RECOMMENDATIONS

Cabinet recommends that Council approves:-

- 1.1. **The Treasury Management Strategy Statement incorporating the Investment Strategy, Investment Indicators and Borrowing Strategy and the Treasury Management Policy and Practises.**
- 1.2. **To delegate any further minor amendments to the Head of Finance in consultation with the Portfolio Holder for Resources.**

2. PURPOSE OF REPORT

The purpose of the report is to obtain Council approval of the updated Treasury Management Strategy Statement (TMS) and Treasury Management Policy and Practises (TMP).

3. BACKGROUND

- 3.1 This is an annual update of the Treasury Management Strategy including the Investment Strategy, Investment Indicators and Borrowing Strategy (Appendix 1) and the Treasury Management Policy and Practices (Appendix 2), based upon the Chartered Institute of Public Finance and Accountancy's (CIPFA) Treasury Management and Prudential Codes 2021.
- 3.2 Treasury management is concerned with how organisations manage their cash resources and its scope covers borrowing, investment and hedging instruments and techniques. Risk is inherent in all treasury management activities and it is necessary to balance risk and return. In the public services it is generally considered that the priority is to protect capital rather than maximize return.
- 3.3 The Treasury Management Strategy for 2022/23 at Appendix 1 is written in conjunction with both the revenue budget for 2022/23 and the Capital Strategy and Capital Programme 2022/23 to 2025/26 which are also being placed before members for consideration, specifically in respect of the TMSS at Appendix 1:
 - Capital Strategy at 1.2.1
 - Capital Expenditure at 2.1 and 5.1.1
 - The Capital Financing Requirement (CFR) at 2.2
 - Minimum Revenue Provision (MRP) and Voluntary Revenue Provision (VRP) at 2.4

- Interest expenditure and income at 5.1.2
- 3.4 The interest rates quoted at paragraphs 3.3 and 5.2 of the strategy reflect the average of samples gathered by Link Asset Services as at the 20th December 2021 from city and non-city forecasters, including HM Treasury. The forecasts are an estimate based on today's financial climate. Whilst forecasters are comparatively confident about their estimates for the coming financial year, those for longer term are far less reliable.
- 3.5 The Treasury Management Strategy Statement covers:
- treasury controls and reporting mechanisms required to limit the treasury risk and activities of the Council
 - the current and expected cash and reserve balances (2.3)
 - the borrowing requirement and borrowing limits (3.1)
 - prospects for interest rates (3.3)
 - policy on borrowing in advance of need (3.5)
 - the investment strategy and expected rates of return (4.4)
 - Prudential Indicators and the MRP strategy (5.1)
 - treasury management scheme of delegation (5.6) and the relevant roles and responsibilities of delegated officers (5.7)
- 3.6 As part of the council's budget-setting work the estimates of future interest rates, capital resources and expenditure and capital financing costs (through the Minimum Revenue Provision) have been included in arriving at a balanced budget for 2022/23.
- 3.7 Members are asked to note the proposed change in Minimum Revenue Provision (MRP) Policy in section 2.4. From April 2022 the Council's Financial Accounts have to be prepared in line with International Financial Reporting Standard (IFRS) 16 (Leases). This means that from April 2022 all operating leases have to be brought onto the Council's balance sheet and treated as assets, the annual MRP charge will be adjusted so that the charge to revenue remains unaffected by the new standard. This is a technical adjustment which will have no impact on the Council's budget.
- 3.8 The Treasury Management Policy and Practices at Appendix 2 provide further operational detail on the plans within the Treasury Management Strategy Statement. For 2022/23 there have been only very minor amendments to the Treasury Management Policy and Practices to cover the works with related parties and subsidiaries and to keep it in line with updates in the TMSS above.
- 3.9 The Treasury Management Practices cover :
- risk management arrangements and techniques
 - performance measurement
 - decision making and operational controls within the day to day administration of treasury and cash flow management
 - measures to prevent money laundering
 - training requirements for staff included within the delegation arrangements in the Treasury Management Strategy Statement
 - further details on the use of external service providers
- 3.10 At times of low interest rates from banks, one alternative use of resources open to the council is the pre-payment of revenue creditors in order to achieve early payment discounts. These transactions are not treated as investments, therefore do not fall under the TMS or TMPs in the appendices attached. However, the same considerations of risk and reward should be considered prior to entering into any such agreement. The Head of

Finance must be sure of the nature and obligation of the future transactions, their expected value and the credit worthiness of the supplier/counterparty involved.

The ongoing impact on the UK from coronavirus as well as the new trading arrangements with the European Union, will remain major influences on the council's treasury management strategy for 2022/23.

4. RISK

4.1 The key risks associated with the strategy include:

- Overpayment of contributions cannot be returned.
- An unexpected increase in bank base rates.
- Agreeing the accounting treatment with external auditors.
- An unexpected reduction in cash balances. Each individual opportunity would be assessed on its own merits and reported to members at the next available opportunity.

4.2 All the issues raised and the recommendations in this report involve risk considerations as set out below:

- Failure to comply with legal statute, Codes of Practice and regulations of the council.
- Financial risks and credit risks exposure as a result of treasury management decisions. The TMS lays the ground rules for balancing the desire to maximize interest earning capacity with the potential risks of investments in the financial sector, especially in the current economic climate.

5. FINANCE

Financial matters are dealt within the report.

6. LEGAL

There are no material implications.

7. POLICY AND EQUALITIES IMPLICATIONS

7.1 Consultation has taken place with the council's treasury management advisors - Link Asset Services.

7.2 Officers have ensured that the documents attached meet the requirements of the current CIPFA revised Treasury Management Code of Practice and revised Prudential Code 2017 by adopting the proforma documents provided by Link Asset Services with only minor adaptations for local considerations.

8. CONCLUSIONS

8.1 Following consideration at Full Council, Members are asked to approve the adoption of the updated Treasury Management Strategy Statement and Treasury Management Policy and Practises, which will ensure continued compliance with the Code and continue to manage the council's exposure to financial risk.

8.2 In light of the current economic climate and resultant changing cash flow requirements, Members are asked to delegate any minor amendments required within year to the Head of Finance in consultation with the Portfolio Holder for Resources.

1.1 Background

The Council is required to operate a balanced budget, which broadly means that cash raised during the year will meet cash expenditure. Part of the treasury management operation is to ensure that this cash flow is adequately planned, with cash being available when it is needed. Surplus monies are invested in low-risk counterparties or instruments commensurate with the Council's low risk appetite, providing adequate liquidity initially before considering investment return.

The second main function of the treasury management service is the funding of the Council's capital plans. These capital plans provide a guide to the borrowing need of the Council, essentially the longer-term cash flow planning, to ensure that the Council can meet its capital spending obligations. This management of longer-term cash may involve arranging long or short-term loans or using longer-term cash flow surpluses. On occasion, when it is prudent and economic, any debt previously drawn may be restructured to meet Council risk or cost objectives.

The contribution the treasury management function makes to the authority is critical, as the balance of debt and investment operations ensure liquidity or the ability to meet spending commitments as they fall due, either on day-to-day revenue or for larger capital projects. The treasury operations will see a balance of the interest costs of debt and the investment income arising from cash deposits affecting the available budget. Since cash balances generally result from reserves and balances, it is paramount to ensure adequate security of the sums invested, as a loss of principal will in effect result in a loss to the General Fund Balance.

CIPFA defines treasury management as:

“The management of the local authority's borrowing, investments and cash flows, its banking, money market and capital market transactions; the effective control of the risks associated with those activities; and the pursuit of optimum performance consistent with those risks.”

The authority has not engaged in any commercial investments and has no non treasury investments.

1.2 Reporting requirements

1.2.1 Capital Strategy

The CIPFA 2021 Prudential and Treasury Management Codes require all local authorities to prepare a capital strategy report which will provide the following:

- a high-level long-term overview of how capital expenditure, capital financing and treasury management activity contribute to the provision of services
- an overview of how the associated risk is managed
- the implications for future financial sustainability

The aim of this capital strategy is to ensure that all elected members on the full council fully understand the overall long-term policy objectives and resulting capital strategy requirements, governance procedures and risk appetite.

Responsible Section/Team	Financial Services	Page	4
Responsible Author	Head of Finance	Version	v1
Date last amended	January 2022	Due for review	Feb 2023

1.2.2 Treasury Management reporting

The Council is currently required to receive and approve, as a minimum, three main treasury reports each year, which incorporate a variety of policies, estimates and actuals.

- a. Prudential and treasury indicators and treasury strategy** (this report) - The first, and most important report is forward looking and covers:
- the capital plans, (including prudential indicators);
 - a minimum revenue provision (MRP) policy, (how residual capital expenditure is charged to revenue over time);
 - the treasury management strategy, (how the investments and borrowings are to be organised), including treasury indicators; and
 - an investment strategy, (the parameters on how investments are to be managed).

This report is required to be adequately reviewed and scrutinised by Cabinet before being recommended for approval by Council.

- b. A mid-year treasury management report** – This is primarily a progress report and will update members on the capital position, amending prudential indicators as necessary, and whether any policies require revision. This is included within each of the Council’s monitoring reports presented to Cabinet quarterly.
- c. An annual treasury report** – This is a backward-looking review document and provides details of a selection of actual prudential and treasury indicators and actual treasury operations compared to the estimates within the strategy. This is included within the Council’s end of year financial monitoring report presented to Cabinet.

1.3 Treasury Management Strategy for 2022/23

The strategy for 2022/23 covers two main areas:

Capital issues

- the capital expenditure plans and the associated prudential indicators;
- the minimum revenue provision (MRP) policy.

Treasury management issues

- the current treasury position;
- treasury indicators which limit the treasury risk and activities of the Council;
- prospects for interest rates;
- the borrowing strategy;
- policy on borrowing in advance of need;
- debt rescheduling;
- the investment strategy;
- creditworthiness policy; and
- the policy on use of external service providers.

Responsible Section/Team	Financial Services	Page	5
Responsible Author	Head of Finance	Version	v1
Date last amended	January 2022	Due for review	Feb 2023

These elements cover the requirements of the Local Government Act 2003, DLUHC Investment Guidance, DLUHC MRP Guidance, the CIPFA Prudential Code and the CIPFA Treasury Management Code.

1.4 Training

The CIPFA Code requires the responsible officer to ensure that members with responsibility for treasury management receive adequate training in treasury management. This especially applies to members responsible for scrutiny. Financial training for members is undertaken annually, typically in June of each year. The training needs of treasury management officers are reviewed annually.

1.5 Treasury management consultants

The Council uses Link Group, Treasury solutions as its external treasury management advisors.

The Council recognises that responsibility for treasury management decisions remains with the organisation at all times and will ensure that undue reliance is not placed upon the services of our external service providers. All decisions will be undertaken with regards to all available information, including, but not solely, our treasury advisers.

It also recognises that there is value in employing external providers of treasury management services in order to acquire access to specialist skills and resources. The Council will ensure that the terms of their appointment and the methods by which their value will be assessed are properly agreed and documented and subjected to regular review.

2 THE CAPITAL PRUDENTIAL INDICATORS 2022/23 – 2025/26

The Prudential and TM Codes require local authorities to undertake financial planning for periods longer than the three years. This minimum period is required for prudential and treasury indicators.

The Council's capital expenditure plans are the key driver of treasury management activity. The output of the capital expenditure plans is reflected in the prudential indicators, which are designed to assist members' overview and confirm capital expenditure plans.

2.1 Capital expenditure and financing

This prudential indicator is a summary of the Council's capital expenditure plans, both those agreed previously, and those forming part of this budget cycle. Members are asked to approve the capital expenditure forecasts:

Table 1

Capital Expenditure	2021/22 £'000	2022/23 £'000	2023/24 £'000	2024/25 £'000	2025/26 £'000	Total Expenditure £'000
Operations & Communities	1,470	1,530	837	674	464	4,975
Corporate Services & Buildings	352	518	230	130	206	1,436
Housing	3,764	1,500	1,500	1,500	1,000	9,264
Regeneration	3,983	1,284	1,010	-	-	6,277
Climate change	250	250	250	250	-	1,000
Sub Total	9,819	5,082	3,827	2,554	1,670	22,952
IFRS16 Leases	-	379	300	72	-	751
Estimated Expenditure	9,819	5,461	4,127	2,626	1,670	23,703

The table below summarises the above capital expenditure plans and how these plans are being financed by capital or revenue resources. Any shortfall of resources results in a funding borrowing need.

Other long-term liabilities - the net financing need below excludes other long-term liabilities, eg leasing arrangements that already include borrowing instruments.

Table 2

Financing of Capital Expenditure	2021/22 £'000	2022/23 £'000	2023/24 £'000	2024/25 £'000	2025/26 £'000	Total Expenditure £'000
Capital Receipts	2,537	200	-	-	-	2,737
Capital Grants	5,512	2,190	2,154	1,000	1,000	11,856
Capital Reserves	-	-	-	-	-	0
Earmarked Reserves	189	107	41	-	-	337
Total in-year resources	8,238	2,497	2,195	1,000	1,000	14,930
Net Financing need for year	1,581	2,964	1,932	1,626	670	8,773

2.2 The Council's borrowing need (the Capital Financing Requirement)

The second prudential indicator is the Council's Capital Financing Requirement (CFR). The CFR is simply the total historic outstanding capital expenditure which has not yet been paid for from either revenue or capital resources. It is essentially a measure of the Council's indebtedness and so its underlying borrowing need.

Responsible Section/Team	Financial Services	Page	7
Responsible Author	Head of Finance	Version	v1
Date last amended	January 2022	Due for review	Feb 2023

Any capital expenditure above, which has not immediately been paid for through a revenue or capital resource, will increase the CFR.

The CFR does not increase indefinitely, as the minimum revenue provision (MRP) is a statutory annual revenue charge which broadly reduces the indebtedness in line with each asset's life, and so charges the economic consumption of capital assets as they are used.

The CFR includes any other long-term liabilities (e.g., finance leases). Whilst these increase the CFR, and therefore the Council's borrowing requirement, these types of schemes include a borrowing facility by the lease provider and so the Council is not required to separately borrow for these schemes.

The Council is asked to approve the CFR projections below:

Table 3

Capital Financing Requirement (CFR)	2020/21 Actual £'000	2021/22 Estimate £'000	2022/23 Estimate £'000	2023/24 Estimate £'000	2024/25 Estimate £'000	2025/26 Estimate £'000
Opening CFR	10,979	13,328	14,433	16,620	17,664	18,511
Movement in CFR	(465)	1,105	2,187	1,044	847	(167)
Closing CFR	10,514	14,433	16,620	17,664	18,511	18,344
Movement in CFR is represented by						
Net Financing need for year		1,581	2,964	1,932	1,626	670
Less MRP repayments	465	476	777	888	779	837
Movement in CFR	(465)	1,105	2,187	1,044	847	(167)

The CFR does not increase indefinitely as the Minimum Revenue Provision (MRP) is a statutory annual revenue charge which broadly reduces the indebtedness in line with each asset's life, and so charges the economic consumption of capital assets as they are used.

The movement in CFR in 2022/23 is £2,187k, which includes the following projects:

- The operational vehicle/equipment replacement plan
- Empty Homes Scheme

Technical accounting changes applicable from 1 April 2022 (IFRS16) require the Council's interest in the Empty Homes Scheme and its lease obligations to be included in its Capital Expenditure plans and CFR calculations, for the 'right of use' of these assets.

2.3 Core funds and expected investment balances

The application of resources (capital receipts, reserves etc.) to either finance capital expenditure or other budget decisions to support the revenue budget will have an ongoing impact on investments unless resources are supplemented each year from new sources (asset sales etc.).

Detailed below are estimates of the year-end balances for each resource and anticipated day-to-day cash flow balances.

Responsible Section/Team	Financial Services	Page	8

Table 4

Year End Resources	2020/21	2021/22	2022/23	2023/24	2024/25	2025/26
	Actual £000	Estimate £000	Estimate £000	Estimate £000	Estimate £000	Estimate £000
General Fund Balance	1,000	1,000	1,000	1,000	1,000	1,000
Earmarked Reserves	11,717	10,371	8,861	6,796	4,877	4,309
Capital Receipts	2,500	400	200	-	-	-
Government Grants Unapplied	1,285	1,206	1,000	1,000	250	100
Additional Resources to fund the MTFS	-	-	(56)	(619)	(666)	(568)
Total Reserves	16,502	12,977	11,005	8,177	5,461	4,841
(Under)/Over Borrowing (see 3.1)	(6,088)	(8,710)	(10,177)	(12,458)	(13,667)	(14,668)
Expected Resources	10,414	4,267	828	(4,281)	(8,206)	(9,827)
Cash Balances	12,657	12,602	5,741	4,860	4,617	3,990
Working Capital*	2,243	8,335	4,913	9,141	12,823	13,817

*Working capital balances shown are estimated year-end; these may be higher mid-year

2.4 Minimum revenue provision (MRP) policy statement

Introduction

Where the Council finances capital expenditure by debt, it must put aside resources to repay that debt in later years. The amount charged to the revenue budget for the repayment of debt is known as Minimum Revenue Provision (MRP), although there has been no statutory minimum since 2008. The Local Government Act 2003 requires the Council to have regard to the Department for Levelling Up, Housing and Communities (DLUHC, formerly Ministry of Housing, Communities and Local Government's Guidance on Minimum Revenue Provision (the then MHCLG Guidance) most recently issued in 2018.

