1. Introduction

1.1 Background

The Council is required to operate a balanced budget, which broadly means that cash raised during the year will meet cash expenditure. Part of the treasury management operation is to ensure that this cash flow is adequately planned, with cash being available when it is needed. Surplus monies are invested in low risk counterparties or instruments commensurate with the Council's low risk appetite, providing adequate liquidity initially before considering investment return.

The second main function of the treasury management service is the funding of the Council's capital plans. These capital plans provide a guide to the borrowing need of the Council, essentially the longer term cash flow planning to ensure that the Council can meet its capital spending obligations. This management of longer term cash may involve arranging long or short term loans, or using longer term cash flow surpluses. On occasion any debt previously drawn may be restructured to meet Council risk or cost objectives.

CIPFA defines treasury management as:

“The management of the local authority's investments and cash flows, its banking, money market and capital market transactions; the effective control of the risks associated with those activities; and the pursuit of optimum performance consistent with those risks.”

1.2 Reporting requirements

The Council is required to receive and approve, as a minimum, three main reports each year, which incorporate a variety of policies, estimates and actuals. These reports are required to be adequately reviewed and scrutinised by committee before being recommended to the Council. This role is undertaken by the Cabinet.

Prudential and Treasury Indicators and Treasury Strategy (This report) - The first, and most important report covers:

- the capital plans (including prudential indicators);
- a Minimum Revenue Provision Policy or MRP (how residual capital expenditure is charged to revenue over time);
- the Treasury Management Strategy (how the investments and borrowings are to be organised) including treasury indicators; and
- an investment strategy (the parameters on how investments are to be managed).

A Mid Year Treasury Management Reporting – This will update members with the progress of the capital position, amending prudential indicators as necessary, and whether the treasury strategy is meeting the strategy or whether any policies require revision. This is included within the Council's regular financial monitoring report.

An Annual Treasury Reporting – This provides details of a selection of actual prudential and treasury indicators and actual treasury operations compared to the estimates within the strategy. This is included within the Council's end of year financial monitoring report.

1.3 Treasury Management Strategy for 2012/13

The strategy for 2012/13 covers two main areas:

Capital Issues

- the capital plans and the prudential indicators;
- the MRP strategy.

Treasury management Issues

- the current treasury position;
- treasury indicators which will limit the treasury risk and activities of the Council;
- prospects for interest rates;
- the borrowing strategy;
- policy on borrowing in advance of need;
- debt rescheduling;
- the investment strategy;
- creditworthiness policy; and
- policy on use of external service providers.

These elements cover the requirements of the Local Government Act 2003, the CIPFA Prudential Code, the CLG MRP Guidance, the CIPFA Treasury Management Code and the CLG Investment Guidance.

2. The Capital Prudential Indicators 2012/13 – 2014/15

The Council's capital expenditure plans are the key driver of treasury management activity. The output of the capital expenditure plans are reflected in prudential indicators, which are designed to assist members overview and confirm capital expenditure plans.

Capital Expenditure.

This prudential Indicator is a summary of the Council's capital expenditure plans, both those agreed previously, and those forming part of this budget cycle.

Capital Expenditure	2010/11 Actual £000	2011/12 Estimate £000	2012/13 Estimate £000	2013/14 Estimate £000	2014/15 Estimate £000
Total	3,994	8,461	936	1,025	596

NB – The above represents the programme based on available resources.

Other long term liabilities.

Council does not currently have any long term liabilities.

Responsible Section/Team	Financial Services	Page	4
Responsible Author	Head of Finance	Version	5
Date last amended	February 2012	Due for review	Feb 2013

The table below summarises the above capital expenditure plans and how these plans are being financed by capital or revenue resources. Any shortfall of resources results in a funding need (borrowing).

Capital Expenditure	2010/11 Actual £000	2011/12 Estimate £000	2012/13 Estimate £000	2013/14 Estimate £000	2014/15 Estimate £000
Financed by:					
Capital receipts	627	998	403	129	100
Capital grants	2,195	1,843	523	523	386
Earmarked reserves	-	2,082	-	-	-
Revenue	271	373	10	210	110
Net financing need for the year	901	3,165	-	163	-

The Council's Borrowing Need (the Capital Financing Requirement)

The second prudential indicator is the Council's Capital Financing Requirement (CFR). The CFR is simply the total historic outstanding capital expenditure which has not yet been paid for from either revenue or capital resources. It is essentially a measure of the Council's underlying borrowing need. Any capital expenditure above, which has not immediately been paid for, will increase the CFR.

