks: -

- a. Link Asset Services model portfolio
 - *Weighted average rate of return*
 - *Weighted average maturity*

Performance may also be measured against other local authority funds with similar benchmarks and parameters managed by other fund managers.

2.3 Policy concerning methods for testing Value for Money in Treasury Management

2.3.1 Frequency and processes for tendering

Tenders are normally awarded on a five-year basis. The process for awarding contracts will be in line with the Council's Contract Standing Orders.

2.3.2 Banking services

The Council's banking arrangements are to be subject to competitive tender unless it is considered that there will be changes in the volume of transactions in the foreseeable future which renders a shorter period appropriate.

2.3.3 Money-broking services

The Council may use money broking services in order to make deposits or to borrow, and will establish charges for all services prior to using them.

2.3.4 Consultants'/advisers' services

This Council's policy is not to appoint full-time professional treasury management consultants (Link Asset Services advise on an ad hoc basis, alongside automated updates).

2.3.5 Policy on External Managers (Other than relating to Superannuation Funds)

The Council's policy is not to appoint external investment fund managers.

TMP 3 DECISION-MAKING AND ANALYSIS

3.1 Funding, Borrowing, Lending, and New Instruments/Techniques:

3.1.1 Records to be kept

The following records will be retained:-

- Daily and monthly cash balance forecasts
- Brokers' confirmations for investment and temporary borrowing transactions
- Confirmations from borrowing /lending institutions where deals are done directly
- PWLB loan confirmations
- PWLB debt portfolio schedules.
- Certificates for market loans, local bonds and other loans
- Contract notes received from fund manager(s)
- Fund manager(s) valuation statements (if applicable)

3.1.2 Processes to be pursued

- Cash flow analysis.
- Debt and investment maturity analysis
- Ledger reconciliation
- Review of opportunities for debt restructuring (if applicable)
- Review of borrowing requirement to finance capital expenditure (and other forms of financing where those offer value for money)
- Performance information (e.g. monitoring of actual against budget for debt charges, interest earned, debt management; also monitoring of average pool rate, investment returns, etc).

3.1.3 Issues to be addressed

3.1.3.1. In respect of every treasury management decision made the Council will:

- a) Above all, be clear about the nature and extent of the risks to which the Council may become exposed
- b) Be certain about the legality of the decision reached and the nature of the transaction, and that all authorities to proceed have been obtained
- c) Be content that the documentation is adequate both to deliver the Council's objectives and protect the Council's interests, and to deliver good housekeeping
- d) Ensure that third parties are judged satisfactory in the context of the Council's creditworthiness policies, and that limits have not been exceeded
- e) Be content that the terms of any transactions have been fully checked against the market, and have been found to be competitive.

Responsible Section/Team	Finance	Version/Status	2021/22 v1
Responsible Author	Finance Manager	Report submitted to	Full Council
Date Amended now	Feb 2021	Meeting date	24 Feb 2021
Due for Review	Feb 2022	Page	16

3.1.3.2 In respect of borrowing and other funding decisions, the Council will:

- a) consider the ongoing revenue liabilities created, and the implications for the organisation's future plans and budgets
- b) evaluate the economic and market factors that might influence the manner and timing of any decision to fund
- c) consider the merits and demerits of alternative forms of funding, including funding from revenue, leasing and private partnerships
- d) consider the alternative interest rate bases available, the most appropriate periods to fund and repayment profiles to use and, if relevant, the opportunities for foreign currency funding.

3.1.3.3 In respect of investment decisions, the Council will:

- a) consider the optimum period, in the light of cash flow availability and prevailing market conditions;
- b) consider the alternative investment products and techniques available, especially the implications of using any which may expose the Council to changes in the value of its capital;
- c) in the case of investments outside the banking sector the Council will consider the appropriate level of asset security, such as Land Registry charges, local Land Charges, or holding asset deeds.

TMP 4 APPROVED INSTRUMENTS, METHODS AND TECHNIQUES

4.1 Approved Activities of the Treasury Management Operation

- borrowing;
- lending;
- debt repayment and rescheduling;
- consideration, approval and use of new financial instruments and treasury management techniques;
- managing the underlying risk associated with the Council's capital financing and surplus funds activities;
- managing cash flow;
- banking activities;
- the use of external fund managers (other than Pension Fund)
- leasing.