The DLUHC is currently out to consultation for proposed changes to prudent MRP policy and amendments to statutory guidance. Subject to consultation, the proposed timetable is for adoption of any new guidance by 2023/24.

The broad aim of the MHCLG Guidance is to ensure that capital expenditure is financed over a period that is either reasonably commensurate with that over which the capital expenditure provides benefits, or, in the case of borrowing supported by Government Revenue Support Grant, reasonably commensurate with the period implicit in the determination of that grant.

The MHCLG Guidance requires the Council to approve an Annual MRP Statement each year and recommends a number of options for calculating a prudent amount of MRP, but authorities retain flexibility over their determination of what is prudent.

The proposed methodologies for use within Rossendale Borough Council are set out below and reflect the basic principles set out in the guidance, along with some locally determined and prudent modifications to make the MRP more straightforward to calculate.

Proposed MRP Policy Statement for 2021/22

The following MRP Policy is proposed, under guidance issued by the MHCLG is as follows:

Responsible Section/Team	Financial Services	Page	9
Responsible Author	Head of Finance	Version	v1
Date last amended	January 2022	Due for review	Feb 2023

(a) For capital expenditure that is self-financed from debt arising in 2007/08 and thereafter - to charge the expenditure over the expected useful life of the relevant asset ("the Asset Life Method"), but to use the annuity variant, based on the average PWLB annuity rates prevailing in the year of the expenditure (rather than charging on a straight line basis over the asset life).

(b) Where former operating leases have been brought onto the balance sheet on 1st April 2022 due to the adoption of the *IFRS 16 Leases* accounting standard, and the asset values have been adjusted for accruals, prepayments, premiums and/or discounts, then the annual MRP charges will be adjusted so that the total charge to revenue remains unaffected by the new standard.

(c) In those cases where asset lives cannot be readily determined - to use a default period of 20 or 25 years in line with government guidance. However the Council may make its own determination in exceptional circumstances, if the recommendation of the guidance would not be appropriate.

(d) Capital expenditure incurred during each financial year will not be subject to a MRP charge until the following financial year or until the year after the asset becomes operational.

Change in Policy from Previous Years

The Council's approved TMSS for 2021/22 included a change to MRP policy at that time. The only change to the MRP policy for 2022/23 are due to the adoption of IFRS 16 leases and are detailed in (b) above.

Therefore, in the determination of MRP, the Council will be both:

(a) **prudent** - working within the principle that debt be repaid over a period reasonably commensurate with that over which the capital expenditure provides benefits, and

(b) **practical** - making detailed determinations where the impact of the calculation will be material, but allowing a more general approach if that would be reasonable.

MRP Overpayments - A change introduced by the revised MHCLG MRP Guidance was the allowance that any charges made over the statutory minimum revenue provision (MRP), voluntary revenue provision or overpayments, can, if needed, be reclaimed in later years if deemed necessary or prudent. In order for these sums to be reclaimed for use in the budget, this policy must disclose the cumulative overpayment made each year. In 2018/19 the Council made VRP overpayments of £657k

Responsible Section/Team	Financial Services	Page	10
Responsible Author	Head of Finance	Version	v1
Date last amended	January 2022	Due for review	Feb 2023

3 BORROWING

The capital expenditure plans set out in Section 2 provide details of the service activity of the Council. The treasury management function ensures that the Council's cash is organised in accordance with the relevant professional codes, so that sufficient cash is available to meet this service activity and the Council's capital strategy. This will involve both the organisation of the cash flow and, where capital plans require, the organisation of appropriate borrowing facilities. The strategy covers the relevant treasury / prudential indicators, the current and projected debt positions and the annual investment strategy.

3.1 Current portfolio position

The overall treasury management portfolio as at 31 March 21 and for the position as at 31 December 2021 are shown below for both borrowing and investments.

Table 5

	31/03/2021 Actual £000	31/12/2021 Current Portfolio £000
External Borrowing:		
Public Works Loan Board Loan 1	2,576	2,484
Public Works Loan Board Loan 2	1,850	1,800
Total External Borrowing	4,426	4,284
Treasury Investments:		
Nat West SIBA	907	5,184
Handelsbanken Instant	750	2,750
Handelsbanken 35 Day	5,000	5,000
Lloyds Treasury Call Account	6,000	8,000
Total Treasury Investments	12,657	20,934
Net Borrowing / (Lending)	(8,231)	(16,650)

The Council's forward projections for borrowing are summarised below. The table shows the actual external debt, against the underlying capital borrowing need, (the Capital Financing Requirement - CFR), highlighting any over or under borrowing.

Debt at 31st March	4,426	5,723	8,339	9,837	10,986	11,115
Original PWLB Loan	2,576	2,392	2,208	2,024	1,840	1,656
Futures Park Plot 5	1,850	1,750	1,650	1,550	1,450	1,350
Estimated New Debt		1,581	2,585	1,632	1,554	670
Capital financing Requirement (CFR)	10,514	14,433	16,620	17,664	18,511	18,344
Under / (over) Borrowing	6,088	8,710	10,177	12,458	13,667	14,668

Within the range of prudential indicators there are a number of key indicators to ensure that the Council operates its activities within well-defined limits. One of these is that the Council needs to ensure that its gross debt does not, except in the short term, exceed the total of the CFR in the preceding year plus the estimates of any additional CFR for 2022/23 and the following two financial years. This allows some flexibility for limited early borrowing for future years but ensures that borrowing is not undertaken for revenue or speculative purposes.

The Head of Finance reports that the Council complied with this prudential indicator in the current year and does not envisage difficulties for the future. This view takes into account current commitments, existing plans, and the proposals in this budget report.

Responsible Section/Team	Financial Services	Page	12

3.2 Treasury Indicators: limits to borrowing activity

The operational boundary. This is the limit beyond which external debt is not normally expected to exceed. In most cases, this would be a similar figure to the CFR, but may be lower or higher depending on the levels of actual debt and the ability to fund under-borrowing by other cash resources.

Table 7

Operational Boundary	2020/21 £000	2021/22 £000	2022/23 £000	2023/24 £000	2024/25 £000	2025/26 £000
Total External Debt	20,750	16,100	18,400	18,700	19,500	19,300

The authorised limit for external debt. This is a key prudential indicator and represents a control on the maximum level of borrowing. This represents a legal limit beyond which external debt is prohibited, and this limit needs to be set or revised by the full Council. It reflects the level of external debt which, while not desired, could be afforded in the short term, but is not sustainable in the longer term.

1. This is the statutory limit determined under section 3 (1) of the Local Government Act 2003. The Government retains an option to control either the total of all councils' plans, or those of a specific council, although this power has not yet been exercised.
2. The Council is asked to approve the following authorised limit:

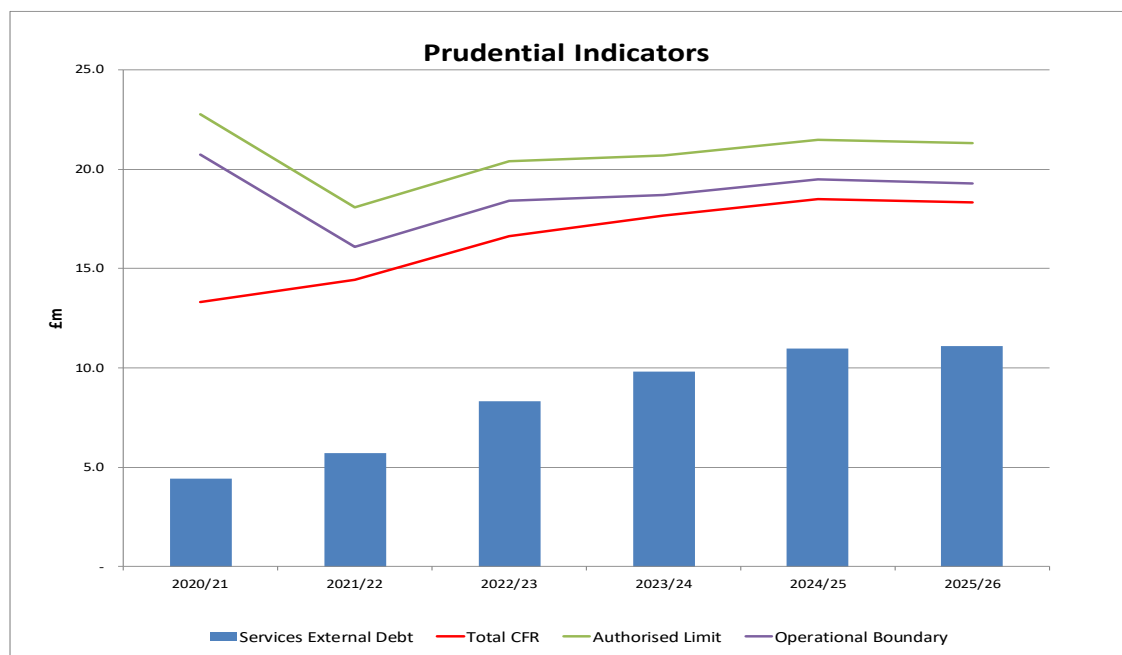

Table 8

Authorised Limit	2020/21 £000	2021/22 £000	2022/23 £000	2023/24 £000	2024/25 £000	2025/26 £000
Total External Debt	22,750	18,100	20,400	20,700	21,500	21,300

Responsible Section/Team	Financial Services	Page	13
Responsible Author	Head of Finance	Version	v1
Date last amended	January 2022	Due for review	Feb 2023

In graphical terms the relationship between the total CFR, the current external borrowing and the suggested authorised limits and operational boundaries can be shown below. The prudent level of future potential borrowing is clearly visible as the gap between the forecast CFR and the current and future estimated borrowing levels.

Table 9

3.3 Prospects for interest rates

The Council has appointed Link Group as its treasury advisor and part of their service is to assist the Council to formulate a view on interest rates. Link provided the following forecasts on 7th February 2022. These are forecasts for certainty rates, gilt yields plus 80 bps.

Table 10

Link Group Interest Rate View 7.2.22													
	Mar-22	Jun-22	Sep-22	Dec-22	Mar-23	Jun-23	Sep-23	Dec-23	Mar-24	Jun-24	Sep-24	Dec-24	Mar-25
BANK RATE	0.75	1.00	1.00	1.25	1.25	1.25	1.25	1.25	1.25	1.25	1.25	1.25	1.25
3 month av. earnings	0.80	1.00	1.00	1.20	1.20	1.20	1.20	1.20	1.20	1.20	1.20	1.20	1.20
6 month av. earnings	1.00	1.10	1.20	1.30	1.30	1.30	1.30	1.30	1.30	1.30	1.30	1.30	1.30
12 month av. earnings	1.40	1.50	1.60	1.70	1.70	1.60	1.60	1.50	1.40	1.40	1.40	1.40	1.40
5 yr PWB	2.20	2.30	2.30	2.30	2.30	2.30	2.30	2.30	2.30	2.30	2.30	2.30	2.30
10 yr PWB	2.30	2.40	2.40	2.40	2.40	2.40	2.40	2.40	2.40	2.40	2.40	2.40	2.40
25 yr PWB	2.40	2.50	2.50	2.60	2.60	2.60	2.60	2.60	2.60	2.60	2.60	2.60	2.60
50 yr PWB	2.20	2.30	2.30	2.40	2.40	2.40	2.40	2.40	2.40	2.40	2.40	2.40	2.40

Additional notes by Link on this forecast table: -

- *LIBOR and LIBID rates will cease from the end of 2021. Work is currently progressing to replace LIBOR with a rate based on SONIA (Sterling Overnight Index Average). In the meantime, our forecasts are based on expected average earnings by local authorities for 3 to 12 months.*
- *Our forecasts for average earnings are averages i.e., rates offered by individual banks may differ significantly from these averages, reflecting their different needs for borrowing short term cash at any one point in time.*

Over the last two years, the coronavirus outbreak has done huge economic damage to the UK and to economies around the world. After the Bank of England took emergency action in March 2020 to cut Bank Rate to 0.10%, it left Bank Rate unchanged at its subsequent meetings until raising it to 0.25% at its meeting on 16th December 2021.

As shown in the forecast table above, the forecast for Bank Rate now includes four increases, one in December 2021 to 0.25%, then quarter 2 of 2022 to 0.50%, quarter 1 of 2023 to 0.75%, quarter 1 of 2024 to 1.00% and, finally, one in quarter 1 of 2025 to 1.25%.

Significant risks to the forecasts

- **Mutations** of the virus render current vaccines ineffective, and tweaked vaccines to combat these mutations are delayed, or cannot be administered fast enough to prevent further lockdowns. 25% of the population not being vaccinated is also a significant risk to the NHS being overwhelmed and lockdowns being the only remaining option.
- **Labour and supply shortages** prove more enduring and disruptive and depress economic activity.
- **The Monetary Policy Committee** acts too quickly, or too far, over the next three years to raise Bank Rate and causes UK economic growth, and increases in inflation, to be weaker than we currently anticipate.

Responsible Section/Team	Financial Services	Page	15
Responsible Author	Head of Finance	Version	v1
Date last amended	January 2022	Due for review	Feb 2023

- **The Monetary Policy Committee** tightens monetary policy too late to ward off building inflationary pressures.
- **The Government** acts too quickly to cut expenditure to balance the national budget.
- **UK / EU trade arrangements** – if there was a major impact on trade flows and financial services due to complications or lack of co-operation in sorting out significant remaining issues.
- **Longer term US treasury yields** rise strongly and pull gilt yields up higher than forecast.
- **Major stock markets** e.g., in the US, become increasingly judged as being over-valued and susceptible to major price corrections. Central banks become increasingly exposed to the “moral hazard” risks of having to buy shares and corporate bonds to reduce the impact of major financial market selloffs on the general economy.
- **Geopolitical risks**, for example in Ukraine, Iran, North Korea, but also in Europe and Middle Eastern countries; on-going global power influence struggles between Russia/China/US. These could lead to increasing safe-haven flows.

The balance of risks to the UK economy: -

- The overall balance of risks to economic growth in the UK is now to the downside, including risks from Covid and its variants - both domestically and their potential effects worldwide.

Forecasts for Bank Rate

It is not expected that Bank Rate will go up fast after the initial rate rise as the supply potential of the economy is not likely to have taken a major hit during the pandemic: it should, therefore, be able to cope well with meeting demand after supply shortages subside over the next year, without causing inflation to remain elevated in the medium-term, or to inhibit inflation from falling back towards the MPC’s 2% target after the spike up to around 5%. The forecast includes four increases in Bank Rate over the three-year forecast period to March 2025, ending at 1.25%. However, it is likely that these forecasts will need changing within a relatively short timeframe for the following reasons: -

- We do not know how severe an impact Omicron could have on the economy and whether there will be another lockdown or similar and, if there is, whether there would be significant fiscal support from the Government for businesses and jobs.
- There were already increasing grounds for viewing the economic recovery as running out of steam during the autumn and now into the winter. And then along came Omicron to pose a significant downside threat to economic activity. This could lead into stagflation, or even into recession, which would then pose a dilemma for the MPC as to whether to focus on combating inflation or supporting economic growth through keeping interest rates low.
- Will some current key supply shortages spill over into causing economic activity in some sectors to take a significant hit?

Responsible Section/Team	Financial Services	Page	16
Responsible Author	Head of Finance	Version	v1
Date last amended	January 2022	Due for review	Feb 2023

- Rising gas and electricity prices in October and next April and increases in other prices caused by supply shortages and increases in taxation next April, are already going to deflate consumer spending power without the MPC having to take any action on Bank Rate to cool inflation.
- On the other hand, consumers are sitting on over £160bn of excess savings left over from the pandemic so when will they spend this sum, in part or in total?
- It looks as if the economy coped well with the end of furlough on 30th September. It is estimated that there were around 1 million people who came off furlough then and there was not a huge spike up in unemployment. The other side of the coin is that vacancies have been hitting record levels so there is a continuing acute shortage of workers. This is a potential danger area if this shortage drives up wages which then feed through into producer prices and the prices of services i.e., a second-round effect that the MPC would have to act against if it looked like gaining significant momentum.
- We also recognise there could be further nasty surprises on the Covid front beyond the Omicron mutation.
- If the UK invokes article 16 of the Brexit deal over the dislocation in trading arrangements with Northern Ireland, this has the potential to end up in a no-deal Brexit.

In summary, with the high level of uncertainty prevailing on several different fronts, we expect to have to revise our forecasts again - in line with whatever the new news is.

It should also be borne in mind that Bank Rate being cut to 0.25% and then to 0.10%, were emergency measures to deal with the Covid crisis hitting the UK in March 2020. At any time, the MPC could decide to simply take away such emergency cuts on no other grounds than they are no longer warranted, and as a step forward in the return to normalisation. In addition, any Bank Rate under 1% is both highly unusual and highly supportive of economic growth.

Forecasts for PWLB rates and gilt and treasury yields

Since the start of 2021, we have seen a lot of volatility in gilt yields, and hence PWLB rates. As the interest forecast table for PWLB certainty rates above shows, there is forecast to be a steady, but slow, rise in both Bank Rate and gilt yields during the forecast period to March 2025, though there will doubtless be a lot of unpredictable volatility during this forecast period.