Following accounting changes the CFR includes any other long term liabilities (e.g. PFI schemes, finance leases) brought onto the balance sheet. Whilst this increases the CFR, and therefore the Council's borrowing requirement, these types of scheme include a borrowing facility and so the Council is not required to separately borrow for these schemes. The Council currently has no such schemes within the CFR.

Responsible Section/Team	Financial Services	Page	5
Responsible Author	Head of Finance	Version	5
Date last amended	February 2012	Due for review	Feb 2013

The Council is asked to approve the CFR projections below:

	2010/11 Actual £000	2011/12 Estimate £000	2012/13 Estimate £000	2013/14 Estimate £000	2014/15 Estimate £000
Capital Financing Requirement:					
Total CFR	4,074	6,686	5,998	5,435	4,712
Movement in CFR	355	2,612	(688)	(563)	(723)

Movement in CFR represented by:					
Net financing need for the year (above)	901	3,165	-	163	-
Less MRP and other financing movements	(546)	(553)	(688)	((726)	((723)
Movement in CFR	355	2,612	(688)	(563)	(723)

MRP Policy Statement

The Council is required to pay off an element of the accumulated General Fund capital spend each year (the CFR) through a revenue charge (the Minimum Revenue Provision - MRP), although it is also allowed to undertake additional voluntary payments if required (voluntary revenue provision - VRP).

DCLG Regulations have been issued which require the full Council to approve **an MRP Statement** in advance of each year. A variety of options are provided to councils, so long as there is a prudent provision. The Council is recommended to approve the following MRP Statement :

Since the 1st April 2008 all unsupported borrowing (including PFI and finance leases when applicable) has been repaid using the following MRP policy:

- **Asset Life Method** – MRP will be based on the estimated life of the assets, in accordance with the proposed regulations (this option must be applied for any expenditure capitalised under a Capitalisation Direction);

This provides for a reduction in the borrowing need over approximately the asset's life.

The Use of the Council's Resources and the Investment Position

The application of resources (capital receipts, reserves etc.) to either finance capital expenditure or other budget decisions to support the revenue budget will have an ongoing impact on investments unless resources are supplemented each year from new sources (asset sales etc.). Detailed below are estimates of the year end balances for each resource and anticipated day to day cash flow balances.

Responsible Section/Team	Financial Services	Page	6

Date last amended	February 2012	Due for review	Feb 2013

Year End Resources	2010/11 Actual £000	2011/12 Estimate £000	2012/13 Estimate £000	2013/14 Estimate £000	2014/15 Estimate £000
General Fund balance	963	1,002	1,002	1,002	1,002
Earmarked reserves	5,950	3,430	2,254	1,578	1,190
Capital receipts	1,224	332	-	-	-
Government Grants Unapplied	1,414	625	438	268	235
Other					
Total core funds	9,551	5,389	3,694	2,848	2,427
Working capital*	2,393	935	739	777	895
Under/(over) borrowing**	(342)	2,454	1,955	1,571	1,032
Expected investments	7,500	2,000	1,000	500	500

*Working capital balances shown are estimated year end; these may be higher mid year

Affordability Prudential Indicators

The previous sections cover the overall capital and control of borrowing prudential indicators, but within this framework prudential indicators are required to assess the affordability of the capital investment plans. These provide an indication of the impact of the capital investment plans on the Council's overall finances. The Council is asked to approve the following indicators:

Actual and estimates of the ratio of financing costs to net revenue stream. This indicator identifies the trend in the cost of capital (borrowing and other long term obligation costs net of investment income) against the net revenue stream.

	2010/11 Actual %	2011/12 Estimate %	2012/13 Estimate %	2013/14 Estimate %	2014/15 Estimate %
Total	1.8%	1.9%	1.9%	1.8%	1.7%

The estimates of financing costs include current commitments and the proposals in this budget report.