4.2 Approved Instruments for Investments

Refer to the Treasury Management Strategy.

4.3 Approved Techniques

- Forward dealing
- LOBOs – lenders option, borrower's option borrowing instrument
- The use of structured products such as callable deposits

4.4 Approved Methods and Sources of Raising Capital Finance

Finance will only be raised in accordance with the Local Government Act 2003 and within this limit the Council has a number of approved methods and sources of raising capital finance. These are:

On Balance Sheet	Fixed	Variable
PWLB	●	●
Market (long-term)	●	●
Market (temporary)	●	●
Market (LOBOs)	●	●
Local temporary	●	●
Local Bonds	●	
Overdraft		●
Internal (capital receipts & revenue balances)	●	●
Leasing (not operating leases)	●	●
Deferred Purchase	●	●

Other Methods of Financing

- Government and EC Capital Grants
- Lottery monies
- PFI/PPP
- Operating leases

Responsible Section/Team	Finance	Version/Status	2021/22 v1
Responsible Author	Finance Manager	Report submitted to	Full Council
Date Amended now	Feb 2021	Meeting date	24 Feb 2021
Due for Review	Feb 2022	Page	18

Borrowing will only be done in Sterling. All forms of funding will be considered dependent on the prevailing economic climate, regulations and local considerations. The responsible officer has delegated powers in accordance with Financial Regulations, Standing Orders, the Scheme of Delegation to Officers Policy and the Treasury Management Strategy to take the most appropriate form of borrowing from the approved sources.

4.5 Investment Limits

The Treasury Management Strategy Statement sets out the limits and the guidelines for use of each type of investment instrument.

4.6 Borrowing Limits

See the Treasury Management Strategy Statement and Prudential and Treasury Indicators.

TMP 5 Organisation, Clarity and Segregation of Responsibilities, and Dealing Arrangements

5.1 Allocation of responsibilities

(i) Full Council

- receiving and reviewing reports on treasury management policies, practices and activities
- approval of annual treasury management strategy
- approval of capital strategy and capital programme
- approval of annual revenue budget

(ii) Cabinet

- recommendation of amendments to the organisation's adopted clauses, treasury management policy statement and treasury management practices
- budget consideration and recommendations
- approval of the division of responsibilities
- receiving and reviewing regular monitoring reports and acting on recommendations
- approving the selection of external service providers and agreeing terms of appointment.
- reviewing the treasury management policy and procedures and making recommendations to the responsible body.

5.2 Principles and Practices Concerning Segregation of Duties

5.2.1 The following duties must be undertaken by separate officers: -

Dealing	Negotiation and approval of deal. Receipt and checking of brokers confirmation note against loans diary. Reconciliation of cash control account. Bank reconciliation
Accounting Entry	Production of transfer note. Processing of accounting entry
Authorisation/Payment of Deal	Entry onto system. Approval and payment.

5.3 Treasury Management Organisation Chart

5.4 Statement of the treasury management duties/responsibilities of each treasury post

5.4.1. The responsible officer

The responsible officer is the person charged with professional responsibility for the treasury management function and in this Council is the Head of Finance (This post is also the S151 officer.) This officer will carry out the following duties: -

- a) recommending clauses, treasury management policy/practices for approval, reviewing the same regularly, and monitoring compliance
- b) submitting regular treasury management policy reports
- c) submitting budgets and budget variations
- d) receiving and reviewing management information reports
- e) reviewing the performance of the treasury management function
- f) ensuring the adequacy of treasury management resources and skills, and the effective division of responsibilities within the treasury management function
- g) ensuring the adequacy of internal audit, and liaising with external audit
- h) recommending the appointment of external service providers.
- i) The responsible officer has delegated powers through this policy to take the most appropriate form of borrowing from the approved sources, and to make the most appropriate form of investments in approved instruments.
- j) The responsible officer may delegate his power to borrow and invest to members of his staff, principally the Finance Manager, to act as temporary cover for leave/sickness. All transactions must be authorised by at least two of the bank signatories as approved in the Treasury Management Strategy Appendix 5.6.
- k) The responsible officer will ensure that Treasury Management Policy is adhered to, and if not will bring the matter to the attention of elected members as soon as possible.
- l) Prior to entering into any capital financing, lending or investment transaction, it is the responsibility of the responsible officer to be satisfied, by reference to the Council's legal department and external advisors as appropriate, that the proposed transaction does not breach any statute, external regulation or the Council's Financial Regulations
- m) It is also the responsibility of the responsible officer to ensure that the Council complies with the requirements of The Non Investment Products Code