While monetary policy in the UK will have a major impact on gilt yields, there is also a need to consider the potential impact that rising treasury yields in America could have on our gilt yields. **As an average since 2011, there has been a 75% correlation between movements in US 10-year treasury yields and UK 10-year gilt yields. This is a significant UPWARD RISK exposure to our forecasts for longer term PWLB rates. However, gilt yields and treasury yields do not always move in unison.**

US treasury yields. During the first part of 2021, US President Biden's, and the Democratic party's, determination to push through a \$1.9trn (equivalent to 8.8% of GDP) fiscal boost for the US economy as a recovery package from the Covid pandemic was what unsettled financial markets. However, this was in addition to the \$900bn support package already passed in December 2020. This was then followed by

Responsible Section/Team	Financial Services	Page	17
Responsible Author	Head of Finance	Version	v1
Date last amended	January 2022	Due for review	Feb 2023

additional Democratic ambition to spend \$1trn on infrastructure, (which was eventually passed by both houses later in 2021), and an even larger sum on an American families plan over the next decade; this is still caught up in Democrat / Republican haggling. Financial markets were alarmed that all this stimulus was happening at a time when: -

1. A fast vaccination programme had enabled a rapid opening up of the economy during 2021.
2. The economy was growing strongly during the first half of 2021 although it has weakened overall during the second half.
3. It started from a position of little spare capacity due to less severe lockdown measures than in many other countries.
4. And the Fed was still providing substantial stimulus through monthly QE purchases during 2021.

It was not much of a surprise that a combination of these factors would eventually cause an excess of demand in the economy which generated strong inflationary pressures. This has eventually been recognised by the Fed at its December meeting with an aggressive response to damp inflation down during 2022 and 2023.

At its 3rd November Fed meeting, the Fed decided to make a start on tapering its \$120bn per month of QE purchases so that they ended next June. However, at its **15th December meeting** it doubled the pace of tapering so that they will end all purchases in February. These purchases are currently acting as downward pressure on treasury yields and so it would be expected that Treasury yields will rise over the taper period and after the taper ends, all other things being equal. The Fed also forecast that it expected there would be three rate rises in 2022 of 0.25% from near zero currently, followed by three in 2023 and two in 2024, taking rates back above 2% to a neutral level for monetary policy.

There are also possible **DOWNSIDE RISKS** from the huge sums of cash that the UK populace have saved during the pandemic; when savings accounts earn little interest, it is likely that some of this cash mountain could end up being invested in bonds and so push up demand for bonds and support their prices i.e., this would help to keep their yields down. How this will interplay with the Bank of England eventually getting round to not reinvesting maturing gilts and then later selling gilts, will be interesting to monitor.

There is likely to be **exceptional volatility and unpredictability in respect of gilt yields and PWLB rates** due to the following factors: -

- How strongly will changes in gilt yields be correlated to changes in US treasury yields (see below). Over 10 years since 2011 there has been an average 75% correlation between movements in US treasury yields and gilt yields. However, from time to time these two yields can diverge. Lack of spare economic capacity and rising inflationary pressures are viewed as being much greater dangers in the US than in the UK. This could mean that central bank rates will end up rising earlier and higher in the US than in the UK if inflationary pressures were to escalate; the consequent increases in treasury yields could well spill over to cause (lesser) increases in gilt yields. There is, therefore, an upside risk to forecasts for gilt yields due to this correlation. The Link Group forecasts have included a risk of a 75% correlation between the two yields.
- Will the Fed take action to counter increasing treasury yields if they rise beyond a yet unspecified level?
- Would the MPC act to counter increasing gilt yields if they rise beyond a yet unspecified level?
- How strong will inflationary pressures actually turn out to be in both the US and the UK and so put upward pressure on treasury and gilt yields?

Responsible Section/Team	Financial Services	Page	18
Responsible Author	Head of Finance	Version	v1
Date last amended	January 2022	Due for review	Feb 2023

- How will central banks implement their new average or sustainable level inflation monetary policies?
- How well will central banks manage the withdrawal of QE purchases of their national bonds i.e., without causing a panic reaction in financial markets as happened in the “taper tantrums” in the US in 2013?
- Will exceptional volatility be focused on the short or long-end of the yield curve, or both?

As the US financial markets are, by far, the biggest financial markets in the world, any upward trend in treasury yields will invariably impact and influence financial markets in other countries. Inflationary pressures and erosion of surplus economic capacity look much stronger in the US compared to those in the UK, which would suggest that Fed rate increases eventually needed to suppress inflation, are likely to be faster and stronger than Bank Rate increases in the UK. This is likely to put upward pressure on treasury yields which could then spill over into putting upward pressure on UK gilt yields.

The forecasts are also predicated on an assumption that there is no break-up of the Eurozone or EU within the forecasting period, despite the major challenges that are looming up, and that there are no major ructions in international relations, especially between the US and Russia, China / North Korea and Iran, which have a major impact on international trade and world GDP growth.

The balance of risks to medium to long term PWLB rates: -

- There is a balance of upside risks to forecasts for medium to long term PWLB rates.

A new era for local authority investing – a fundamental shift in central bank monetary policy

One of the key results of the pandemic has been a fundamental rethinking and shift in monetary policy by major central banks like the Fed, the Bank of England and the ECB, to tolerate a higher level of inflation than in the previous two decades when inflation was the prime target to bear down on so as to stop it going above a target rate. There is now also a greater emphasis on other targets for monetary policy than just inflation, especially on ‘achieving broad and inclusive “maximum” employment in its entirety’ in the US, before consideration would be given to increasing rates.

- The Fed in America has gone furthest in adopting a monetary policy based on a clear goal of allowing the inflation target to be symmetrical, (rather than a ceiling to keep under), so that inflation averages out the dips down and surges above the target rate, over an unspecified period of time.
- The Bank of England has also amended its target for monetary policy so that inflation should be ‘sustainably over 2%’ before starting on raising Bank Rate and the ECB now has a similar policy.
- **For local authorities, this means that investment interest rates and very short term PWLB rates will not be rising as quickly or as high as in previous decades when the economy recovers from a downturn and the recovery eventually runs out of spare capacity to fuel continuing expansion.**
- Labour market liberalisation since the 1970s has helped to break the wage-price spirals that fuelled high levels of inflation and has now set inflation on a lower path which makes this shift in monetary policy practicable. In addition, recent changes in flexible employment practices, the rise of the gig economy and technological changes, will all help to lower inflationary pressures.

Responsible Section/Team	Financial Services	Page	19
Responsible Author	Head of Finance	Version	v1
Date last amended	January 2022	Due for review	Feb 2023

- Governments will also be concerned to see interest rates stay lower as every rise in central rates will add to the cost of vastly expanded levels of national debt; (in the UK this is £21bn for each 1% rise in rates). On the other hand, higher levels of inflation will help to erode the real value of total public debt.

Investment and borrowing rates

- **Investment returns** are expected to improve in 2022/23. However, while markets are pricing in a series of Bank Rate hikes, actual economic circumstances may see the MPC fall short of these elevated expectations.
- **Borrowing interest rates** fell to historically very low rates as a result of the COVID crisis and the quantitative easing operations of the Bank of England and still remain at historically low levels. The policy of avoiding new borrowing by running down spare cash balances has served local authorities well over the last few years.
- On 25.11.20, the Chancellor announced the conclusion to the review of margins over gilt yields for PWLB rates which had been increased by 100 bps in October 2019. The standard and certainty margins were reduced by 100 bps but a prohibition was introduced to deny access to borrowing from the PWLB for any local authority which had purchase of assets for yield in its three-year capital programme. The current margins over gilt yields are as follows: -
 - **PWLB Standard Rate** is gilt plus 100 basis points (G+100bps)
 - **PWLB Certainty Rate** is gilt plus 80 basis points (G+80bps)
 - **PWLB HRA Standard Rate** is gilt plus 100 basis points (G+100bps)
 - **PWLB HRA Certainty Rate** is gilt plus 80bps (G+80bps)
 - **Local Infrastructure Rate** is gilt plus 60bps (G+60bps)
- **Borrowing for capital expenditure.** Our long-term (beyond 10 years), forecast for Bank Rate is 2.00%. As some PWLB certainty rates are currently below 2.00%, there remains value in considering long-term borrowing from the PWLB where appropriate. Temporary borrowing rates are likely, however, to remain near Bank Rate and may also prove attractive as part of a balanced debt portfolio.
- While this authority will not be able to avoid borrowing to finance new capital expenditure, due to the rundown of reserves, there will be a *cost of carry*, (the difference between higher borrowing costs and lower investment returns), to any new borrowing that causes a temporary increase in cash balances, but a likely 'net' revenue cost.

3.4 Borrowing strategy

The Council is currently maintaining an under-borrowed position. This means that the capital borrowing need, (the Capital Financing Requirement), has not been fully funded with loan debt as cash supporting the Council's reserves, balances and cash flow has been used as a temporary measure. This strategy is prudent as investment returns are low and counterparty risk is still an issue that needs to be considered.

Against this background and the risks within the economic forecast, caution will be adopted with the 2022/23 treasury operations. The Head of Finance will monitor interest rates in financial markets and adopt a pragmatic approach to changing circumstances:

- *if it was felt that there was a significant risk of a sharp FALL in borrowing rates, then borrowing will be postponed.*

Responsible Section/Team	Financial Services	Page	20
Responsible Author	Head of Finance	Version	v1
Date last amended	January 2022	Due for review	Feb 2023

- *if it was felt that there was a significant risk of a much sharper RISE in borrowing rates than that currently forecast*, perhaps arising from an acceleration in the rate of increase in central rates in the USA and UK, an increase in world economic activity, or a sudden increase in inflation risks, then the portfolio position will be re-appraised. Most likely, fixed rate funding will be drawn whilst interest rates are lower than they are projected to be in the next few years.

Any decisions will be reported to Cabinet at the next available opportunity.

3.5 Policy on borrowing in advance of need

The Council will not borrow more than or in advance of its needs purely in order to profit from the investment of the extra sums borrowed. Any decision to borrow in advance will be within forward approved Capital Financing Requirement estimates and will be considered carefully to ensure that value for money can be demonstrated and that the Council can ensure the security of such funds.

Borrowing in advance will be made within the constraints that:

- It will be limited to no more than 100% of the expected increase in borrowing need (CFR) over the three-year planning period; and
- The authority would not look to borrow more than 18 months in advance of need.

Risks associated with any borrowing in advance activity will be subject to prior appraisal and subsequent reporting through the mid-year or annual reporting mechanism.

3.6 Approved sources of long- and short-term borrowing

The approved sources of long-term and short-term borrowing are:

- Public Works Loan Board (PWLB) and any successor body
- Any institution approved for investments
- Any other bank or building society authorised to operate in the UK
- Any other UK public sector body
- UK public and private sector pension funds (except Lancashire County Pension Fund as it is the Council's own pension fund)
- Capital market bond investors
- UK Municipal Bonds Agency plc and other special purpose companies created to enable local authority bond issues

Other sources of debt finance: In addition, capital finance may be raised by the following methods that are not borrowing, but may be classed as debt liabilities:

- Leasing
- Hire purchase
- Sale and leaseback and similar arrangements

4 ANNUAL INVESTMENT STRATEGY

4.1 Investment policy – management of risk

The Department of Levelling Up, Housing and Communities (DLUHC - this was formerly the Ministry of Housing, Communities and Local Government (MHCLG)) and CIPFA have extended the meaning of 'investments' to include both financial and non-financial investments. This report deals solely with treasury (financial) investments, (as managed by the treasury management team). Non-financial investments, essentially the purchase of income yielding assets, are covered in the Capital Strategy, (a separate report).

The Council's investment policy has regard to the following: -

- DLUHC's Guidance on Local Government Investments ("the Guidance")
- CIPFA Treasury Management in Public Services Code of Practice and Cross Sectoral Guidance Notes 2021 ("the Code")
- CIPFA Treasury Management Guidance Notes 2018

The Council's investment priorities will be security first, portfolio liquidity second and then yield, (return). The Council will aim to achieve the optimum return (yield) on its investments commensurate with proper levels of security and liquidity and within the Council's risk appetite. In the current economic climate, it is considered appropriate to keep investments short term to cover cash flow needs. However, where appropriate (from an internal as well as external perspective), the Council will also consider the value available in periods up to 12 months with high credit rated financial institutions.

The above guidance from the DLUHC and CIPFA places a high priority on the management of risk. This authority has adopted a prudent approach to managing risk and defines its risk appetite by the following means: -

1. Minimum acceptable **credit criteria** are applied in order to generate a list of highly creditworthy counterparties. This also enables diversification and thus avoidance of concentration risk. The key ratings used to monitor counterparties are the short term and long-term ratings.
2. **Other information:** ratings will not be the sole determinant of the quality of an institution; it is important to continually assess and monitor the financial sector on both a micro and macro basis and in relation to the economic and political environments in which institutions operate. The assessment will also take account of information that reflects the opinion of the markets. To achieve this consideration the Council will engage with its advisors to maintain a monitor on market pricing such as "**credit default swaps**" and overlay that information on top of the credit ratings.
3. **Other information sources** used will include the financial press, share price and other such information pertaining to the financial sector in order to establish the most robust scrutiny process on the suitability of potential investment counterparties.
4. This authority has defined the list of **types of investment instruments** that the treasury management team are authorised to use. There are two lists in appendix 5.4 under the categories of 'specified' and 'non-specified' investments.

Responsible Section/Team	Financial Services	Page	22
Responsible Author	Head of Finance	Version	v1
Date last amended	January 2022	Due for review	Feb 2023

Regular reporting of investment performance will be undertaken throughout the year and be reported to Cabinet, quarterly.

Changes in risk management policy from last year.

The above criteria are unchanged from last year.

4.2 Creditworthiness policy

The primary principle governing the Council's investment criteria is the security of its investments, although the yield or return on the investment is also a key consideration. After this main principle, the Council will ensure that:

- It maintains a policy covering both the categories of investment types it will invest in, criteria for choosing investment counterparties with adequate security, and monitoring their security. This is set out in the specified and non-specified investment sections below; and
- It has sufficient liquidity in its investments. For this purpose, it will set out procedures for determining the maximum periods for which funds may prudently be committed. These procedures also apply to the Council's prudential indicators covering the maximum principal sums invested.

The Head of Finance will maintain a counterparty list in compliance with the following criteria and will revise the criteria and submit them to Council for approval as necessary. These criteria are separate to that which determines which types of investment instrument are either specified or non-specified as it provides an overall pool of counterparties considered high quality which the Council may use, rather than defining what types of investment instruments are to be used.

Credit rating information is supplied by the Link Group, our treasury advisors, on all active counterparties that comply with the criteria below. Any counterparty failing to meet the criteria would be omitted from the counterparty (dealing) list. Any rating changes, rating Watches (notification of a likely change), rating Outlooks (notification of the longer-term bias outside the central rating view) are provided to officers almost immediately after they occur, and this information is considered before dealing. For instance, a negative rating Watch applying to counterparty at the minimum Council criteria will be suspended from use, with all others being reviewed in light of market conditions.

The criteria for providing a pool of high-quality investment counterparties, (both specified and non-specified investments) is:

- Banks 1 - good credit quality – the Council will only use banks which:
 - i. are UK banks; and/or
 - ii. are non-UK and domiciled in a country which has a minimum sovereign Long-Term rating of AAA
 and have, as a minimum, the following Fitch, Moody's and Standard & Poor's credit ratings (where rated):
 - i. Short Term – F1
 - ii. Long Term – A
- Banks 2 – Part nationalised UK bank – Royal Bank of Scotland ring-fenced operations. This bank can be included provided they continue to be part nationalised or meet the ratings in Banks 1 above.

Responsible Section/Team	Financial Services	Page	23
Responsible Author	Head of Finance	Version	v1
Date last amended	January 2022	Due for review	Feb 2023

- Banks 3 – The Council’s own banker for transactional purposes if the bank falls below the above criteria, although in this case balances will be minimised in both monetary size and time invested.
- Bank subsidiary and treasury operation -. The Council will use these where the parent bank has provided an appropriate guarantee or has the necessary ratings outlined above.
- Money Market Funds (MMFs) – using only those with AAA long term rating backed up with lowest volatility rating
- UK Government (including gilts, Treasury Bills and the DMADF)
- Local authorities, parish councils etc
- Housing associations
- Rossendale Leisure Trust to a maximum of £100k
- Other related parties (where a charge can be placed on land or equity to preserve the Councils right to its resources)

Use of additional information other than credit ratings. Additional requirements under the Code require the Council to supplement credit rating information. Whilst the above criteria rely primarily on the application of credit ratings to provide a pool of appropriate counterparties for officers to use, additional operational market information will be applied before making any specific investment decision from the agreed pool of counterparties. This additional market information (for example Credit Default Swaps, rating Watches/Outlooks) will be applied to compare the relative security of differing investment opportunities.

All investments will be made for less than 365 days ie short-term. The proposed criteria for specified and non-specified investments are shown in Appendix 5.4 for approval.

Creditworthiness.

Significant levels of downgrades to short- and long-term credit ratings have not materialised since the crisis in March 2020. In the main, where they did change, any alterations were limited to Outlooks. However, as economies are beginning to reopen, there have been some instances of previous lowering of Outlooks being reversed.

CDS prices

Although bank CDS prices (these are market indicators of credit risk) spiked upwards at the end of March / early April 2020 due to the heightened market uncertainty and ensuing liquidity crisis that affected financial markets, they have returned to more average levels since then. However, sentiment can easily shift, so it will remain important to undertake continual monitoring of all aspects of risk and return in the current circumstances. Link monitor CDS prices as part of their creditworthiness service to local authorities and the Council has access to this information via its Link-provided Passport portal.

4.3 Other limits

Due care will be taken to consider the exposure of the Council's total investment portfolio to non-specified investments, countries, groups and sectors.