Estimates of the incremental impact of capital investment decisions on council tax. This indicator identifies the revenue costs associated with proposed changes to the three year capital programme recommended in this budget report compared to the Council's existing approved commitments and current plans. The assumptions are based on the budget, but will invariably include some estimates, such as the level of Government support, which are not published over a three year period.

Incremental impact of capital investment decisions on the band D council tax

Responsible Section/Team	Financial Services	Page	7
Responsible Author	Head of Finance	Version	5
Date last amended	February 2012	Due for review	Feb 2013

	2009/10 Actual £	2011/12 Estimate £	2012/13 Estimate £	2013/14 Estimate £	2014/15 Estimate £
Council tax - band D	£5.94	£5.83	-	£1.07	-

The above simply represents the movement of the net financing need (as above) over the life of the asset divided by the Band D tax base. The impact of such financing has in fact been offset by other operational savings.

3. Treasury Management Strategy

The capital expenditure plans set out in Section 2 provide details of the service activity of the Council. The treasury management function ensures that the Council's cash is organised in accordance with the the relevant professional codes, so that sufficient cash is available to meet this service activity. This will involve both the organisation of the cash flow and, where capital plans require, the organisation of appropriate borrowing facilities. The strategy covers the relevant treasury / prudential indicators, the current and projected debt positions and the annual investment strategy.

3.1 Current Portfolio Position

The Council's treasury portfolio position at 31 March 2011, with forward projections are summarised below. The table shows the actual external debt (the treasury management operations), against the underlying capital borrowing need (the Capital Financing Requirement - CFR), highlighting any over or under borrowing.

	2010/11 Actual £000	2011/12 Estimate £000	2012/13 Estimate £000	2013/14 Estimate £000	2014/15 Estimate £000
External Debt					
Debt at 1 April	4,600	4,416	4,232	4,048	3,864
Expected change in Debt	(184)	(184)	(184)	(184)	(184)
Other long-term liabilities (OLTL)	-	-	-	-	-
Expected change in OLTL	-	-	-	-	-
Actual debt at 31 March	4,416	4,232	4,048	3,864	3,680
The Capital Financing Requirement	4,074	6,686	5,998	5,435	4,712
Under / (over) borrowing	(342)	2,454	1,950	1,571	1,032

Total investments at 31 March					
Investments	7,500	2,000	1,000	500	500
Investment change	(500)	(5,500)	(1,000)	(500)	-

Net Debt	(3,084)	2,232	3,048	3,364	3,180
-----------------	----------------	--------------	--------------	--------------	--------------

Within the prudential indicators there are a number of key indicators to ensure that the Council operates its activities within well defined limits. One of these is that the Council needs to ensure that its total debt, net of any investments, does not, except in the short term, exceed the total of the CFR in the preceding year plus the estimates of any additional CFR for 2012/13 and the following two financial years (shown as net borrowing above). This allows some flexibility for limited early borrowing for future years, but ensures that borrowing is not undertaken for revenue purposes.

The Head of Financial Services reports that the Council complied with this prudential indicator in the current year and does not envisage difficulties for the future. This view takes into account current commitments, existing plans, and the proposals in this budget report.

Responsible Section/Team	Financial Services	Page	9

3.2. Treasury Indicators: Limits to Borrowing Activity

The Operational Boundary. This is the limit beyond which external debt is not normally expected to exceed. In most cases, this would be a similar figure to the CFR, but may be lower or higher depending on the levels of actual debt.

Operational boundary	2011/12 Estimate £m	2012/13 Estimate £m	2013/14 Estimate £m	2014/15 Estimate £m
Debt	7.3	6.5	6.9	5.2
Other long term liabilities	0.0	0.0	0.0	0.0
Total	7.3	6.5	6.9	5.2

The Authorised Limit for external debt. A further key prudential indicator represents a control on the maximum level of borrowing. This represents a limit beyond which external debt is prohibited, and this limit needs to be set or revised by the full Council. It reflects the level of external debt which, while not desired, could be afforded in the short term, but is not sustainable in the longer term.