Responsible Section/Team	Finance	Version/Status	2021/22 v1

Due for Review	Feb 2022	Page	21

(formerly known as The London Code of Conduct) for principals and broking firms in the wholesale markets.

5.4.2. Finance Officer (Exchequer Services)

The responsibilities of this post will be: -

- a) execution of transactions
- b) adherence to agreed policies and practices on a day-to-day basis
- c) maintaining relationships with counterparties and external service providers
- d) supervising treasury management staff
- e) monitoring performance on a day-to-day basis
- f) submitting management information reports to the responsible officer
- g) identifying and recommending opportunities for improved practices

5.4.3. The Head of the Paid Service – the Chief Executive

The responsibilities of this post will be: -

- a) Ensuring that the system is specified and implemented
- b) Ensuring that the responsible officer reports regularly to full Council and Cabinet on treasury policy, activity and performance.

5.4.4. The Monitoring Officer

The responsibilities of this post will be: -

- a) Ensuring compliance by the responsible officer with the treasury management policy statement and treasury management practices and that they comply with the law.
- b) Being satisfied that any proposal to vary treasury policy or practice complies with law or any code of practice.
- c) Giving advice to the responsible officer when advice is sought.

5.4.5. Internal Audit

The responsibilities of Internal Audit will be: -

- a) Reviewing compliance with approved policy and treasury management practices.
- b) Reviewing division of duties and operational practice.
- c) Assessing value for money from treasury activities.
- d) Undertaking probity audit of treasury function.

5.5 Absence Cover Arrangements

The Finance Manager is also the deputy S151 Officer. The Finance Manager will also ensure that cover is available for the Finance Officer (Exchequer Services) and other treasury management officers as necessary.

5.6 Dealing Limits

The following posts are authorised to deal:

- The Head of Finance: limited to investments and loans of £5m per transaction. Amounts in excess of this limit should be by Scheme of Delegation.

Responsible Section/Team	Finance	Version/Status	2021/22 v1
Responsible Author	Finance Manager	Report submitted to	Full Council
Date Amended now	Feb 2021	Meeting date	24 Feb 2021
Due for Review	Feb 2022	Page	22

5.7 Policy on Brokers' Services

It is this Council's policy to rotate business between brokers.

5.8 Policy on Taping of Conversations

It is not this Council's policy to tape brokers conversations.

5.9 Direct Dealing Practices

The Council will consider dealing direct with counterparties if it is appropriate and the Council believes that better terms will be available. At present, most deals are arranged by this method. There are certain types of accounts and facilities, however, where direct dealing is required, as follows;

- Business Reserve Accounts:
- Call Accounts:
- Money Market Funds.

5.10 Settlement Transmission Procedures

A formal letter signed by an agreed bank signatory setting out each transaction must be sent to the local authority's bankers where preliminary instructions have been given by telephone. For payments a transfer will be made through BACs or CHAPs to be completed by the appropriate bank deadlines in place that day.

5.11 Documentation Requirements

For each deal undertaken a record should be prepared giving details of dealer, amount, period, counterparty, interest rate, dealing date, payment date(s), broker.

5.12 Arrangements Concerning the Management of Third-Party Funds.

The Council does not currently manage any third-party funds. Trust funds are now held and administered by the Community Foundation for Lancashire.

5.13 Council Cheque and Bank Signatories

A list of the posts delegated with cheque and bank signatory authority are included within the appendices to the Treasury Management Strategy Statement.