4.4 Investment strategy

In-house funds. Investments will be made with reference to the core balance and cash flow requirements and the outlook for short-term interest rates (i.e., rates for investments up to 12 months).

Greater returns are usually obtainable by investing for longer periods. While most cash balances are required in order to manage working capital and commitments as they fall due, where cash sums can be identified that could be invested for longer periods, the value to be obtained from longer term investments will be carefully assessed.

- If it is thought that Bank Rate is likely to rise significantly within the time horizon being considered, then consideration will be given to keeping most investments as being short term or variable.
- Conversely, if it is thought that Bank Rate is likely to fall within that time period, consideration will be given to locking in higher rates currently obtainable, for longer periods.

4.5 Investment returns expectations.

The current forecast shown in paragraph 3.3, includes a forecast for a first increase in Bank Rate in May 2022, though it could come in February 2022.

The suggested budgeted investment earnings rates for returns on investments placed for periods up to three months during each financial year, (based on a first increase in Bank Rate in quarter 2 of 2022), are as follows. The Council's internal view, taking a prudent approach to investment returns contained in its MTFS, and use of simple financial instruments, are provided for comparison:

Table 11

Average earnings in each year	Link	RBC View
2022/23	0.50%	0.25%
2023/24	0.75%	0.50%
2024/25	1.25%	0.75%
2025/26	1.25%	0.75%
Long term later years	2.00%	2.00%

5.1 THE CAPITAL PRUDENTIAL AND TREASURY INDICATORS 2022/23 – 2025/26

The Council's capital expenditure plans are the key driver of treasury management activity. The output of the capital expenditure plans is reflected in the prudential indicators, which are designed to assist members' overview and confirm capital expenditure plans.

5.1.1 Capital expenditure

The Capital expenditure plans are the key driver of treasury management activity. The output of the capital expenditure plans is reflected in the prudential indicators, which are designed to assist members' overview and confirm capital expenditure plans.

Table 13

Capital Expenditure	2021/22 £'000	2022/23 £'000	2023/24 £'000	2024/25 £'000	2025/26 £'000	Total Expenditure £'000

5.1.2 Affordability prudential indicators

The previous sections cover the overall capital and control of borrowing prudential indicators, but within this framework prudential indicators are required to assess the affordability of the capital investment plans. These provide an indication of the impact of the capital investment plans on the Council's overall finances. The Council is asked to approve the following indicators:

Ratio of financing costs to net revenue stream

This indicator identifies the trend in the cost of capital, (borrowing and other long-term obligation costs net of investment income), against the net revenue stream.

Table 14

Ratio of financing costs to net revenue stream	2020/21 Actual £000	2021/22 Estimate £000	2022/23 Estimate £000	2023/24 Estimate £000	2024/25 Estimate £000	2025/26 Estimate £000
Interest Payable - Services	150	138	164	210	233	276
Interest Receivable	(11)	(10)	(12)	(13)	(14)	(15)
Net cost of capital	139	128	152	197	219	261
Net Revenue Stream	8,220	8,903	8,991	9,148	9,362	9,435
Ratio of financing costs to net revenue stream	1.69%	1.44%	1.69%	2.15%	2.34%	2.77%

The estimates of financing costs include current commitments and the proposals in this budget report.

5.1.3 Maturity structure of borrowing

Maturity structure of borrowing. These gross limits are set to reduce the Council's exposure to large, fixed rate sums falling due for refinancing, and are required for upper and lower limits.

The Council is asked to approve the following treasury indicators and limits:

Table 15

Maturity structure of fixed interest rate borrowing 2022/23		
	Lower	Upper
Under 12 months	0%	40%
12 months to 2 years	0%	50%
2 years to 5 years	0%	50%
5 years to 10 years	0%	60%
10 years and above	0%	100%
Maturity structure of variable interest rate borrowing 2022/23		
	Lower	Upper
Under 12 months	0%	0%
12 months to 2 years	0%	0%
2 years to 5 years	0%	0%
5 years to 10 years	0%	0%
10 years and above	0%	0%

5.1.4. Control of interest rate exposure

5.3 ECONOMIC BACKGROUND

COVID-19 vaccines.

These were the game changer during 2021 which raised high hopes that life in the UK would be able to largely return to normal in the second half of the year. However, the bursting onto the scene of the Omicron mutation at the end of November, rendered the initial two doses of all vaccines largely ineffective in preventing infection. This has dashed such hopes and raises the spectre again that a fourth wave of the virus could overwhelm hospitals in early 2022. What we now know is that this mutation is very fast spreading with the potential for total case numbers to double every two to three days, although it possibly may not cause so much severe illness as previous mutations. Rather than go for full lockdowns which heavily damage the economy, the government strategy this time is focusing on getting as many people as possible to have a third (booster) vaccination after three months from the previous last injection, as a booster has been shown to restore a high percentage of immunity to Omicron to those who have had two vaccinations. There is now a race on between how quickly boosters can be given to limit the spread of Omicron, and how quickly will hospitals fill up and potentially be unable to cope. In the meantime, workers have been requested to work from home and restrictions have been placed on large indoor gatherings and hospitality venues. With the household saving rate having been exceptionally high since the first lockdown in March 2020, there is plenty of pent-up demand and purchasing power stored up for services in sectors like restaurants, travel, tourism and hotels which had been hit hard during 2021, but could now be hit hard again by either, or both, of government restrictions and/or consumer reluctance to leave home. Growth will also be lower due to people being ill and not working, similar to the pandemic in July. The economy, therefore, faces significant headwinds although some sectors have learned how to cope well with Covid. However, the biggest impact on growth would come from another lockdown if that happened. The big question still remains as to whether any further mutations of this virus could develop which render all current vaccines ineffective, as opposed to how quickly vaccines can be modified to deal with them and enhanced testing programmes be implemented to contain their spread until tweaked vaccines become widely available.

A SUMMARY OVERVIEW OF THE FUTURE PATH OF BANK RATE

- In December, the Bank of England became the first major western central bank to put interest rates up in this upswing in the current business cycle in western economies as recovery progresses from the Covid recession of 2020.
- The next increase in Bank Rate could be in February or May, dependent on how severe an impact there is from Omicron.
- If there are lockdowns in January, this could pose a barrier for the MPC to putting Bank Rate up again as early as 3rd February.
- With inflation expected to peak at around 6% in April, the MPC may want to be seen to be active in taking action to counter inflation on 5th May, the release date for its Quarterly Monetary Policy Report.
- The December 2021 MPC meeting was more concerned with combating inflation over the medium term than supporting economic growth in the short term.
- Bank Rate increases beyond May are difficult to forecast as inflation is likely to drop sharply in the second half of 2022.

Responsible Section/Team	Financial Services	Page	31
Responsible Author	Head of Finance	Version	v1
Date last amended	January 2022	Due for review	Feb 2023

- However, the MPC will want to normalise Bank Rate over the next three years so that it has its main monetary policy tool ready to use in time for the next down-turn; all rates under 2% are providing stimulus to economic growth.
- We have put year end 0.25% increases into Q1 of each financial year from 2023 to recognise this upward bias in Bank Rate - but the actual timing in each year is difficult to predict.
- Covid remains a major potential downside threat in all three years as we ARE likely to get further mutations.
- How quickly can science come up with a mutation proof vaccine, or other treatment, – and for them to be widely administered around the world?
- Purchases of gilts under QE ended in December. Note that when Bank Rate reaches 0.50%, the MPC has said it will start running down its stock of QE.

MPC MEETING 16th DECEMBER 2021

- The Monetary Policy Committee (MPC) voted 8-1 to raise Bank Rate by 0.15% from 0.10% to 0.25% and unanimously decided to make no changes to its programme of quantitative easing purchases due to finish in December 2021 at a total of £895bn.
- The MPC disappointed financial markets by not raising Bank Rate at its November meeting. Until Omicron burst on the scene, most forecasters, therefore, viewed a Bank Rate increase as being near certain at this December meeting due to the way that inflationary pressures have been comprehensively building in both producer and consumer prices, and in wage rates. However, at the November meeting, the MPC decided it wanted to have assurance that the labour market would get over the end of the furlough scheme on 30th September without unemployment increasing sharply; their decision was, therefore, to wait until statistics were available to show how the economy had fared at this time.
- **On 10th December we learnt of the disappointing 0.1% m/m rise in GDP** in October which suggested that economic growth had already slowed to a crawl even before the Omicron variant was discovered in late November. Early evidence suggests growth in November might have been marginally better. Nonetheless, at such low rates of growth, the government's "Plan B" COVID-19 restrictions could cause the economy to contract in December.
- **On 14th December, the labour market statistics** for the three months to October and the single month of October were released. The fallout after the furlough scheme was smaller and shorter than the Bank of England had feared. The single-month data were more informative and showed that LFS employment fell by 240,000, unemployment increased by 75,000 and the unemployment rate rose from 3.9% in September to 4.2%. However, the weekly data suggested this didn't last long as unemployment was falling again by the end of October. What's more, the 49,700 fall in the claimant count and the 257,000 rise in the PAYE measure of company payrolls suggests that the labour market strengthened again in November. The other side of the coin was a further rise in the number of vacancies from 1.182m to a record 1.219m in the three months to November which suggests that the supply of labour is struggling to keep up with demand, although the single-month figure for November fell for the first time since February, from 1.307m to 1.227m.
- These figures by themselves, would probably have been enough to give the MPC the assurance that it could press ahead to raise Bank Rate at this

December meeting. However, the advent of Omicron potentially threw a spanner into the works as it poses a major headwind to the economy which, of itself, will help to cool the economy. The financial markets, therefore, swung round to expecting no change in Bank Rate.

- **On 15th December we had the CPI inflation** figure for November which spiked up further from 4.2% to 5.1%, confirming again how inflationary pressures have been building sharply. However, Omicron also caused a sharp fall in world oil and other commodity prices; (gas and electricity inflation has generally accounted on average for about 60% of the increase in inflation in advanced western economies).
- **Other elements of inflation are also transitory** e.g., prices of goods being forced up by supply shortages, and shortages of shipping containers due to ports being clogged have caused huge increases in shipping costs. But these issues are likely to clear during 2022, and then prices will subside back to more normal levels. Gas prices and electricity prices will also fall back once winter is passed and demand for these falls away.
- Although it is possible that the Government could step in with some **fiscal support for the economy**, the huge cost of such support to date is likely to pose a barrier to incurring further major economy wide expenditure unless it is very limited and targeted on narrow sectors like hospitality, (as announced just before Christmas). The Government may well, therefore, effectively leave it to the MPC, and to monetary policy, to support economic growth – but at a time when the threat posed by rising inflation is near to peaking!
- This is the adverse set of factors against which the MPC had to decide on Bank Rate. For the second month in a row, the MPC blind-sided financial markets, this time with a **surprise increase in Bank Rate from 0.10% to 0.25%**. What's more, the hawkish tone of comments indicated that the MPC is now concerned that inflationary pressures are indeed building and need concerted action by the MPC to counter. This indicates that there will be more increases to come with financial markets predicting 1% by the end of 2022. The 8-1 vote to raise the rate shows that there is firm agreement that inflation now poses a threat, especially after the CPI figure hit a 10-year high this week. The MPC commented that "there has been significant upside news" and that "there were some signs of greater persistence in domestic costs and price pressures".
- On the other hand, it did also comment that "**the Omicron variant is likely to weigh on near-term activity**". But it stressed that at the November meeting it had said it would raise rates if the economy evolved as it expected and that now "these conditions had been met". It also appeared more worried about the possible boost to inflation from Omicron itself. It said that "the current position of the global and UK economies was materially different compared with prior to the onset of the pandemic, including elevated levels of consumer price inflation". It also noted the possibility that renewed social distancing would boost demand for goods again, (as demand for services would fall), meaning "global price pressures might persist for longer". (Recent news is that the largest port in the world in China has come down with an Omicron outbreak which is not only affecting the port but also factories in the region.)
- On top of that, there were no references this month to inflation being expected to be below the **2% target in two years' time**, which at November's meeting

the MPC referenced to suggest the markets had gone too far in expecting interest rates to rise to over 1.00% by the end of the year.

- These comments indicate that there has been a material reappraisal by the MPC of the inflationary pressures since their last meeting and the Bank also increased its forecast for inflation to peak at 6% next April, rather than at 5% as of a month ago. However, as the Bank retained its guidance that only a **“modest tightening”** in policy will be required, it cannot be thinking that it will need to increase interest rates that much more. A typical policy tightening cycle has usually involved rates rising by 0.25% four times in a year. “Modest” seems slower than that. As such, the Bank could be thinking about raising interest rates two or three times next year to 0.75% or 1.00%.
- In as much as a considerable part of the inflationary pressures at the current time are indeed **transitory**, and will naturally subside, and since economic growth is likely to be weak over the next few months, this would appear to indicate that this tightening cycle is likely to be comparatively short.
- As for the timing of the next increase in Bank Rate, the MPC dropped the comment from November’s statement that Bank Rate would be raised “in the coming months”. That may imply another rise is unlikely at the next meeting in February and that May is more likely. However, much could depend on how adversely, or not, the economy is affected by Omicron in the run up to the next meeting on 3rd February. Once 0.50% is reached, the Bank would act to start shrinking its stock of QE, (gilts purchased by the Bank would not be replaced when they mature).
- **The MPC’s forward guidance on its intended monetary policy** on raising Bank Rate versus selling (quantitative easing) holdings of bonds is as follows:
 -
 - Raising Bank Rate as “the active instrument in most circumstances”.
 - Raising Bank Rate to 0.50% before starting on reducing its holdings.
 - Once Bank Rate is at 0.50% it would stop reinvesting maturing gilts.
 - Once Bank Rate had risen to at least 1%, it would start selling its holdings.
- **US.** Shortages of goods and intermediate goods like semi-conductors, have been fuelling increases in prices and reducing economic growth potential. In November, **CPI inflation hit a near 40-year record level of 6.8%** but with energy prices then falling sharply, this is probably the peak. The biggest problem for the Fed is the mounting evidence of a strong pick-up in cyclical price pressures e.g., in rent which has hit a decades high.
- **Shortages of labour** have also been driving up wage rates sharply; this also poses a considerable threat to feeding back into producer prices and then into consumer prices inflation. It now also appears that there has been a sustained drop in the labour force which suggests the pandemic has had a longer-term scarring effect in reducing potential GDP. Economic growth may therefore be reduced to between 2 and 3% in 2022 and 2023 while core inflation is likely to remain elevated at around 3% in both years instead of declining back to the Fed’s 2% central target.
- Inflation hitting 6.8% and the feed through into second round effects, meant that it was near certain that the **Fed’s meeting of 15th December** would take aggressive action against inflation. Accordingly, the rate of tapering of monthly \$120bn QE purchases announced at its November 3rd meeting. was doubled so that all purchases would now finish in February 2022. In addition, Fed officials had started

discussions on running down the stock of QE held by the Fed. Fed officials also expected three rate rises in 2022 of 0.25% from near zero currently, followed by three in 2023 and two in 2024, taking rates back above 2% to a neutral level for monetary policy. The first increase could come as soon as March 2022 as the chairman of the Fed stated his view that the economy had made rapid progress to achieving the other goal of the Fed – “maximum employment”. The Fed forecast that inflation would fall from an average of 5.3% in 2021 to 2.6% in 2023, still above its target of 2% and both figures significantly up from previous forecasts. What was also significant was that this month the Fed dropped its description of the current level of inflation as being “transitory” and instead referred to “elevated levels” of inflation: the statement also dropped most of the language around the flexible average inflation target, with inflation now described as having exceeded 2 percent “for some time”. It did not see Omicron as being a major impediment to the need to take action now to curtail the level of inflationary pressures that have built up, although Fed officials did note that it has the potential to exacerbate supply chain problems and add to price pressures.

See also comments in paragraph 3.3 under PWLB rates and gilt yields.

- **EU.** The slow role out of vaccines initially delayed **economic recovery** in early 2021 but the vaccination rate then picked up sharply. After a contraction of -0.3% in Q1, Q2 came in with strong growth of 2%. With Q3 at 2.2%, the EU recovery was then within 0.5% of its pre Covid size. However, the arrival of Omicron is now a major headwind to growth in quarter 4 and the expected downturn into weak growth could well turn negative, with the outlook for the first two months of 2022 expected to continue to be very weak.
- **November’s inflation figures** breakdown shows that the increase in price pressures is not just due to high energy costs and global demand-supply imbalances for durable goods as services inflation also rose. Headline inflation reached 4.9% in November, with over half of that due to energy. However, oil and gas prices are expected to fall after the winter and so energy inflation is expected to plummet in 2022. Core goods inflation rose to 2.4% in November, its second highest ever level, and is likely to remain high for some time as it will take a long time for the inflationary impact of global imbalances in the demand and supply of durable goods to disappear. Price pressures also increased in the services sector, but wage growth remains subdued and there are no signs of a trend of faster wage growth which might lead to *persistently* higher services inflation - which would get the ECB concerned. The upshot is that the euro-zone is set for a prolonged period of inflation being above the ECB’s target of 2% and it is likely to average 3% in 2022, in line with the ECB’s latest projection.
- **ECB tapering.** The ECB has joined with the Fed by also announcing at its meeting on 16th December that it will be reducing its QE purchases - by half from October 2022, i.e., it will still be providing significant stimulus via QE purchases for over half of next year. However, as inflation will fall back sharply during 2022, it is likely that it will leave its central rate below zero, (currently -0.50%), over the next two years. The main struggle that the ECB has had in recent years is that inflation has been doggedly anaemic in sticking below the ECB’s target rate despite all its major programmes of monetary easing by cutting rates into negative territory and providing QE support.
- The ECB will now also need to consider the impact of **Omicron** on the economy, and it stated at its December meeting that it is prepared to provide further QE support if the pandemic causes bond yield spreads of peripheral countries, (compared to the yields of northern EU countries), to rise. However, that is the only reason it will support peripheral yields, so this support is limited in its scope.
- The EU has entered into a **period of political uncertainty** where a new German government formed of a coalition of three parties with Olaf Scholz replacing Angela

Merkel as Chancellor in December 2021, will need to find its feet both within the EU and in the three parties successfully working together. In France there is a presidential election coming up in April 2022 followed by the legislative election in June. In addition, Italy needs to elect a new president in January with Prime Minister Draghi being a favourite due to having suitable gravitas for this post. However, if he switched office, there is a significant risk that the current government coalition could collapse. That could then cause differentials between Italian and German bonds to widen when 2022 will also see a gradual running down of ECB support for the bonds of weaker countries within the EU. These political uncertainties could have repercussions on economies and on Brexit issues.