1. This is the statutory limit determined under section 3 (1) of the Local Government Act 2003. The Government retains an option to control either the total of all councils' plans, or those of a specific council, although this power has not yet been exercised.
2. The Council is asked to approve the following Authorised Limit:

Authorised limit	2011/12 Estimate £m	2012/13 Estimate £m	2013/14 Estimate £m	2014/15 Estimate £m
Debt	5.2	5.0	4.9	4.7
Other long term liabilities	0.0	0.0	0.0	0.0
Total	5.2	5.0	4.9	4.7

3.3. Prospects for Interest Rates

The Council has appointed Sector as its treasury advisor and part of their service is to assist the Council to formulate a view on interest rates. Appendix 1 draws together a number of current City forecasts for short term (Bank Rate) and longer fixed interest rates. The following table gives the Sector central view.

Annual Average %	Bank Rate	Money Rates		PWLB Borrowing Rates		
		3 month	1 year	5 year	25 year	50 year
March 2012	0.50	0.70	1.50	2.30	4.20	4.30
June 2012	0.50	0.70	1.50	2.30	4.20	4.30
Sept 2012	0.50	0.70	1.50	2.30	4.30	4.40
Dec2012	0.50	0.70	1.60	2.40	4.30	4.40
March 2013	0.50	0.75	1.70	2.50	4.40	4.50
June 2013	0.50	0.80	1.80	2.60	4.50	4.60
Sept 2013	0.75	0.90	1.90	2.70	4.60	4.70
Dec 2013	1.00	1.20	2.20	2.80	4.70	4.80
March 2014	1.25	1.40	2.40	2.90	4.80	4.90
June 2014	1.50	1.60	2.60	3.10	4.90	5.00

Growth in the UK economy is expected to be weak in the next two years and there is a risk of a technical recession (i.e. two quarters of negative growth). Bank Rate, currently 0.5%, underpins investment returns and is not expected to start increasing until quarter 3 of 2013 despite inflation currently being well above the Monetary Policy Committee inflation target. Hopes for an export led recovery appear likely to be disappointed due to the Eurozone sovereign debt crisis depressing growth in the UK's biggest export market. The Comprehensive Spending Review, which seeks to reduce the UK's annual fiscal deficit, will also depress growth during the next few years.

Fixed interest borrowing rates are based on UK gilt yields. The outlook for borrowing rates is currently much more difficult to predict. The UK total national debt is forecast to continue rising until 2015/16; the consequent increase in gilt issuance is therefore expected to be reflected in an increase in gilt yields over this period. However, gilt yields are currently at historically low levels due to investor concerns over Eurozone sovereign debt and have been subject to exceptionally high levels of volatility as events in the Eurozone debt crisis have evolved.

This challenging and uncertain economic outlook has a several key treasury management implications:

- The Eurozone sovereign debt difficulties, most evident in Greece, provide a clear indication of much higher counterparty risk. This continues to suggest the use of higher quality counterparties for shorter time periods;
- Investment returns are likely to remain relatively low during 2012/13;
- Borrowing interest rates are currently attractive, but may remain low for some time. The timing of any borrowing will need to be monitored carefully;
- There will remain a cost of capital – any borrowing undertaken that results in an increase in investments will incur a revenue loss between borrowing costs and investment returns.

Responsible Section/Team	Financial Services	Page	11
Responsible Author	Head of Finance	Version	5
Date last amended	February 2012	Due for review	Feb 2013

3.4 Borrowing Strategy

The Council is currently maintaining an under-borrowed position. This means that the capital borrowing need (the Capital Financing Requirement), has not been fully funded with loan debt as cash supporting the Council's reserves, balances and cash flow has been used as a temporary measure. This strategy is prudent as investment returns are low and counterparty risk is high.

Against this background and the risks within the economic forecast, caution will be adopted with the 2012/13 treasury operations. The Head of Financial Services will monitor interest rates in financial markets and adopt a pragmatic approach to changing circumstances:

- *if it was felt that there was a significant risk of a sharp FALL in long and short term rates, e.g. due to a marked increase of risks around relapse into recession or of risks of deflation, then long term borrowings will be postponed, and potential rescheduling from fixed rate funding into short term borrowing will be considered.*
- *if it was felt that there was a significant risk of a much sharper RISE in long and short term rates than that currently forecast, perhaps arising from a greater than expected increase in world economic activity or a sudden increase in inflation risks, then the portfolio position will be re-appraised with the likely action that fixed rate funding will be drawn whilst interest rates were still relatively cheap.*

Any decisions will be reported to Cabinet at the next available opportunity.