TMP 6 Reporting Requirements and Management Information Arrangements

6.1 Annual programme of reporting

- a) Annual reporting requirements before the start of the year: -
 - a. review of the organisation's approved clauses, treasury management policy statement and practices
 - b. strategy report on proposed treasury management activities for the year comprising of the Treasury Management Strategy Statement, Annual Investment Strategy and Minimum Revenue Provision Policy Statement
 - c. capital strategy to give a longer term view of the capital programme and treasury management implications thereof beyond the three year time horizon for detailed planning
- b) Regular review by Cabinet within the Financial Monitoring Reports
- c) Annual review report after the end of the year within the out-turn Financial Monitoring Report.

6.2 Annual Treasury Management Strategy Statement (TMSS)

1. The Treasury Management Strategy Statement sets out the specific expected treasury activities for the forthcoming financial year. This strategy will be submitted to the Cabinet and then to the full Council for approval before the commencement of each financial year.
2. The formulation of the annual Treasury Management Strategy Statement involves determining the appropriate borrowing and investment decisions in the light of the anticipated movement in both fixed and shorter -term variable interest rates. For instance, this Council may decide to postpone borrowing if fixed interest rates are expected to fall, or borrow early if fixed interest rates are expected to rise.
3. The Treasury Management Strategy Statement is concerned with the following elements:
 - a) Prudential and Treasury Indicators
 - b) current Treasury portfolio position
 - c) borrowing requirement
 - d) prospects for interest rates
 - e) borrowing strategy
 - f) policy on borrowing in advance of need
 - g) debt rescheduling
 - h) investment strategy
 - i) creditworthiness policy
 - j) policy on the use of external service providers
 - k) any extraordinary treasury issue
 - l) the MRP/VRP strategy

Responsible Section/Team	Finance	Version/Status	2021/22 v1
Responsible Author	Finance Manager	Report submitted to	Full Council
Date Amended now	Feb 2021	Meeting date	24 Feb 2021
Due for Review	Feb 2022	Page	24

4. The Treasury Management Strategy Statement will establish the expected move in interest rates against alternatives (using all available information such as published interest rate forecasts where applicable), and highlight sensitivities to different scenarios.

6.3 The Annual Investment Strategy

Included within the Treasury Management Strategy Statement is the report on the Annual Investment Strategy which sets out the following: -

- a) The Council's risk appetite in respect of security, liquidity and optimum performance
- b) The definition of high credit quality to determine what are specified investments as distinct from non specified investments
- c) Which specified and non specified instruments the Council will use
- d) Whether they will be used by the in house team, external managers or both (if applicable)
- e) The Council's policy on the use of credit ratings and other credit risk analysis techniques to determine creditworthy counterparties for its approved lending list
- f) Which credit rating agencies the Council will use
- g) How the Council will deal with changes in ratings, rating watches and rating outlooks
- h) Limits for individual counterparties and group limits
- i) Country limits
- j) Levels of cash balances
- k) Interest rate outlook
- l) Budget for investment earnings
- m) Policy on the use of external service providers

6.4 The Annual Minimum Revenue Provision Policy Statement

This statement will be submitted as one element of the Annual Treasury Management Strategy Statement and will set out how the Council will make revenue provision for repayment of its borrowing using the four options for so doing.

6.5 Policy on Prudential and Treasury Indicators

1. The Council approves before the beginning of each financial year a number of treasury limits which are set through Prudential and Treasury Indicators.
2. The responsible officer is responsible for incorporating these limits into the Annual Treasury Management Strategy Statement, and for ensuring compliance with the limits. Should it prove necessary to amend these limits, the responsible officer shall submit the changes for approval to the full Council

6.6 Regular and midyear review

The Council will review its treasury management activities and strategy on at least a six monthly basis, though in practice as part of regular financial monitoring to Cabinet. This review will consider the following:

- a) activities undertaken
- b) variations (if any) from agreed policies/practices

Responsible Section/Team	Finance	Version/Status	2021/22 v1
Responsible Author	Finance Manager	Report submitted to	Full Council
Date Amended now	Feb 2021	Meeting date	24 Feb 2021
Due for Review	Feb 2022	Page	25

- c) interim performance report
- d) regular monitoring
- e) monitoring of treasury management indicators for local authorities.