- **CHINA.** After a concerted effort to get on top of the virus outbreak in Q1 2020, economic recovery was strong in the rest of **2020**; this enabled China to recover all the initial contraction. During 2020, policy makers both quashed the virus and implemented a programme of monetary and fiscal support that was particularly effective at stimulating short-term growth. At the same time, China's economy benefited from the shift towards online spending by consumers in developed markets. These factors helped to explain its comparative outperformance compared to western economies during 2020 and earlier in 2021.
- However, the pace of economic growth has now fallen back in **2021** after this initial surge of recovery from the pandemic and looks likely to be particularly weak in 2022. China has been struggling to contain the spread of the Delta variant through using sharp local lockdowns - which depress economic growth. Chinese consumers are also being very wary about leaving home and so spending money on services. However, with Omicron having now spread to China, and being much more easily transmissible, this strategy of sharp local lockdowns to stop the virus may not prove so successful in future. In addition, the current pace of providing boosters at 100 billion per month will leave much of the 1.4 billion population exposed to Omicron, and any further mutations, for a considerable time. The **People's Bank of China** made a start in December 2021 on cutting its key interest rate marginally so as to stimulate economic growth. However, after credit has already expanded by around 25% in just the last two years, it will probably leave the heavy lifting in supporting growth to fiscal stimulus by central and local government.
- Supply shortages, especially of coal for power generation, were causing widespread power cuts to industry during the second half of 2021 and so a sharp disruptive impact on some sectors of the economy. In addition, recent regulatory actions motivated by a political agenda to channel activities into officially approved directions, are also likely to reduce the dynamism and long-term growth of the Chinese economy.
- **JAPAN.** 2021 has been a patchy year in combating Covid. However, recent business surveys indicate that the economy has been rebounding rapidly in 2021 once the bulk of the population had been double vaccinated and new virus cases had plunged. However, Omicron could reverse this initial success in combating Covid.
- The Bank of Japan is continuing its **very loose monetary policy** but with little prospect of getting inflation back above 1% towards its target of 2%, any time soon: indeed, inflation was actually negative in July. New Prime Minister Kishida, having won the November general election, brought in a supplementary budget to boost growth, but it is unlikely to have a major effect.
- **WORLD GROWTH.** World growth was in recession in 2020 but recovered during 2021 until starting to lose momentum in the second half of the year, though overall

growth for the year is expected to be about 6% and to be around 4-5% in 2022. Inflation has been rising due to increases in gas and electricity prices, shipping costs and supply shortages, although these should subside during 2022. While headline inflation will fall sharply, core inflation will probably not fall as quickly as central bankers would hope. It is likely that we are heading into a period where there will be a **reversal of world globalisation** and a decoupling of western countries from dependence on China to supply products, and vice versa. This is likely to reduce world growth rates from those in prior decades.

- **SUPPLY SHORTAGES.** The pandemic and extreme weather events, followed by a major surge in demand after lockdowns ended, have been highly disruptive of extended worldwide supply chains. Major queues of ships unable to unload their goods at ports in New York, California and China built up rapidly during quarters 2 and 3 of 2021 but then halved during quarter 4. Such issues have led to a misdistribution of shipping containers around the world and have contributed to a huge increase in the cost of shipping. Combined with a shortage of semi-conductors, these issues have had a disruptive impact on production in many countries. The latest additional disruption has been a shortage of coal in China leading to power cuts focused primarily on producers (rather than consumers), i.e., this will further aggravate shortages in meeting demand for goods. Many western countries are also hitting up against a difficulty in filling job vacancies. It is expected that these issues will be gradually sorted out, but they are currently contributing to a spike upwards in inflation and shortages of materials and goods available to purchase.

5.4 TREASURY MANAGEMENT PRACTICE (TMP1) – CREDIT AND COUNTERPARTY RISK MANAGEMENT

The DLUHC issued Investment Guidance in 2018, and this forms the structure of the Council's policy below. These guidelines do not apply to either trust funds or pension funds which operate under a different regulatory regime.

The key intention of the Guidance is to maintain the current requirement for councils to invest prudently, and that priority is given to security and liquidity before yield. In order to facilitate this objective, the guidance requires this Council to have regard to the CIPFA publication Treasury Management in the Public Services: Code of Practice and Cross-Sectoral Guidance Notes. This Council adopted the Code on 24/02/2010 and will apply its principles to all investment activity. In accordance with the Code, the Head of Finance has produced its treasury management practices (TMPs). This part, TMP 1(1), covering investment counterparty policy requires approval each year.

Annual investment strategy - The key requirements of both the Code and the investment guidance are to set an annual investment strategy, as part of its annual treasury strategy for the following year, covering the identification and approval of following:

- The strategy guidelines for choosing and placing investments, particularly non-specified investments.
- The principles to be used to determine the maximum periods for which funds can be committed.

- Specified investments that the Council will use. These are high security (i.e. high credit rating, although this is defined by the Council, and no guidelines are given), and high liquidity investments in sterling and with a maturity of no more than a year.
- Non-specified investments, clarifying the greater risk implications, identifying the general types of investment that may be used and a limit to the overall amount of various categories that can be held at any time.

The investment policy proposed for the Council is:

Strategy guidelines – The main strategy guidelines are contained in the body of the treasury strategy statement.

Specified investments – These investments are sterling investments of not more than one-year maturity, or those which could be for a longer period but where the Council has the right to be repaid within 12 months if it wishes. They also include investments which were originally classed as being non-specified investments, but which would have been classified as specified investments apart from originally being for a period longer than 12 months once the remaining period to maturity falls to under twelve months. These are considered low risk assets where the possibility of loss of principal or investment income is small. These would include sterling investments which would not be defined as capital expenditure with:

1. The UK Government (such as the Debt Management Account deposit facility, UK treasury bills or a gilt with less than one year to maturity).
2. Supranational bonds of less than one year's duration.
3. A local authority, housing association, parish council or community council.
4. Pooled investment vehicles (such as money market funds) that have been awarded a high credit rating by a credit rating agency. For category 4 this covers pooled investment vehicles, such as money market funds, that have been awarded a high credit rating by Standard and Poor's, Moody's and / or Fitch rating agencies.
5. A body that is considered of a high credit quality (such as a bank or building society. For category 5 this covers bodies with a minimum Short-Term rating of A (or the equivalent) as rated by Standard and Poor's, Moody's and / or Fitch rating agencies.

Within these bodies, and in accordance with the Code, the Council has set additional criteria to set the time and amount of monies which will be invested in these bodies. These criteria are

- **The limit with any one bank is 12 months and upto £8M, or 50% of the resources available at the time of investing, whichever is the larger;**
- **The limit with the Government via the Debt Management Office (DMO) is 12 months and is £unlimited.**

Non-specified investments – In response to historically low bank rate and the challenges of the MTFs, the Head of Finance will explore alternative investment opportunities in order to reduce ongoing revenue costs or earn additional revenue income/interest. The counterparties in these cases will generally be related parties (as defined in the Cipfa Accounting Code of Practice applicable to the year in which the investment decision was made).

The monitoring of investment counterparties - The credit rating of counterparties will be monitored regularly. The Council receives credit rating information (changes, rating watches and rating outlooks) from Link as and when ratings change, and counterparties are checked promptly. On occasion ratings may be downgraded when an investment has already been made. The criteria used are such that a minor downgrading should not affect the full receipt of the principal and interest. Any counterparty failing to meet the criteria will be removed from the list immediately by the Head of Finance, and if required new counterparties which meet the criteria will be added to the list.

5.5 APPROVED COUNTRIES FOR INVESTMENTS

This list is based on those countries which have sovereign ratings of AA- or higher, (we show the lowest rating from Fitch, Moody's and S&P) and also, (except - at the time of writing - for Hong Kong, Norway and Luxembourg), have banks operating in sterling markets which have credit ratings of green or above in the Link credit worthiness service.

Based on lowest available rating

AAA

- Australia
- Denmark
- Germany
- Luxembourg
- Netherlands
- Norway
- Singapore
- Sweden
- Switzerland

AA+

- Canada
- Finland
- U.S.A.

AA

- Abu Dhabi (UAE)
- France

AA-

- Belgium
- Hong Kong
- Qatar
- **U.K.**

In practice Officers tend only to use UK banks.

5.6 TREASURY MANAGEMENT SCHEME OF DELEGATION

(i) Full board/council

- receiving and reviewing reports on treasury management policies, practices and activities;
- approval of annual strategy.
- approval of individual non-specified investment decisions during the financial year.

(ii) Cabinet

- approval of/amendments to the organisation's adopted clauses, treasury management policy statement and treasury management practices;
- budget consideration and approval;
- approval of the division of responsibilities;
- receiving and reviewing regular monitoring reports and acting on recommendations;
- approving the selection of external service providers and agreeing terms of appointment;
- reviewing the treasury management policy and procedures and making recommendations to full Council;
- consideration of individual non-specified investment decisions during the financial year.

5.7 THE TREASURY MANAGEMENT ROLE OF THE SECTION 151 OFFICER

The S151 (Responsible) Officer

- recommending clauses, treasury management policy/practices for approval, reviewing the same regularly, and monitoring compliance;
- submitting regular treasury management policy reports;
- submitting budgets and budget variations;
- receiving and reviewing management information reports;
- reviewing the performance of the treasury management function;
- ensuring the adequacy of treasury management resources and skills, and the effective division of responsibilities within the treasury management function;
- ensuring the adequacy of internal audit, and liaising with external audit;
- recommending the appointment of external service providers;
- preparation of a capital strategy to include capital expenditure, capital financing, non-financial investments and treasury management, with a long-term timeframe;
- ensuring that the capital strategy is prudent, sustainable, affordable and prudent in the long term and provides value for money;
- ensuring that due diligence has been carried out on all treasury and non-financial investments and is in accordance with the risk appetite of the authority;
- ensure that the authority has appropriate legal powers to undertake expenditure on non-financial assets and their financing;
- ensuring the proportionality of all investments so that the authority does not undertake a level of investing which exposes the authority to an excessive level of risk compared to its financial resources;
- ensuring that an adequate governance process is in place for the approval, monitoring and ongoing risk management of all non-financial investments and long term liabilities;
- provision to members of a schedule of all non-treasury investments including material investments in subsidiaries, joint ventures, loans and financial guarantees;
- ensuring that members are adequately informed and understand the risk exposures taken on by an authority;
- ensuring that the authority has adequate expertise, either in house or externally provided, to carry out the above;
- creation of Treasury Management Practices which specifically deal with how non treasury investments will be carried out and managed, to include the following:
 - *Risk management (TMP1 and schedules), including investment and risk management criteria for any material non-treasury investment portfolios;*
 - *Performance measurement and management (TMP2 and schedules), including methodology and criteria for assessing the performance and success of non-treasury investments;*
 - *Decision making, governance and organisation (TMP5 and schedules), including a statement of the governance requirements for decision making in relation to non-treasury investments; and arrangements to ensure that appropriate professional due diligence is carried out to support decision making;*

- *Reporting and management information (TMP6 and schedules), including where and how often monitoring reports are taken;*
- *Training and qualifications (TMP10 and schedules), including how the relevant knowledge and skills in relation to non-treasury investments will be arranged.*

The Deputy S151 Officer (being the Finance Manager)

In the absence of the S151 Officer, the Deputy S151 Officer will take over the responsibilities noted above.

The Finance Officer (Exchequer Services)

- Transfer of funds between the Council's approved call and notice accounts.

Authorised Signatories

The following posts have been designated as those authorised to act as bank signatories for the Council:

- Head of Finance (S151 Officer)
- Finance Manager (Deputy S151 Officer)
- Finance Officer (Exchequer)
- Accountant
- Accounts Technician.

The Treasury Management Policy Statement

The treasury management policy statement

This council defines its treasury management activities as:

1. The management of the organisation's borrowing, investments and cash flows, its banking, money market and capital market transactions; the effective control of the risks associated with those activities; and the pursuit of optimum performance consistent with those risks.
2. This organisation regards the successful identification, monitoring and control of risk to be the prime criteria by which the effectiveness of its treasury management activities will be measured. Accordingly, the analysis and reporting of treasury management activities will focus on their risk implications for the organisation, and any financial instruments entered into to manage these risks.
3. This council acknowledges that effective treasury management will provide support towards the achievement of its business and service objectives. It is therefore committed to the principles of achieving value for money in treasury management, and to employing suitable comprehensive performance measurement techniques, within the context of effective risk management.

Clauses to be formally adopted

1. This Council will create and maintain, as the cornerstones for effective treasury management:
 - a Treasury Management Policy Statement (TMSS), stating the policies, objectives and approach to risk management of its treasury management activities
 - suitable Treasury Management Practices (TMPs), setting out the manner in which the organisation will seek to achieve those policies and objectives, and prescribing how it will manage and control those activities.
 - investment management practices (IMPs) for investments that are not for treasury management purposes.

The content of the policy statement, TMPs and IMPs will follow the recommendations contained in Sections 6, 7 and 8 of the CIPFA Treasury Management Code (the Code), subject only to amendment where necessary to reflect the particular circumstances of this organisation. Such amendments will not result in the organisation materially deviating from the Code's key principles.

2. This Council will receive reports on its treasury management policies, practices and activities, including, as a minimum, an annual strategy and plan in advance of the year, a mid-year review and an annual report after its close, in the form prescribed in its TMPs and IMPs.
3. This Council delegates responsibility for the implementation and regular monitoring of its treasury management policies and practices to Head of Finance, and for the execution and administration of treasury management decisions to the Head of Finance, who will act in accordance with the organisation's policy statement and TMPs

TMP 1 RISK MANAGEMENT

The responsible officer (in the case of Rossendale Borough Council, The Head of Finance) will design, implement and monitor all arrangements for the identification, management and control of treasury management risk, will report at least annually on the adequacy/suitability thereof, and will report, as a matter of urgency, the circumstances of any actual or likely difficulty in achieving the organisation's objectives in this respect, all in accordance with the procedures set out in TMP6 Reporting requirements and management information arrangements. In respect of each of the following risks, the arrangements which seek to ensure compliance with these objectives are set out in the schedule to this document.

1. Credit and Counterparty Risk Management

Credit and counter-party risk is the risk of failure by a counterparty to meet its contractual obligations to the organisation under an investment, borrowing, capital project or partnership financing, particularly as a result of the counterparty's diminished creditworthiness, and the resulting detrimental effect on the organisation's capital or current (revenue) resources.

This organisation regards a key objective of its treasury management activities to be the security of the principal sums it invests. Accordingly, it will ensure that its counterparty lists and limits reflect a prudent attitude towards organisations with whom funds may be deposited, and will limit its investment activities to the instruments, methods and techniques referred to in TMP4 Approved Instruments Methods And Techniques and listed in the schedule to this document. It also recognises the need to have, and will therefore maintain, a formal counterparty policy in respect of those organisations from which it may borrow, or with whom it may enter into other financing arrangements.

The organisation's credit and counterparty policies should set out its policy and practices relating to environmental, social and governance (ESG) investment considerations. This is a developing area, and it is not implied that the organisation's ESG policy will currently include ESG scoring or other real-time ESG criteria at individual investment level.

1.1. Policy on the use of credit risk analysis techniques

- 1.1.1. The Council will use credit criteria in order to select creditworthy counterparties for placing investments with.
- 1.1.2. Credit ratings will be used as supplied from all three rating agencies - Fitch, Moodys and Standard & Poors
- 1.1.3. Treasury Management Consultants will provide regular updates of changes to all ratings relevant to the council.
- 1.1.4. The responsible officer will formulate suitable criteria for assessing and monitoring the credit risk of investment counterparties and shall construct a lending list comprising maturity periods, type, group, sector, country and counterparty limits. This organisation will use the Sector creditworthiness service based on using colours determined by minimum combinations of ratings to derive maturity limits as follows: -
 - Yellow 5 years
 - Purple 2 years
 - Blue 1 year (only applies to nationalised or semi nationalised UK Banks)
 - Orange 1 year

Responsible Section/Team	Finance	Version/Status	2022/23 v1
Responsible Author	Finance Manager	Report submitted to	Full Council
Date Amended now	Feb 2022	Meeting date	Feb 2022
Due for Review	Feb 2023	Page	5

- Red 6 months
- Green 3 months
- No Colour not to be used

In addition, a credit default swap overlay is used as a further safeguard to give early warning of potential creditworthiness problems which may only belatedly lead to actual changes in credit ratings.