Treasury Management Limits on Activity

There are three debt related treasury activity limits. The purpose of these are to restrain the activity of the treasury function within certain limits, thereby managing risk and reducing the impact of any adverse movement in interest rates. However, if these are set to be too restrictive they will impair the opportunities to reduce costs / improve performance. The indicators are:

- Upper limits on variable interest rate exposure. This identifies a maximum limit for variable interest rates based upon the debt position net of investments Upper limits on fixed interest rate exposure. This is similar to the previous indicator and covers a maximum limit on fixed interest rates;
- Maturity structure of borrowing. These gross limits are set to reduce the Council's exposure to large fixed rate sums falling due for refinancing, and are required for upper and lower limits.

The Council is asked to approve the following treasury indicators and limits:

	2012/13	2013/14	2014/15
Interest rate Exposures			
	Upper	Upper	Upper
Limits on fixed interest rates based on net debt	100%	100%	100%
Limits on variable interest rates based on net debt	0%	0%	0%

Responsible Section/Team	Financial Services	Page	12
Responsible Author	Head of Finance	Version	5
Date last amended	February 2012	Due for review	Feb 2013

Limits on fixed interest rates:			
• <i>Debt only</i>	100%	100%	100%
• <i>Investments only</i>	90%	90%	90%
Maturity Structure of fixed interest rate borrowing 2012/13			
	Lower	Upper	
Under 12 months	0%	5%	
12 months to 2 years	0%	10%	
2 years to 5 years	0%	15%	
5 years to 10 years	0%	25%	
10 years and above	0%	45%	
Maturity Structure of variable interest rate borrowing 2012/13			
	Lower	Upper	
<i>Under 12 months</i>	0%	0%	
<i>12 months to 2 years</i>	0%	0%	
<i>2 years to 5 years</i>	0%	0%	
<i>5 years to 10 years</i>	0%	0%	
<i>10 years and above</i>	0%	0%	

Responsible Section/Team	Financial Services	Page	13
Responsible Author	Head of Finance	Version	5
Date last amended	February 2012	Due for review	Feb 2013

3.5 Policy on Borrowing in Advance of Need

The Council will not borrow more, than or in advance of its needs, purely in order to profit from the investment of the extra sums borrowed. Any decision to borrow in advance will be within forward approved Capital Financing Requirement estimates, and will be considered carefully to ensure that value for money can be demonstrated and that the Council can ensure the security of such funds.

Borrowing in advance will be made within the constraints that:

- It will be limited to no more than 100% of the expected increase in borrowing need (CFR) over the three year planning period; and
- Would not look to borrow more than 18 months in advance of need.

Risks associated with any borrowing in advance activity will be subject to prior appraisal and subsequent reporting through the mid-year or annual reporting mechanism.

3.6. Debt Rescheduling

As short term borrowing rates will be considerably cheaper than longer term fixed interest rates, there may be potential opportunities to generate savings by switching from long term debt to short term debt. However, these savings will need to be considered in the light of the current treasury position and the size of the cost of debt repayment (premiums incurred).

The reasons for any rescheduling to take place will include:

- the generation of cash savings and / or discounted cash flow savings;
- helping to fulfil the treasury strategy;
- enhance the balance of the portfolio (amend the maturity profile and/or the balance of volatility).

Consideration will also be given to identify if there is any residual potential for making savings by running down investment balances to repay debt prematurely as short term rates on investments are likely to be lower than rates paid on current debt.

All rescheduling will be reported to the Cabinet, at the earliest meeting following its action.

Responsible Section/Team	Financial Services	Page	14
Responsible Author	Head of Finance	Version	5
Date last amended	February 2012	Due for review	Feb 2013

3.7. Annual Investment Strategy

3.7.1 Investment Policy

The Council's investment policy has regard to the CLG's Guidance on Local Government Investments ("the Guidance") and the 2011 revised CIPFA Treasury Management in Public Services Code of Practice and Cross Sectoral Guidance Notes ("the CIPFA TM Code"). The Council's investment priorities will be security first, liquidity second, then return.