6.7 Management Information Reports, including a year-end performance report

Management information reports will be prepared for each Cabinet meeting, the final report going to the first available Cabinet after the year-end. These reports will contain the following information: -

- a) a summary of transactions executed (may want to add brokers used and fees paid) and their revenue (current effects);
- b) measurements of performance including effect on loan charges/investment income;
- c) degree of compliance with original strategy and practices and explanation of variances.
- d) any non compliance with Prudential limits or other treasury management limits.

6.8 Publication of Treasury Management Reports

Treasury Management information reports will be prepared for each Cabinet meeting and these are available as part of the agenda documents on the Council's website at www.rossendale.gov.uk .

The Annual Treasury Management Strategy Statement and the Treasury Management Practices are reviewed at the Full Council meeting each February and are again available as part of the agenda documents on the Council's website at www.rossendale.gov.uk .

Responsible Section/Team	Finance	Version/Status	2021/22 v1
Responsible Author	Finance Manager	Report submitted to	Full Council
Date Amended now	Feb 2021	Meeting date	24 Feb 2021

TMP 7 BUDGETING, ACCOUNTING AND AUDIT ARRANGEMENTS

7.1 Statutory/Regulatory Requirements

The accounts are drawn up in accordance with the Code of Practice on Local Authority Accounting in Great Britain that is recognised by statute as representing proper accounting practices. The Council has also adopted in full the principles set out in CIPFA's 'Treasury Management in the Public Services - Code of Practice' (the 'CIPFA Code'), together with those of its specific recommendations that are relevant to this Council's treasury management activities.

7.2 Sample Budgets / Accounts / Prudential and Treasury Indicators

The Head of Finance will prepare at least a three year medium term financial plan with Prudential and Treasury Indicators for treasury management which will incorporate the budget for the forthcoming year and provisional estimates for the following two years. This will bring together all the costs involved in running the function, together with associated income. The Head of Finance will exercise effective controls over this budget and monitoring of performance against Prudential and Treasury Indicators, and will report upon and recommend any changes required in accordance with TMP6.

7.3 List of Information Requirements of External Auditors.

- Reconciliation of loans outstanding in the financial ledger to Treasury Management records
- Maturity analysis of loans outstanding
- Certificates for new long term loans taken out in the year
- Reconciliation of loan interest, discounts received and premiums paid to financial ledger by loan type
- Calculation of loans fund interest and debt management expenses
- Details of interest rates applied to internal investments
- Calculation of interest on working balances
- Interest accrual calculation
- Principal and interest charges reports from the ledgers
- Analysis of any deferred charges
- Calculation of loans fund creditors and debtors
- Annual Treasury Report
- Treasury Management Strategy Statement and Prudential and Treasury Indicators
- Review of observance of limits set by Prudential and Treasury Indicators
- Calculation of the Minimum Revenue Provision
- External fund manager(s) valuations including investment income schedules and movement in capital values (if applicable)

7.4 Monthly Budget Monitoring Report

Monthly Budget Monitoring reports are produced for the Head of Finance with quarterly reports to Cabinet. The report is intended to highlight any variances between budgets and spend in order that the Council can assess its financial position. Details of treasury management activities are included within the Cabinet report.

TMP 8 Cash and Cash Flow Management

8.1 Arrangements for Preparing/Submitting Cash Flow Statements

Cash flow projections are prepared annually and updated monthly and daily. The annual and monthly cash flow projections are prepared according to known changes in levels of income and expenditure and also changes in payments and receipts dates. These details are supplemented on an ongoing basis by information received of new or revised amounts to be paid or received as and when they are known.

8.2 Bank Statements Procedures

The Council receives daily bank statements via a daily download of data from its bank. All amounts on the statement are checked to source data from Payroll, Creditors etc.

A formal bank reconciliation is undertaken on a monthly basis by the Finance Team.

8.3 Payment Scheduling and Agreed Terms of Trade With Creditors

Our policy is to pay all creditors as per the agreed terms of trading.

8.4 Arrangements for Monitoring Debtors / Creditors Levels

The Finance Manager is responsible for monitoring the levels of debtors and creditors.

