Faith groups cover a wide range of groupings, the most common of which are Muslims, Buddhists, Jews, Christians, Sikhs, Hindus. Consider faith categories individually and collectively when considering positive and negative impacts.

The categories used in the Race section are those used in the 2001 census. Consideration should be given to the needs of specific communities within the broad categories such as Bangladeshi people and to the needs of other communities such as Turkish/Turkish Cypriot, Greek/Greek Cypriot, Italian and Polish that do not appear as separate categories in the census.

5. If you have indicated there is a negative impact on any group, is that impact:

No Negative Impact

Explain how:

b) Could you improve the strategy, project or policy's positive impact?

Explain how:

The programme is subject to the availability of external funding, if more funding becomes available the number of properties directly benefiting from the housing renewal activity will be increased

You may wish to use the action sheet at the end of Section Two.

7. If there is no evidence that the strategy, policy or project promotes equality, equal opportunities or improved relations – could it be adapted so that it does?