As this methodology is complex, readers are referred to the document produced by Link Asset Services “Treasury Solutions Credit Policy Guide December 2015” for a full explanation.

1.1.5. Credit ratings for individual counterparties can change at any time. The Head of Finance is responsible for applying approved credit rating criteria for selecting approved counterparties. Treasury management staff will add or delete counterparties to/from the approved counterparty list in line with the policy on criteria for selection of counterparties.

1.1.6. This organisation will not rely solely on credit ratings in order to select and monitor the creditworthiness of counterparties. In addition to credit ratings it will therefore use other sources of information including: -

- The quality financial press
- Market data
- Information on government support for banks and
- The credit ratings of that government support

1.1.7. Maximum maturity periods and amounts to be placed in different types of investment instrument are shown below. At present the maximum investment period for Specified Investments is less than 365 days.

1.1.8. Diversification: this organisation will avoid concentrations of lending and borrowing by adopting a policy of diversification. It will therefore use the following: -

- Maximum amount to be placed with any one institution - £8m or 50%, whichever is greater at the time the decision is made. However The limit with the Government via the Debt Management Office (DMO) is £unlimited.
- Group limits where a number of institutions are under one ownership – maximum of £10m
- Country limits – normally, a minimum sovereign rating of AAA is required for an institution to be placed on our approved lending list. However, UK banks will be considered regardless of the UK’s sovereign rating at the time of investment.

1.1.9. Investments will not be made with counterparties that do not have a credit rating in their own right, other than in the case of Non-specified Investments where the counterparty is one of the Council’s related parties and where a charge can be placed on land or equity in order to preserve the Council’s rights to its resources.

1.1.10. The definition of ‘high credit quality’ in order to determine what are specified investments as opposed to non specified investments which do not have high credit ratings is set out at the end of TMP1 in schedule 1.

1.1.11. Should the Council ever begin to use **external fund manager(s)** they will adhere to the counterparty credit criteria and maximum individual limits set by the Council;

Responsible Section/Team	Finance	Version/Status	2022/23 v1
Responsible Author	Finance Manager	Report submitted to	Full Council
Date Amended now	Feb 2022	Meeting date	Feb 2022
Due for Review	Feb 2023	Page	6

however, it is understood that fund manager(s) may use a subset of the counterparty list so derived.

1.2 Liquidity Risk Management

This is the risk that cash will not be available when it is needed, that ineffective management of liquidity creates additional unbudgeted costs, and that the organisation's business/service objectives will be thereby compromised.

This organisation will ensure it has adequate though not excessive cash resources, borrowing arrangements, overdraft or standby facilities to enable it at all times to have the level of funds available to it which are necessary for the achievement of its business/service objectives. This organisation will only borrow in advance of need where there is a clear business case for doing so and will only do so for the current capital programme or to finance future debt maturities.

1.2.1. Amounts of approved minimum cash balances and short-term investments

The Finance Officers shall seek to minimise the balance held in the Council's main bank accounts at the close of each working day. The use of alternative call accounts and short-term notice accounts (under 90 days) shall be used in order to achieve this aim.

1.2.2. Details of:

a. Standby facilities

At the end of each financial day the balance in the Council's current account is automatically transferred to/from the Special Business Investment Account (SIBA) to maximise the interest available on the Council's operational bank accounts. In practice the current account and the SIBA account are now operated as one account. Individual daily debit balances on the current account are not treated as an overdraft.

The Council also maintain one or more on-call, and notice accounts up to 90 days with other banks. These accounts are used for reserve cash balances which may be required without notice. Such instant access is possible, but would lead to some loss of interest commensurate with the notice period waived.

b. Bank overdraft arrangements

Previous overdraft facilities have now ceased due to the sweeping action described above and following the bank imposing an arrangement fee for overdrafts on the SIBA account.

c. Short-term borrowing facilities

The Council accesses temporary loans through approved brokers on the London money market. The approved operational borrowing limit for short term debt in 2021/22 is £14.7m.

d. Insurance/guarantee facilities

There are no specific insurance or guarantee facilities as the above arrangements are regarded as being adequate to cover all unforeseen occurrences.

Responsible Section/Team	Finance	Version/Status	2022/23 v1
Responsible Author	Finance Manager	Report submitted to	Full Council
Date Amended now	Feb 2022	Meeting date	Feb 2022
Due for Review	Feb 2023	Page	7

1.3 Interest Rate Risk Management

The risk that fluctuations in the levels of interest rates create an unexpected or unbudgeted burden on the organisation's finances, against which the organisation has failed to protect itself adequately.

This organisation will manage its exposure to fluctuations in interest rates with a view to containing its interest costs, or securing its interest revenues, in accordance with the amounts provided in its budgetary arrangements as amended in accordance with TMP6 Reporting requirements and management information arrangements.

It will achieve this by the prudent use of its approved financing and investment instruments, methods and techniques, primarily to create stability and certainty of costs and revenues, but at the same time retaining a sufficient degree of flexibility to take advantage of unexpected, potentially advantageous changes in the level or structure of interest rates. This should be the subject to the consideration and, if required, approval of any policy or budgetary implications.

1.3.1 Policies concerning the use of instruments for interest rate management.

a. forward dealing

Consideration will be given to dealing from forward periods dependant upon market conditions.

b. callable deposits (England and Wales only)

The Council may use callable deposits as part as of its Annual Investment Strategy (AIS), which now forms part of the Annual Treasury Management Strategy Statement. The credit criteria and maximum periods are set out in the Schedule of Specified and Non Specified Investments appended to the AIS.

1.4 Exchange Rate Risk Management

The risk that fluctuations in foreign exchange rates create an unexpected or unbudgeted burden on the organisation's finances, against which the organisation has failed to protect itself adequately.

The Council will manage its exposure to fluctuations in exchange rates so as to minimise any detrimental impact on its budgeted income/expenditure levels.

1.5 Refinancing Risk Management

The risk that maturing borrowings, capital projects or partnership financings cannot be refinanced on terms that reflect the provisions made by the organisation for those refinancing, both capital and current (revenue), and/or that the terms are inconsistent with prevailing market conditions at the time.

This organisation will ensure that its borrowing, private financing and partnership arrangements are negotiated, structured and documented, and the maturity profile of the monies so raised are managed, with a view to obtaining offer terms for renewal or refinancing, if required, which are competitive and as favourable to the organisation as can reasonably be achieved in the light of market conditions prevailing at the time.

Responsible Section/Team	Finance	Version/Status	2022/23 v1
Responsible Author	Finance Manager	Report submitted to	Full Council
Date Amended now	Feb 2022	Meeting date	Feb 2022
Due for Review	Feb 2023	Page	8

The Council will actively manage its relationships with its counterparties in these transactions in such a manner as to secure this objective, and will avoid overreliance on any one source of funding if this might jeopardise achievement of the above.

1.5.1. Debt/Other Capital Financing, Maturity Profiling, Policies and Practices

The Council will establish through its Prudential and Treasury Indicators the amount of debt maturing in any year/period.

Any debt rescheduling will be considered when the difference between the refinancing rate and the redemption rate is most advantageous and the situation will be continually monitored in order to take advantage of any perceived anomalies in the yield curve. The reasons for any rescheduling to take place will include:

- a) the generation of cash savings at minimum risk;
- b) to reduce the average interest rate;
- c) to amend the maturity profile and /or the balance of volatility of the debt portfolio.

Rescheduling will be reported to the Cabinet at the meeting immediately following its action.

1.5.2. Projected Capital Investment Requirements

The Finance Manager will prepare a three year plan for capital expenditure for the Council. The capital plan will be used to prepare a three year revenue budget for all forms of financing charges. In addition, the responsible officer will draw up a capital strategy report which will give a longer term view.

The definition of capital expenditure and long term liabilities used in the Code will follow recommended accounting practice as per the Code of Practice on Local Authority Accounting.

1.5.3 Policy Concerning Limits on Affordability and Revenue Consequences of Capital Financing

In considering the affordability of its capital plans, the Council will consider all the resources currently available/estimated for the future together with the totality of its capital plans, revenue income and revenue expenditure forecasts for the forthcoming year and the two following years and the impact these will have on council tax. It will also take into account affordability in the longer term beyond this three year period.

The Council will use the definitions provided in the Prudential Code for borrowing, capital expenditure, capital financing requirement, debt, financing costs, investments, net borrowing, net revenue stream, other long term liabilities.

1.6 Legal and Regulatory Risk Management

The risk that the organisation itself, or an organisation with which it is dealing in its treasury management activities, fails to act in accordance with its legal powers or regulatory requirements, and that the organisation suffers losses accordingly.

This organisation will ensure that all of its treasury management activities comply with its statutory powers and regulatory requirements. It will demonstrate such compliance, if required to do so, to all parties with whom it deals in such activities. In framing its credit and counterparty policy under TMP1[1] credit and counterparty risk

Responsible Section/Team	Finance	Version/Status	2022/23 v1
Responsible Author	Finance Manager	Report submitted to	Full Council
Date Amended now	Feb 2022	Meeting date	Feb 2022
Due for Review	Feb 2023	Page	9

management, it will ensure that there is evidence of counterparties' powers, authority and compliance in respect of the transactions they may affect with the organisation, particularly with regard to duty of care and fees charged.

This organisation recognises that future legislative or regulatory changes may impact on its treasury management activities and, so far as it is reasonably able to do so, will seek to minimise the risk of these impacting adversely on the organisation.

1.6.1. References to Relevant Statutes and Regulations

The treasury management activities of the Council shall comply fully with legal statute, guidance, Codes of Practice and the regulations of the Council, and as amended during the period of the Treasury Management Strategy Statement (TMSS). These include but are not limited to:

- Local Government Finance Act 1988 section 114 – duty on the responsible officer to issue a report if the Council is likely to get into a financially unviable position.
- Requirement to set a balanced budget - Local Government Finance Act 1992 section 32 for billing authorities and section 43 for major precepting authorities.
- Local Government Act 2003

- PWLB circulars on Lending Policy
- The Non-Investment Products Code (NIPS) - (formerly known as The London Code of Conduct) for principals and broking firms in the wholesale markets.
- Financial Conduct Authority's Code of Market Conduct
- The Council's Standing Orders relating to Contracts
- The Council's Financial Regulations
- The Council's Scheme of Delegated Functions

1.6.2 Procedures for Evidencing the Council's Powers/Authorities to Counterparties

The Council's powers to borrow and invest are contained in legislation.

Investing: Local Government Act 2003, section 12

Borrowing: Local Government Act 2003, section 1

In addition, it will make available on request the following the scheme of delegation of treasury management activities contained in Treasury Management Strategy which states

- which officers carry out these duties
- which officers are the authorised signatories

Required Information on Counterparties

Lending shall only be made to counterparties on the Approved Lending list. This list has been compiled using advice from the Council's treasury advisers based upon credit ratings supplied by Fitch, Moodys and Standard & Poors. Lending can also be made to one of the Council's related parties or subsidiaries.

1.6.3 Statement on the Council's Political Risks and Management of Same

Responsible Section/Team	Finance	Version/Status	2022/23 v1
Responsible Author	Finance Manager	Report submitted to	Full Council
Date Amended now	Feb 2022	Meeting date	Feb 2022
Due for Review	Feb 2023	Page	11

The Head of Finance shall take appropriate action with the Council, the Chief Executive Officer and the Leader of the Council to respond to and manage appropriately political risks such as change of majority group, leadership in the Council, change of Government etc.

1.6.4 Monitoring Officer

It is the duty of the monitoring officer to ensure that the treasury management activities of the Council are lawful.

1.6.5. Chief Financial Officer

The Chief Financial Officer is the Head of Finance. The duty of this officer is to ensure that the financial affairs of the Council are conducted in a prudent manner and to make a report to the Council if he has concerns as to the financial prudence of its actions or its expected financial position.

1.7 Fraud, Error and Corruption, and Contingency Management

The risk that the Council fails to identify the circumstances in which it may be exposed to the risk of loss through fraud, error, corruption or other eventualities in its treasury management dealings, and fails to employ suitable systems and procedures and maintain effective contingency management arrangements to these ends. It includes the area of risk commonly referred to as operational risk.

This Council will ensure that it has identified the circumstances which may expose it to the risk of loss through fraud, error, corruption or other eventualities in its treasury management dealings. Accordingly, it will employ suitable systems and procedures, and will maintain effective contingency management arrangements, to these ends.

The Council will therefore:-

- a) Seek to ensure an adequate division of responsibilities and maintenance at all times of an adequate level of internal check which minimises such risks.
- b) Fully document all its treasury management activities so that there can be no possible confusion as to what proper procedures are.
- c) Staff will not be allowed to take up treasury management activities until they have had proper training in procedures and are then subject to an adequate and appropriate level of supervision.
- d) Records will be maintained of all treasury management transactions so that there is a full audit trail and evidence of the appropriate checks being carried out.

1.7.1. Details of Systems and Procedures to be Followed, Including Internet Services

Authority

- The Scheme of Delegation to Officers sets out the delegation of duties to officers.
- All loans and investments are negotiated by the responsible officer or authorised persons.
- Loan procedures are defined in the Financial Regulations section of the Council's Constitution.

Procedures

Responsible Section/Team	Finance	Version/Status	2022/23 v1
Responsible Author	Finance Manager	Report submitted to	Full Council
Date Amended now	Feb 2022	Meeting date	Feb 2022
Due for Review	Feb 2023	Page	12

- The electronic banking procedures include internet access to the Council's bank accounts for both downloading statements and entering one-off same-day transactions. The electronic authorisation of transactions through chip and pin cards and passwords follows the same pattern of required signatories as paper transactions do (i.e. one signature up to £5,000 and two signatures for transactions over £5,000).
- Autopay online is the system used by the Council for the transfer of payment and collection files to the BACs processing centre. BACs collection and payment files are generated by the payroll, creditors, benefits and revenues software systems and transferred through a secure internet portal by the authorised signatories. Files must be generated, approved and sent by two different people.
- Full details of operational procedures are maintained by the Finance Officer (Exchequer Services).

Investment and borrowing transactions

- A detailed register of all loans and investments is maintained by the Finance Officer (Exchequer Services). A written acknowledgement of each deal is sent promptly to the lending or borrowing institution where transactions are done directly with the organisation.
- Written confirmation is received and checked against the dealer's records for the transaction.
- Any discrepancies are immediately reported to the Head of Finance for resolution.
- All transactions placed through brokers are confirmed by a broker note showing details of the loan arranged. Written confirmation is received and checked against the dealer's records for the transaction. Any discrepancies are immediately reported to the Head of Finance for resolution.

Regularity and security

- Lending is only made to institutions on the Approved List of Counterparties.
- All loans raised, and repayments made, go directly to and from the bank account of approved counterparties.
- Counterparty limits are set for every institution that the Council invests with.
- Brokers have a list of named officials authorised to agree deals.
- There is a separation of duties in the section between dealers and the checking and authorisation of all deals.
- The Council's bank holds a list of Council officials who are authorised signatories for treasury management transactions.
- Payments can only be authorised in a formal letter by an authorised signatory, the list of signatories having previously been agreed with the current provider of our banking services.
- The NatWest Bankline system can only be accessed by a password and online payments require chip and pin authorisation from one or more of the bank signatories (two for payments over £5,000).
- There is adequate insurance cover for employees involved in loans management and accounting.

Checks

- The bank reconciliation is carried out monthly from the bank statement to the financial ledger.
- A debt charge/investment income listing is produced every month when a review is undertaken against the budget for interest earnings and debt costs.

Responsible Section/Team	Finance	Version/Status	2022/23 v1
Responsible Author	Finance Manager	Report submitted to	Full Council
Date Amended now	Feb 2022	Meeting date	Feb 2022
Due for Review	Feb 2023	Page	13

Calculations

- The calculation of repayment of principal and interest notified by the lender or borrower is checked for accuracy against the amount calculated by the Finance Officer (Exchequer Services). This is used to check the amount paid to lenders.
- Average weighted capital loans fund interest rates and debt management expenses are calculated monthly using information from the financial ledger.
- These interest and expense rates are then used to calculate the principal, interest and debt management expense charges to the General Fund.

1.7.2. Emergency and Contingency Planning Arrangements Disaster Recovery Plan.

The Council's main Business Continuity Plan includes a detailed section covering the essential financial systems and procedures, including banking, payments and revenue collection. All members of the treasury management team are familiar with this plan and new members will be briefed on it. The plan is reviewed and updated at regular intervals with both paper and electronic copies being available.

All computer files are backed up on the server to enable files to be accessed from remote sites.

1.7.3. Insurance Cover Details

Fidelity Insurance

The Council has 'Fidelity' insurance cover with Zurich Municipal which covers the loss of cash by fraud or dishonesty of employees. This cover is limited to £5m for any one event with an excess of £5k for any one event.

Professional Indemnity Insurance

The Council also has an 'Officials Indemnity' insurance policy with Zurich Municipal which covers loss to the Council from the actions and advice of its officers which are negligent and without due care. This cover is limited to £5m for any one event with an excess of £5k for any one event.

1.8 Market Risk Management

The risk that, through adverse market fluctuations in the value of the principal sums an organisation borrows and invests, its stated treasury management policies and objectives are compromised, against which effects it has failed to protect itself adequately.

This organisation will seek to ensure that its stated treasury management policies and objectives will not be compromised by adverse market fluctuations in the value of the principal sums it invests, and will accordingly seek to protect itself from the effects of such fluctuations.