8.5 Procedures for Banking of Funds

All money received by an officer on behalf of the Council will, without unreasonable delay, be passed to the Exchequer Team to deposit in the Council's banking accounts. Cash and cheques banked the previous day will be taken into account in the daily cash flow.

8.6 Practices Concerning Prepayments to Obtain Benefits

The Council has no formal arrangement in place. Where such opportunities arise, the prepayment would be sought and authorised by the Head of Finance.

Date Amended now	Feb 2021	Meeting date	24 Feb 2021
Due for Review	Feb 2022	Page	28

TMP 9 Money Laundering

9.1 Proceeds of Crime Act 2002

Money laundering has the objective of concealing the origin of money generated through criminal activity. Legislation has given a higher profile to the need to report suspicions of money laundering. The Proceeds of Crime Act (POCA) 2002 established the main offences relating to money laundering. In summary, these are:

- concealing, disguising, converting, transferring or removing criminal property from England and Wales, from Scotland or from Northern Ireland
- being concerned in an arrangement which a person knows or suspects facilitates the acquisition, retention, use or control of criminal property
- acquiring, using or possessing criminal property.

These apply to all persons in the UK in a personal and professional capacity. Any person involved in any known or suspected money-laundering activity in the UK risks a criminal conviction. Other offences under the POCA include:

- failure to disclose money-laundering offences
- tipping off a suspect, either directly or indirectly
- doing something that might prejudice an investigation – for example, falsifying a document.

9.2 The Terrorism Act 2000

This act made it an offence of money laundering to become concerned in an arrangement relating to the retention or control of property likely to be used for the purposes of terrorism, or resulting from acts of terrorism. All individuals and businesses in the UK have an obligation to report knowledge, reasonable grounds for belief or suspicion about the proceeds from, or finance likely to be used for, terrorism or its laundering, where it relates to information that comes to them in the course of their business or employment.

9.3 The Money Laundering Regulations 2007, 2012 and 2015

Organisations pursuing relevant business (especially those in the financial services industry regulated by the FSA) are required to appoint a nominated officer and implement internal reporting procedures; train relevant staff in the subject; establish internal procedures with respect to money laundering; obtain, verify and maintain evidence and records of the identity of new clients and transactions undertaken and report their suspicions. In December 2007 the UK Government published the Money Laundering Regulations 2007, which replaced the Money Laundering Regulations 2003.

9.4 Local authorities

Public service organisations and their staff are subject to the full provisions of the Terrorism Act 2000 and subsequent Terrorism Acts and may commit most of the principal offences under the POCA, but are not legally obliged to apply the provisions of the Money Laundering Regulations 2007, 2012 and 2015. However, as responsible public bodies, they should employ policies and procedures which reflect the essence of the UK's anti-terrorist financing, and anti-money laundering, regimes. Accordingly this Council will do the following: -

Responsible Section/Team	Finance	Version/Status	2021/22 v1
Responsible Author	Finance Manager	Report submitted to	Full Council
Date Amended now	Feb 2021	Meeting date	24 Feb 2021
Due for Review	Feb 2022	Page	29

- a) evaluate the prospect of laundered monies being handled by them
- b) determine the appropriate safeguards to be put in place
- c) require every person engaged in treasury management to make themselves aware of their personal and legal responsibilities for money laundering awareness
- d) make all its staff aware of their responsibilities under POCA
- e) appoint a member of staff to whom they can report any suspicions. This person is Head of Finance
- f) in order to ensure compliance is appropriately managed, this Council will require senior management to give appropriate oversight, analysis and assessment of the risks of clients and work/product types, systems for monitoring compliance with procedures and methods of communicating procedures and other information to personnel.
- g) The officer responsible for the creation and monitoring the implementation of a corporate anti money laundering policy and procedures is The Head of Legal and Democratic Services and it shall be a requirement that all services and departments implement this corporate policy and procedures.

9.5 Procedures for Establishing Identity / Authenticity Of Lenders

It is not a requirement under POCA for local authorities to require identification from every person or organisation it deals with. However, in respect of treasury management transactions, there is a need for due diligence and this will be effected by following the procedures below.

The Council does not accept loans from individuals.

All loans are obtained from the PWLB, other local authorities or from authorised institutions under the Financial Services and Markets Act 2000. This register can be accessed through the FSA website on www.fca.gov.uk.

When repaying loans, the procedures in 9.6 will be followed to check the bank details of the recipient.

9.6 Methodologies for Identifying Deposit Takers

In the course of its treasury activities, the Council will only lend money to or invest with those counterparties that are on its approved lending list. These will be local authorities, the PWLB, Bank of England and authorised deposit takers under the Financial Services and Markets Act 2000. The FSA register can be accessed through their website on www.fca.gov.uk.

All transactions will be carried out by BACS or CHAPs for making deposits or repaying loans.

TMP 10 Training and Qualifications

The Council recognises that relevant individuals will need appropriate levels of training in treasury management due to its increasing complexity. There are two categories of relevant individuals: -

- a) Treasury management staff employed by the Council
- b) Members charged with governance of the treasury management function

All treasury management staff should receive appropriate training relevant to the requirements of their duties at the appropriate time. The Council operates a Personal Development Review system which identifies the training requirements of individual members of staff engaged on treasury related activities.

Additionally, training may also be provided on the job and it will be the responsibility of the Head of Finance to ensure that all staff under his / her authority receive the level of training appropriate to their duties. This will also apply to those staff who from time to time cover for absences from the treasury management team.

10.1 Details of Approved Training Courses

Treasury management staff and members will go on courses provided by our treasury management consultants, CIPFA, money brokers etc.

10.2 Records of Training Received by Treasury Staff

The People and Policy department will maintain records on all staff and the training they receive.

10.3 Record of Secondment of Senior Management

Records will be kept of senior management who are seconded into the treasury management section in order to gain firsthand experience of treasury management operations.

10.4 Statement of Professional Practice (SOPP)

1. Where the Chief Financial Officer is a member of CIPFA, there is a professional need for the CFO to be seen to be committed to professional responsibilities through both personal compliance and by ensuring that relevant staff are appropriately trained.
2. All staff involved in treasury management activities must also comply with the SOPP.

10.6 Member training records

Records will be kept of all training in treasury management provided to members.

10.7 Members charged with governance

Members charged with diligence also have a personal responsibility to ensure that they have the appropriate skills and training for their role.

TMP 11 Use of External Service Providers

11.1 Details of Contracts with Service Providers, Including Bankers, Brokers, Consultants, Advisers

This Council will employ the services of other organisations to assist it in the field of treasury management. In particular, it will use external consultants to provide specialist advice in this ever more complex area. However, it will ensure that it fully understands what services are being provided and that they meet the needs of this organisation, especially in terms of being objective and free from conflicts of interest.

It will also ensure that the skills of the in house treasury management team are maintained to a high enough level whereby they can provide appropriate challenge to external advice and can avoid undue reliance on such advice.

Treasury management staff and their senior management will therefore be required to allocate appropriate levels of time to using the following sources of information so that they are able to develop suitable levels of understanding to carry out their duties, especially in challenge and avoiding undue reliance.

- The quality financial press
- Market data
- Information on government support for banks and
- The credit ratings of that government support

11.1.1 Banking Services

- a) Name of supplier of service is the NatWest Bank.
- b) Regulatory status – banking institution authorised to undertake banking activities by the FSA
- c) The branch address is:
28 Bank Street
Rawtenstall
Rossendale
Lancashire
BB4 8TS
Tel :- 0151 802 9354 (Business Banking) or
0845 302 1511 (Branch Banking)
- d) Contract commenced 1992
- e) Cost of service is variable depending on a schedule of tariffs set annually applied to volumes of transactions
- f) Payments are due monthly and quarterly

Date Amended now	Feb 2021	Meeting date	24 Feb 2021
Due for Review	Feb 2022	Page	32

11.1.2 Money-Broking Services

The Council may use money brokers for temporary borrowing and investment and long term borrowing. It will seek to give an even spread of business amongst the approved brokers.

11.1.3 Consultants'/Advisers' Services

Treasury Consultancy Services

The Council will seek to take expert advice on interest rate forecasts, annual treasury management strategy, timing for borrowing and lending, debt rescheduling, use of various borrowing and investment instruments, how to select credit worthy counterparties to put on its approved lending list etc.