1.8.1. Details of Approved Procedures and Limits for Controlling Exposure to Investments Whose Capital Value May Fluctuate (Gilts, CDs, Etc.)

These are controlled through setting limits on investment instruments where the principal value can fluctuate. The limits are determined and set through the Annual Investment Strategy (which now forms part of the Annual Treasury Management Strategy Statement).

Responsible Section/Team	Finance	Version/Status	2022/23 v1

TMP 2 PERFORMANCE MEASUREMENT

2.1 Evaluation and Review of Treasury Management Decisions

The Council has a number of approaches to evaluating treasury management decisions:

- a. monthly reviews carried out by the Head of Finance and Finance Manager, reported as part of the regular financial monitoring reports to Cabinet.
- b. weekly review reports from our treasury management consultants detailing current markets, forecasts and model portfolio returns.
- c. annual review of performance and strategy with our treasury management consultants.
- d. comparative reviews with neighbouring authorities.

2.1.2 Reviews with our treasury management consultants

The Head of Finance meets with our consultants every 12 months to review the performance of the investment and debt portfolios. Ad-hoc reviews are conducted by arrangement as outlined at 2.3.4.

2.1.3 Annual Review after the end of the financial year

In addition to the regular financial monitoring reports to Cabinet, the end of March out-turn report includes an annual treasury management report which reviews the performance of the debt and investment portfolios. This report contains the following:

- a. total debt and investments at the beginning and close of the financial year and average interest rates
- b. borrowing strategy for the year compared to actual strategy
- c. investment strategy for the year compared to actual strategy
- d. explanations for variance between original strategies and actual
- e. debt rescheduling done in the year
- f. actual borrowing and investment rates available through the year
- g. comparison of return on investments to the investment benchmark
- h. compliance with Prudential and Treasury Indicators

2.1.4 Comparative reviews

When data becomes available, comparative reviews are undertaken to see how the performance of the authority on debt and investments compares to other authorities with similar size portfolios (but allowing for the fact that Prudential and Treasury Indicators are locally set). Data can be sourced from: -

- CIPFA Treasury Management statistics published each year for the last complete financial year
- Neighbouring Lancashire authorities
- Link Asset Services model portfolio

Responsible Section/Team	Finance	Version/Status	2022/23 v1
Responsible Author	Finance Manager	Report submitted to	Full Council
Date Amended now	Feb 2022	Meeting date	Feb 2022
Due for Review	Feb 2023	Page	15

2.2 Benchmarks and Calculation Methodology:

2.2.1 Debt management

- Average rate on all external debt
- Average period to maturity of external debt
- Average period to maturity of new loans in previous year

2.2.2 Investment

The performance of investment earnings will be measured against the following benchmarks: -

- a. Link Asset Services model portfolio
 - *Weighted average rate of return*
 - *Weighted average maturity*

Performance may also be measured against other local authority funds with similar benchmarks and parameters managed by other fund managers.

2.3 Policy concerning methods for testing Value for Money in Treasury Management

2.3.1 Frequency and processes for tendering

Tenders are normally awarded on a five-year basis. The process for awarding contracts will be in line with the Council's Contract Standing Orders.

2.3.2 Banking services

The Council's banking arrangements are to be subject to competitive tender unless it is considered that there will be changes in the volume of transactions in the foreseeable future which renders a shorter period appropriate.

2.3.3 Money-broking services

The Council may use money broking services in order to make deposits or to borrow, and will establish charges for all services prior to using them.

2.3.4 Consultants'/advisers' services

This Council's policy is not to appoint full-time professional treasury management consultants (Link Asset Services advise on an ad hoc basis, alongside automated updates).

2.3.5 Policy on External Managers (Other than relating to Superannuation Funds)

The Council's policy is not to appoint external investment fund managers.

TMP 3 DECISION-MAKING AND ANALYSIS

3.1 Funding, Borrowing, Lending, and New Instruments/Techniques:

3.1.1 Records to be kept

The following records will be retained:-

- Daily and monthly cash balance forecasts
- Brokers' confirmations for investment and temporary borrowing transactions
- Confirmations from borrowing /lending institutions where deals are done directly
- PWLB loan confirmations
- PWLB debt portfolio schedules.
- Certificates for market loans, local bonds and other loans
- Contract notes received from fund manager(s)
- Fund manager(s) valuation statements (if applicable)

3.1.2 Processes to be pursued

- Cash flow analysis.
- Debt and investment maturity analysis
- Ledger reconciliation
- Review of opportunities for debt restructuring (if applicable)
- Review of borrowing requirement to finance capital expenditure (and other forms of financing where those offer value for money)
- Performance information (e.g. monitoring of actual against budget for debt charges, interest earned, debt management; also monitoring of average pool rate, investment returns, etc).

3.1.3 Issues to be addressed

3.1.3.1. In respect of every treasury management decision made the Council will:

- a) Above all, be clear about the nature and extent of the risks to which the Council may become exposed
- b) Be certain about the legality of the decision reached and the nature of the transaction, and that all authorities to proceed have been obtained
- c) Be content that the documentation is adequate both to deliver the Council's objectives and protect the Council's interests, and to deliver good housekeeping
- d) Ensure that third parties are judged satisfactory in the context of the Council's creditworthiness policies, and that limits have not been exceeded
- e) Be content that the terms of any transactions have been fully checked against the market, and have been found to be competitive.

Responsible Section/Team	Finance	Version/Status	2022/23 v1
Responsible Author	Finance Manager	Report submitted to	Full Council
Date Amended now	Feb 2022	Meeting date	Feb 2022
Due for Review	Feb 2023	Page	17

3.1.3.2 In respect of borrowing and other funding decisions, the Council will:

- a) consider the ongoing revenue liabilities created, and the implications for the organisation's future plans and budgets
- b) evaluate the economic and market factors that might influence the manner and timing of any decision to fund
- c) consider the merits and demerits of alternative forms of funding, including funding from revenue, leasing and private partnerships
- d) consider the alternative interest rate bases available, the most appropriate periods to fund and repayment profiles to use and, if relevant, the opportunities for foreign currency funding.

3.1.3.3 In respect of investment decisions, the Council will:

- a) consider the optimum period, in the light of cash flow availability and prevailing market conditions;
- b) consider the alternative investment products and techniques available, especially the implications of using any which may expose the Council to changes in the value of its capital;
- c) in the case of investments outside the banking sector the Council will consider the appropriate level of asset security, such as Land Registry charges, local Land Charges, or holding asset deeds.

TMP 4 APPROVED INSTRUMENTS, METHODS AND TECHNIQUES

4.1 Approved Activities of the Treasury Management Operation

- borrowing;
- lending;
- debt repayment and rescheduling;
- consideration, approval and use of new financial instruments and treasury management techniques;
- managing the underlying risk associated with the Council’s capital financing and surplus funds activities;
- managing cash flow;
- banking activities;
- the use of external fund managers (other than Pension Fund)
- leasing.

4.2 Approved Instruments for Investments

Refer to the Treasury Management Strategy.

4.3 Approved Techniques

- Forward dealing
- LOBOs – lenders option, borrower’s option borrowing instrument
- The use of structured products such as callable deposits

4.4 Approved Methods and Sources of Raising Capital Finance

Finance will only be raised in accordance with the Local Government Act 2003 and within this limit the Council has a number of approved methods and sources of raising capital finance. These are:

On Balance Sheet	Fixed	Variable
PWLB	●	●
Market (long-term)	●	●
Market (temporary)	●	●
Market (LOBOs)	●	●
Local temporary	●	●
Local Bonds	●	
Overdraft		●
Internal (capital receipts & revenue balances)	●	●
Leasing	●	●
Deferred Purchase	●	●

Other Methods of Financing

- Government and EC Capital Grants
- Lottery monies
- PFI/PPP

Responsible Section/Team	Finance	Version/Status	2022/23 v1
Responsible Author	Finance Manager	Report submitted to	Full Council
Date Amended now	Feb 2022	Meeting date	Feb 2022
Due for Review	Feb 2023	Page	19

Borrowing will only be done in Sterling. All forms of funding will be considered dependent on the prevailing economic climate, regulations and local considerations. The responsible officer has delegated powers in accordance with Financial Regulations, Standing Orders, the Scheme of Delegation to Officers Policy and the Treasury Management Strategy to take the most appropriate form of borrowing from the approved sources.

4.5 Investment Limits

The Treasury Management Strategy Statement sets out the limits and the guidelines for use of each type of investment instrument.

4.6 Borrowing Limits

See the Treasury Management Strategy Statement and Prudential and Treasury Indicators.

TMP 5 Organisation, Clarity and Segregation of Responsibilities, and Dealing Arrangements

5.1 Allocation of responsibilities

(i) Full Council

- receiving and reviewing reports on treasury management policies, practices and activities
- approval of annual treasury management strategy
- approval of capital strategy and capital programme
- approval of annual revenue budget

(ii) Cabinet

- recommendation of amendments to the organisation’s adopted clauses, treasury management policy statement and treasury management practices
- budget consideration and recommendations
- approval of the division of responsibilities
- receiving and reviewing regular monitoring reports and acting on recommendations
- approving the selection of external service providers and agreeing terms of appointment.
- reviewing the treasury management policy and procedures and making recommendations to the responsible body.

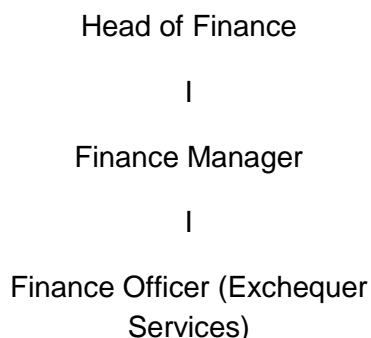

5.2 Principles and Practices Concerning Segregation of Duties

5.2.1 The following duties must be undertaken by separate officers: -

Dealing	Negotiation and approval of deal. Receipt and checking of brokers confirmation note against loans diary. Reconciliation of cash control account. Bank reconciliation
Accounting Entry	Production of transfer note. Processing of accounting entry
Authorisation/Payment of Deal	Entry onto system. Approval and payment.

5.3 Treasury Management Organisation Chart

5.4 Statement of the treasury management duties/responsibilities of each treasury post

5.4.1. The responsible officer

The responsible officer is the person charged with professional responsibility for the treasury management function and in this Council is the Head of Finance (This post is also the S151 officer.) This officer will carry out the following duties: -

- a) recommending clauses, treasury management policy/practices for approval, reviewing the same regularly, and monitoring compliance
- b) submitting regular treasury management policy reports
- c) submitting budgets and budget variations
- d) receiving and reviewing management information reports
- e) reviewing the performance of the treasury management function
- f) ensuring the adequacy of treasury management resources and skills, and the effective division of responsibilities within the treasury management function
- g) ensuring the adequacy of internal audit, and liaising with external audit
- h) recommending the appointment of external service providers.
- i) The responsible officer has delegated powers through this policy to take the most appropriate form of borrowing from the approved sources, and to make the most appropriate form of investments in approved instruments.
- j) The responsible officer may delegate his power to borrow and invest to members of his staff, principally the Finance Manager, to act as temporary cover for leave/sickness. All transactions must be authorised by at least two of the bank signatories as approved in the Treasury Management Strategy Appendix 5.6.
- k) The responsible officer will ensure that Treasury Management Policy is adhered to, and if not will bring the matter to the attention of elected members as soon as possible.
- l) Prior to entering into any capital financing, lending or investment transaction, it is the responsibility of the responsible officer to be satisfied, by reference to the Council's legal department and external advisors as appropriate, that the proposed transaction does not breach any statute, external regulation or the Council's Financial Regulations
- m) It is also the responsibility of the responsible officer to ensure that the Council complies with the requirements of The Non Investment Products Code

Responsible Section/Team	Finance	Version/Status	2022/23 v1

(formerly known as The London Code of Conduct) for principals and broking firms in the wholesale markets.

5.4.2. Finance Manager (Deputy S151 officer)

The responsibilities of this post will be: -

- a) duties as delegated by the responsible officer in accordance with 5.4.1 (j)
- b) execution of transactions in accordance with good governance arrangements and adequate segregation – (second signatory)
- c) oversight and review of forecast cash balances to inform treasury management decision making.

5.4.3. Finance Officer (Exchequer Services)

The responsibilities of this post will be: -

- a) execution of transactions
- b) adherence to agreed policies and practices on a day-to-day basis
- c) maintaining relationships with counterparties and external service providers
- d) supervising treasury management staff
- e) monitoring performance on a day-to-day basis
- f) submitting management information reports to the responsible officer
- g) identifying and recommending opportunities for improved practices

5.4.4. The Head of the Paid Service – the Chief Executive

The responsibilities of this post will be: -

- a) Ensuring that the system is specified and implemented
- b) Ensuring that the responsible officer reports regularly to full Council and Cabinet on treasury policy, activity and performance.

5.4.5. The Monitoring Officer

The responsibilities of this post will be: -

- a) Ensuring compliance by the responsible officer with the treasury management policy statement and treasury management practices and that they comply with the law.
- b) Being satisfied that any proposal to vary treasury policy or practice complies with law or any code of practice.
- c) Giving advice to the responsible officer when advice is sought.

5.4.6. Internal Audit

The responsibilities of Internal Audit will be: -

- a) Reviewing compliance with approved policy and treasury management practices.
- b) Reviewing division of duties and operational practice.
- c) Assessing value for money from treasury activities.
- d) Undertaking probity audit of treasury function.

5.5 Absence Cover Arrangements

The Finance Manager is also the deputy S151 Officer. The Finance Manager will also ensure that cover is available for the Finance Officer (Exchequer Services) and other treasury management officers as necessary.

Responsible Section/Team	Finance	Version/Status	2022/23 v1
Responsible Author	Finance Manager	Report submitted to	Full Council
Date Amended now	Feb 2022	Meeting date	Feb 2022
Due for Review	Feb 2023	Page	23

If and when this organisation intends, as a result of lack of resources or other circumstances, to depart from these principles, the responsible officer will ensure that the reasons are properly reported in accordance with TMP6 Reporting requirements and management information arrangements and the implications properly considered and evaluated.

5.6 Dealing Limits

The following posts are authorised to deal:

- The Head of Finance: limited to investments and loans of £5m per transaction. Amounts in excess of this limit should be by Scheme of Delegation.

5.7 Policy on Brokers' Services

It is this Council's policy to rotate business between brokers.

5.8 Policy on Taping of Conversations

It is not this Council's policy to tape brokers conversations.

5.9 Direct Dealing Practices

The Council will consider dealing direct with counterparties if it is appropriate and the Council believes that better terms will be available. At present, most deals are arranged by this method. There are certain types of accounts and facilities, however, where direct dealing is required, as follows;

- Business Reserve Accounts:
- Call Accounts:
- Money Market Funds.

5.10 Settlement Transmission Procedures

A formal letter signed by an agreed bank signatory setting out each transaction must be sent to the local authority's bankers where preliminary instructions have been given by telephone. For payments a transfer will be made through BACs or CHAPs to be completed by the appropriate bank deadlines in place that day.

5.11 Documentation Requirements

For each deal undertaken a record should be prepared giving details of dealer, amount, period, counterparty, interest rate, dealing date, payment date(s), broker.

5.12 Arrangements Concerning the Management of Third-Party Funds.

The Council does not currently manage any third-party funds. Trust funds are now held and administered by the Community Foundation for Lancashire.

5.13 Council Cheque and Bank Signatories

A list of the posts delegated with cheque and bank signatory authority are included within the appendices to the Treasury Management Strategy Statement.

TMP 6 Reporting Requirements and Management Information Arrangements

6.1 Annual programme of reporting

- a) Annual reporting requirements before the start of the year: -
 - a. review of the organisation’s approved clauses, treasury management policy statement and practices
 - b. strategy report on proposed treasury management activities for the year comprising of the Treasury Management Strategy Statement, Annual Investment Strategy and Minimum Revenue Provision Policy Statement
 - c. capital strategy to give a longer term view of the capital programme and treasury management implications thereof beyond the three year time horizon for detailed planning
- b) Regular review by Cabinet within the Financial Monitoring Reports incorporating Mid-Year Review
- c) Annual review report after the end of the year within the out-turn Financial Monitoring Report.

6.2 Annual Treasury Management Strategy Statement (TMSS)

1. The Treasury Management Strategy Statement sets out the specific expected treasury activities for the forthcoming financial year. This strategy will be submitted to the Cabinet and then to the full Council for approval before the commencement of each financial year.
2. The formulation of the annual Treasury Management Strategy Statement involves determining the appropriate borrowing and investment decisions in the light of the anticipated movement in both fixed and shorter -term variable interest rates. For instance, this Council may decide to postpone borrowing if fixed interest rates are expected to fall, or borrow early if fixed interest rates are expected to rise.
3. The Treasury Management Strategy Statement is concerned with the following elements:
 - a) Prudential and Treasury Indicators
 - b) current Treasury portfolio position
 - c) borrowing requirement
 - d) prospects for interest rates
 - e) borrowing strategy
 - f) policy on borrowing in advance of need
 - g) debt rescheduling
 - h) investment strategy
 - i) creditworthiness policy
 - j) policy on the use of external service providers
 - k) any extraordinary treasury issue
 - l) the MRP/VRP strategy

Responsible Section/Team	Finance	Version/Status	2022/23 v1
Responsible Author	Finance Manager	Report submitted to	Full Council
Date Amended now	Feb 2022	Meeting date	Feb 2022
Due for Review	Feb 2023	Page	25

4. The Treasury Management Strategy Statement will establish the expected move in interest rates against alternatives (using all available information such as published interest rate forecasts where applicable), and highlight sensitivities to different scenarios.