The performance of consultants will be reviewed annually by the Head of Finance to check whether performance has met expectations.

- a) Name of supplier of service is Link Treasury Solutions. Their address is 65 Gresham Street, London, EC2V 7NQ
- b) Regulatory status: investment adviser authorised by the FCA
- c) Cost of service in 2020/21 was £7,500.
- d) Payments are due bi-annually in April and October

11.1.4 Procedures and Frequency for Tendering Services

As per the Council's contract procedure rules.

TMP 12 Corporate Governance

12.1.1 List of documents to be made available for public inspection

- a. The Council is committed to the principle of openness and transparency in its treasury management function and in all of its functions.
- b. It has adopted the CIPFA Code of Practice on Treasury management and implemented key recommendations on developing Treasury Management Practices, formulating a Treasury Management Policy Statement and implementing the other principles of the Code.
- c. The following documents are available for public inspection: -
 - Treasury Management Strategy Statement
 - including the Annual Investment Strategy
 - Treasury Management Policy Statement
 - Minimum Revenue Provision Policy Statement
 - Treasury Management monitoring reports produced as part of the Council's regular financial monitoring reports to Cabinet.
 - Annual Statement of Accounts
 - Annual Revenue Budget and MTFS
 - Capital Strategy and 5 Year Capital Programme
 - Minutes of Council / Cabinet / committee meetings
 - Third party expenditure via quarterly corporate spend analysis published on the website to comply with the coalition government's transparency agenda.

Due for Review	Feb 2022	Page	34

TMP 13 Treasury management practices for non-treasury investments

This Council recognises that investments taken for non-treasury management purposes require careful investment management. Such investments include loans supporting service outcomes, investments in subsidiaries, or investment property portfolios.

For Rossendale Borough Council this could include the one-third investment in the Rossendale Together Barnfield Partnership and the land ownership at the Morrisons site in Bacup, the latter being held on the Council's Balance Sheet at a net book value of £550k at the 31st March 2019. During 2020/21 officers will consider these investments and prepare the information suggested below if they are determined to meet the definition of non-treasury investments.

The Council's annual treasury management strategy, Investment Strategy and similar documents will cover all the organisation's investments, and will set out, where relevant, specific policies and arrangements for non-treasury investments.

This schedule will include a summary of existing material investments, subsidiaries, joint ventures and liabilities including financial guarantees and contingent liabilities and the authority's risk exposure. It will be recognised that the risk appetite for these activities may differ from that for treasury management.

CIPFA suggests that authorities should replicate TMP 1-12 under TMP 13, as far as this is relevant, practicable and applicable. It particularly listed TMPs 1, 2, 5, 6, and 10. In this case, clients may feel that non treasury investments should be in a completely separate document to the TMPs covering treasury management.

Information suggested for non-treasury investments:

1.1 Risk management

The cross sectoral guidance notes state that authorities should be clear as to what powers have been used for each non treasury investment. Clients may therefore want to consider drawing up a summary listing of each non-treasury investment and detailing against each one such things as e.g.: -

- Name
- Date investment made
- Cost
- Expected income
- Approval by x committee / full council / officer (if using delegated authority)
- Legal power used
- Purpose e.g. income generation
- Service (where relevant)

This list could be sub divided into various categories e.g.: -

- Service investments
- Commercial investments taken for mainly financial reasons: -

Responsible Section/Team	Finance	Version/Status	2021/22 v1
Responsible Author	Finance Manager	Report submitted to	Full Council
Date Amended now	Feb 2021	Meeting date	24 Feb 2021
Due for Review	Feb 2022	Page	35

- Property inside the local authority area
- Property outside the local authority area
- Investments in subsidiaries
- Investments in authority owned companies
- Council owned commercial / industrial estates
- Loans to other bodies
- Loan guarantees

The cross sectoral guidance notes also suggest that the following should be documented for each investment: -

- The extent to which the capital invested is placed at risk
- The impact of any potential losses on the financial sustainability of the organisation
- Dates for periodic review to take account of changes in market and other conditions.
- Names of officers or title of posts outside of the treasury management team who are responsible for each non treasury investment and periodic monitoring