6.3 The Annual Investment Strategy

Included within the Treasury Management Strategy Statement is the report on the Annual Investment Strategy which sets out the following: -

- a) The Council's risk appetite in respect of security, liquidity and optimum performance
- b) The definition of high credit quality to determine what are specified investments as distinct from non specified investments
- c) Which specified and non specified instruments the Council will use
- d) Whether they will be used by the in house team, external managers or both (if applicable)
- e) The Council's policy on the use of credit ratings and other credit risk analysis techniques to determine creditworthy counterparties for its approved lending list
- f) Which credit rating agencies the Council will use
- g) How the Council will deal with changes in ratings, rating watches and rating outlooks
- h) Limits for individual counterparties and group limits
- i) Country limits
- j) Levels of cash balances
- k) Interest rate outlook
- l) Budget for investment earnings
- m) Policy on the use of external service providers

6.4 The Annual Minimum Revenue Provision Policy Statement

This statement will be submitted as one element of the Annual Treasury Management Strategy Statement and will set out how the Council will make revenue provision for repayment of its borrowing using the four options for so doing.

6.5 Policy on Prudential and Treasury Indicators

1. The Council approves before the beginning of each financial year a number of treasury limits which are set through Prudential and Treasury Indicators.
2. The responsible officer is responsible for incorporating these limits into the Annual Treasury Management Strategy Statement, and for ensuring compliance with the limits. Should it prove necessary to amend these limits, the responsible officer shall submit the changes for approval to the full Council

6.6 Regular and midyear review

The Council will review its treasury management activities and strategy on at least a six monthly basis, though in practice as part of regular financial monitoring to Cabinet. This review will consider the following:

- a) activities undertaken
- b) variations (if any) from agreed policies/practices

Responsible Section/Team	Finance	Version/Status	2022/23 v1
Responsible Author	Finance Manager	Report submitted to	Full Council
Date Amended now	Feb 2022	Meeting date	Feb 2022
Due for Review	Feb 2023	Page	26

- c) interim performance report
- d) regular monitoring
- e) monitoring of treasury management indicators for local authorities.

6.7 Management Information Reports, including a year-end performance report

Management information reports will be prepared for each Cabinet meeting, the final report going to the first available Cabinet after the year-end. These reports will contain the following information: -

- a) a summary of transactions executed (may want to add brokers used and fees paid) and their revenue (current effects);
- b) measurements of performance including effect on loan charges/investment income;
- c) degree of compliance with original strategy and practices and explanation of variances.
- d) any non compliance with Prudential limits or other treasury management limits.

6.8 Publication of Treasury Management Reports

Treasury Management information reports will be prepared for each Cabinet meeting and these are available as part of the agenda documents on the Council's website at www.rossendale.gov.uk .

The Annual Treasury Management Strategy Statement and the Treasury Management Practices are reviewed at the Full Council meeting each February and are again available as part of the agenda documents on the Council's website at www.rossendale.gov.uk .

TMP 7 BUDGETING, ACCOUNTING AND AUDIT ARRANGEMENTS

7.1 Statutory/Regulatory Requirements

The accounts are drawn up in accordance with the Code of Practice on Local Authority Accounting in Great Britain that is recognised by statute as representing proper accounting practices. The Council has also adopted in full the principles set out in CIPFA's 'Treasury Management in the Public Services - Code of Practice' (the 'CIPFA Code'), together with those of its specific recommendations that are relevant to this Council's treasury management activities.

7.2 Sample Budgets / Accounts / Prudential and Treasury Indicators

The Head of Finance will prepare at least a three year medium term financial plan with Prudential and Treasury Indicators for treasury management which will incorporate the budget for the forthcoming year and provisional estimates for the following two years. This will bring together all the costs involved in running the function, together with associated income. The Head of Finance will exercise effective controls over this budget and monitoring of performance against Prudential and Treasury Indicators, and will report upon and recommend any changes required in accordance with TMP6.

The matters to be included in the budget will at minimum be those required by statute or regulation, together with such information as will demonstrate compliance with TMP1 Risk management, TMP2 Performance measurement, and TMP4 Approved instruments, methods and techniques.

7.3 List of Information Requirements of External Auditors.

- Reconciliation of loans outstanding in the financial ledger to Treasury Management records
- Maturity analysis of loans outstanding
- Certificates for new long term loans taken out in the year
- Reconciliation of loan interest, discounts received and premiums paid to financial ledger by loan type
- Calculation of loans fund interest and debt management expenses
- Details of interest rates applied to internal investments
- Calculation of interest on working balances
- Interest accrual calculation
- Principal and interest charges reports from the ledgers
- Analysis of any deferred charges
- Calculation of loans fund creditors and debtors
- Annual Treasury Report
- Treasury Management Strategy Statement and Prudential and Treasury Indicators
- Review of observance of limits set by Prudential and Treasury Indicators
- Calculation of the Minimum Revenue Provision
- External fund manager(s) valuations including investment income schedules and movement in capital values (if applicable)

7.4 Monthly Budget Monitoring Report

Monthly Budget Monitoring reports are produced for the Head of Finance with quarterly reports to Cabinet. The report is intended to highlight any variances between budgets and spend in order that the Council can assess its financial position. Details of treasury management activities are included within the Cabinet report.

Due for Review	Feb 2023	Page	28

TMP 8 Cash and Cash Flow Management

8.1 Arrangements for Preparing/Submitting Cash Flow Statements

Cash flow projections are prepared annually and updated monthly and daily. The annual and monthly cash flow projections are prepared according to known changes in levels of income and expenditure and also changes in payments and receipts dates. These details are supplemented on an ongoing basis by information received of new or revised amounts to be paid or received as and when they are known.

The responsible officer will ensure that these are adequate for the purposes of monitoring compliance with TMP1 - Liquidity risk management, and for the purpose of identifying future borrowing needs.

8.2 Bank Statements Procedures

The Council receives daily bank statements via a daily download of data from its bank. All amounts on the statement are checked to source data from Payroll, Creditors etc.

A formal bank reconciliation is undertaken on a monthly basis by the Finance Team.

8.3 Payment Scheduling and Agreed Terms of Trade With Creditors

Our policy is to pay all creditors as per the agreed terms of trading.

8.4 Arrangements for Monitoring Debtors / Creditors Levels

The Finance Manager is responsible for monitoring the levels of debtors and creditors.

8.5 Procedures for Banking of Funds

All money received by an officer on behalf of the Council will, without unreasonable delay, be passed to the Exchequer Team to deposit in the Council's banking accounts. Cash and cheques banked the previous day will be taken into account in the daily cash flow.

8.6 Practices Concerning Prepayments to Obtain Benefits

The Council has no formal arrangement in place. Where such opportunities arise, the prepayment would be sought and authorised by the Head of Finance.

TMP 9 Money Laundering

9.1 Proceeds of Crime Act 2002

Money laundering has the objective of concealing the origin of money generated through criminal activity. Legislation has given a higher profile to the need to report suspicions of money laundering. The Proceeds of Crime Act (POCA) 2002 established the main offences relating to money laundering. In summary, these are:

- concealing, disguising, converting, transferring or removing criminal property from England and Wales, from Scotland or from Northern Ireland
- being concerned in an arrangement which a person knows or suspects facilitates the acquisition, retention, use or control of criminal property
- acquiring, using or possessing criminal property.

These apply to all persons in the UK in a personal and professional capacity. Any person involved in any known or suspected money-laundering activity in the UK risks a criminal conviction. Other offences under the POCA include:

- failure to disclose money-laundering offences
- tipping off a suspect, either directly or indirectly
- doing something that might prejudice an investigation – for example, falsifying a document.

9.2 The Terrorism Act 2000

This act made it an offence of money laundering to become concerned in an arrangement relating to the retention or control of property likely to be used for the purposes of terrorism, or resulting from acts of terrorism. All individuals and businesses in the UK have an obligation to report knowledge, reasonable grounds for belief or suspicion about the proceeds from, or finance likely to be used for, terrorism or its laundering, where it relates to information that comes to them in the course of their business or employment.

9.3 The Money Laundering Regulations 2007, 2012 and 2015

Organisations pursuing relevant business (especially those in the financial services industry regulated by the FSA) are required to appoint a nominated officer and implement internal reporting procedures; train relevant staff in the subject; establish internal procedures with respect to money laundering; obtain, verify and maintain evidence and records of the identity of new clients and transactions undertaken and report their suspicions. In December 2007 the UK Government published the Money Laundering Regulations 2007, which replaced the Money Laundering Regulations 2003.

9.4 Local authorities

Public service organisations and their staff are subject to the full provisions of the Terrorism Act 2000 and subsequent Terrorism Acts and may commit most of the principal offences under the POCA, but are not legally obliged to apply the provisions of the Money Laundering Regulations 2007, 2012 and 2015. However, as responsible public bodies, they should employ policies and procedures which reflect the essence of the UK's anti-terrorist financing, and anti-money laundering, regimes. Accordingly this Council will do the following: -

Responsible Section/Team	Finance	Version/Status	2022/23 v1
Responsible Author	Finance Manager	Report submitted to	Full Council
Date Amended now	Feb 2022	Meeting date	Feb 2022
Due for Review	Feb 2023	Page	30

- a) evaluate the prospect of laundered monies being handled by them
- b) determine the appropriate safeguards to be put in place
- c) require every person engaged in treasury management to make themselves aware of their personal and legal responsibilities for money laundering awareness
- d) make all its staff aware of their responsibilities under POCA
- e) appoint a member of staff to whom they can report any suspicions. This person is Head of Finance
- f) in order to ensure compliance is appropriately managed, this Council will require senior management to give appropriate oversight, analysis and assessment of the risks of clients and work/product types, systems for monitoring compliance with procedures and methods of communicating procedures and other information to personnel.
- g) The officer responsible for the creation and monitoring the implementation of a corporate anti money laundering policy and procedures is The Head of Legal and Democratic Services and it shall be a requirement that all services and departments implement this corporate policy and procedures.

9.5 Procedures for Establishing Identity / Authenticity Of Lenders

It is not a requirement under POCA for local authorities to require identification from every person or organisation it deals with. However, in respect of treasury management transactions, there is a need for due diligence and this will be effected by following the procedures below.

The Council does not accept loans from individuals.

All loans are obtained from the PWLB, other local authorities or from authorised institutions under the Financial Services and Markets Act 2000. This register can be accessed through the FSA website on www.fca.gov.uk.

When repaying loans, the procedures in 9.6 will be followed to check the bank details of the recipient.

9.6 Methodologies for Identifying Deposit Takers

In the course of its treasury activities, the Council will only lend money to or invest with those counterparties that are on its approved lending list. These will be local authorities, the PWLB, Bank of England and authorised deposit takers under the Financial Services and Markets Act 2000. The FSA register can be accessed through their website on www.fca.gov.uk.

All transactions will be carried out by BACS or CHAPs for making deposits or repaying loans.

TMP 10 Training and Qualifications

The Council recognises that relevant individuals will need appropriate levels of training in treasury management due to its increasing complexity. There are two categories of relevant individuals: -

- a) Treasury management staff employed by the Council
- b) Members charged with governance of the treasury management function

All treasury management staff should receive appropriate training relevant to the requirements of their duties at the appropriate time. The Council operates a Personal Development Review system which identifies the training requirements of individual members of staff engaged on treasury related activities.

Additionally, training may also be provided on the job and it will be the responsibility of the Head of Finance to ensure that all staff under his / her authority receive the level of training appropriate to their duties. This will also apply to those staff who from time to time cover for absences from the treasury management team.

10.1 Details of Approved Training Courses

Treasury management staff and members will go on courses provided by our treasury management consultants, CIPFA, money brokers etc.

10.2 Records of Training Received by Treasury Staff

The People and Policy department will maintain records on all staff and the training they receive.

10.3 Record of Secondment of Senior Management

Records will be kept of senior management who are seconded into the treasury management section in order to gain firsthand experience of treasury management operations.

10.4 Statement of Professional Practice (SOPP)

1. Where the Chief Financial Officer is a member of CIPFA, there is a professional need for the CFO to be seen to be committed to professional responsibilities through both personal compliance and by ensuring that relevant staff are appropriately trained.
2. All staff involved in treasury management activities must also comply with the SOPP.

10.6 Member training records

Records will be kept of all training in treasury management provided to members.

10.7 Members charged with governance

Members charged with diligence also have a personal responsibility to ensure that they have the appropriate skills and training for their role.

TMP 11 Use of External Service Providers

11.1 Details of Contracts with Service Providers, Including Bankers, Brokers, Consultants, Advisers

This Council will employ the services of other organisations to assist it in the field of treasury management. In particular, it will use external consultants to provide specialist advice in this ever more complex area. However, it will ensure that it fully understands what services are being provided and that they meet the needs of this organisation, especially in terms of being objective and free from conflicts of interest.

It will also ensure that the skills of the in house treasury management team are maintained to a high enough level whereby they can provide appropriate challenge to external advice and can avoid undue reliance on such advice.

Treasury management staff and their senior management will therefore be required to allocate appropriate levels of time to using the following sources of information so that they are able to develop suitable levels of understanding to carry out their duties, especially in challenge and avoiding undue reliance.

- The quality financial press
- Market data
- Information on government support for banks and
- The credit ratings of that government support

11.1.1 Banking Services

- a) Name of supplier of service is the NatWest Bank.
- b) Regulatory status – banking institution authorised to undertake banking activities by the FSA
- c) The branch address is:
28 Bank Street
Rawtenstall
Rossendale
Lancashire
BB4 8TS
Tel :- 0151 802 9354 (Business Banking) or
0845 302 1511 (Branch Banking)
- d) Contract commenced 1992
- e) Cost of service is variable depending on a schedule of tariffs set annually applied to volumes of transactions
- f) Payments are due monthly and quarterly

11.1.2 Money-Broking Services

The Council may use money brokers for temporary borrowing and investment and long term borrowing. It will seek to give an even spread of business amongst the approved brokers.

11.1.3 Consultants'/Advisers' Services

Treasury Consultancy Services

The Council will seek to take expert advice on interest rate forecasts, annual treasury management strategy, timing for borrowing and lending, debt rescheduling, use of various borrowing and investment instruments, how to select credit worthy counterparties to put on its approved lending list etc.

The performance of consultants will be reviewed annually by the Head of Finance to check whether performance has met expectations.

- a) Name of supplier of service is Link Treasury Solutions. Their address is 65 Gresham Street, London, EC2V 7NQ
- b) Regulatory status: investment adviser authorised by the FCA
- c) Cost of service in 2020/21 was £7,500.
- d) Payments are due bi-annually in April and October

11.1.4 Procedures and Frequency for Tendering Services

As per the Council's contract procedure rules.

TMP 12 Corporate Governance

12.1.1 List of documents to be made available for public inspection

- a. The Council is committed to the principle of openness and transparency in its treasury management function and in all of its functions.
- b. It has adopted the CIPFA Code of Practice on Treasury management and implemented key recommendations on developing Treasury Management Practices, formulating a Treasury Management Policy Statement and implementing the other principles of the Code.
- c. The following documents are available for public inspection: -
 - Treasury Management Strategy Statement
 - including the Annual Investment Strategy
 - Treasury Management Policy Statement
 - Minimum Revenue Provision Policy Statement
 - Treasury Management monitoring reports produced as part of the Council's regular financial monitoring reports to Cabinet.
 - Annual Statement of Accounts
 - Annual Revenue Budget and MTFS
 - Capital Strategy and 5 Year Capital Programme
 - Minutes of Council / Cabinet / committee meetings
 - Third party expenditure via quarterly corporate spend analysis published on the website to comply with the coalition government's transparency agenda.

IMP Investment Management Practices for Investments that are not part of Treasury Management activity

This Council recognises that investments taken for non-treasury management purposes require careful investment management. Such investments include loans supporting service outcomes, investments in subsidiaries, or investment property portfolios.

For Rossendale Borough Council this could include developments at Futures Park, plots 1 & 5. The Council's Investment Properties were valued at a net book value of £550k at the 31st March 2021.

The Council's annual treasury management strategy, Capital Strategy, Investment Strategy and similar documents will cover all the organisation's investments, and will set out, where relevant, specific policies and arrangements for non-treasury investments.

This schedule will include a summary of existing material investments, subsidiaries, joint ventures and liabilities including financial guarantees and contingent liabilities and the authority's risk exposure. It will be recognised that the risk appetite for these activities may differ from that for treasury management and this is contained within the Council's approved Capital Strategy.

CIPFA recommends separate Investment Management Practices (IMPs) for non-treasury activities and acknowledges reference to TMPs 1, 2, 5, 6, and 10 for the management of **Risk, Performance, Governance, Reporting** and **Training**, respectively.

Information suggested for non-treasury investments:

1.1 Risk management

The cross-sectoral guidance recognises the categories of investments as follows:

- For treasury management purposes
- For service delivery purposes
- For commercial purposes, including non-financial assets held primarily for financial return, such as commercial properties.

Organisations are required to establish investment management practices for their non-treasury management investments, similar to their treasury management practices. The IMP recommends a schedule for each such investment portfolio, setting out the investment objectives, investment criteria, risk management arrangements, decision-making and reporting arrangements, performance measurement and management, and arrangements for training and qualifications.

The basic principle is that the TM Code covers all investments, and the organisation should ensure that it has due diligence, investment management and risk management arrangements in place and monitored actively for its service and commercial investment portfolios, as well as for its treasury management investments.