In accordance with the above, and in order to minimise the risk to investments, the Council has below clearly stipulated the minimum acceptable credit quality of counterparties for inclusion on the lending list. The creditworthiness methodology used to create the counterparty list fully accounts for the ratings and watches published by all three ratings agencies with a full understanding of what the ratings reflect in the eyes of each agency. Using the Sector ratings service banks' ratings are monitored on a real time basis with knowledge of any changes notified electronically as the agencies notify modifications.

Further, the Council's officers recognise that ratings should not be the sole determinant of the quality of an institution and that it is important to continually assess and monitor the financial sector on both a micro and macro basis and in relation to the economic and political environments in which institutions operate. The assessment will also take account of information that reflects the opinion of the markets. To this end the Council will engage with its advisors to maintain a monitor on market pricing such as "Credit Default Swaps" (CDS) and overlay that information on top of the credit ratings. This is encapsulated within the credit methodology provided by the advisors, Sector.

Other information sources used will include the financial press, share price and other such information pertaining to the banking sector in order to establish the most robust scrutiny process on the suitability of potential investment counterparties.

The aim of the strategy is to generate a list of highly creditworthy counterparties which will also enable diversification and thus avoidance of concentration risk.

The intention of the strategy is to provide security of investment and minimisation of risk.

Investment instruments identified for use in the financial year are listed in appendix 3 and 4 under the 'Specified' and 'Non-Specified' Investments categories. Counterparty limits will be as set through the Council's Treasury Management Practices – Schedules.

3.7.2 Creditworthiness policy

This Council applies the creditworthiness service provided by Sector. This service employs a sophisticated modelling approach utilising credit ratings from the three main credit rating agencies - Fitch, Moodys and Standard and Poors. The credit ratings of counterparties are supplemented with the following overlays:

- credit watches and credit outlooks from credit rating agencies;
- CDS spreads to give early warning of likely changes in credit ratings;
- sovereign ratings to select counterparties from only the most creditworthy countries.

This modelling approach combines credit ratings, credit watches and credit outlooks in a weighted scoring system which is then combined with an overlay of CDS spreads for which

Responsible Section/Team	Financial Services	Page	15
Responsible Author	Head of Finance	Version	5
Date last amended	February 2012	Due for review	Feb 2013

the end product is a series of colour coded bands which indicate the relative creditworthiness of counterparties. These colour codes are used by the Council to determine the duration for investments. The Council will therefore use counterparties within the following durational bands:

- Yellow 5 years *
- Purple 2 years
- Blue 1 year (only applies to nationalised or semi nationalised UK Banks)
- Orange 1 year
- Red 6 months
- Green 3 months
- No Colour not to be used

** Sector note: this category is for AAA rated Government debt or its equivalent; please also see collateralised deposits added into appendix 4 as an investment instrument.*

This methodology does not apply the approach suggested by CIPFA of using the lowest rating from all three rating agencies to determine creditworthy counterparties. The Sector creditworthiness service uses a wider array of information than just primary ratings and by using a risk weighted scoring system, does not give undue preponderance to just one agency's ratings.

Typically the minimum credit ratings criteria the Council use will be a short term rating (Fitch or equivalents) of Short Term rating F1, Long Term rating A-, Individual of Viability ratings of C- (or BB+), and a Support rating of 3. There may be occasions when the counterparty ratings from one rating agency are marginally lower than these ratings but may still be used. In these instances consideration will be given to the whole range of ratings available, or other topical market information, to support their use.

All credit ratings will be monitored on a regular basis. The Council is alerted to changes to ratings of all three agencies through its use of the Sector creditworthiness service.

- if a downgrade results in the counterparty / investment scheme no longer meeting the Council's minimum criteria, its further use as a new investment will be withdrawn immediately.
- in addition to the use of credit ratings the Council will be advised of information in movements in Credit Default Swap against the iTraxx benchmark and other market data on a weekly basis. Extreme market movements may result in downgrade of an institution or removal from the Council's lending list.

Sole reliance will not be placed on the use of this external service. In addition this Council will also use market data and market information, information on government support for banks and the credit ratings of that government support.

3.7.3 Country limits

The Council has determined that it will only use approved counterparties from countries with a minimum sovereign credit rating of AAA from Fitch. The list of countries that qualify using this credit criteria as at the date of this report are shown in Appendix 5. This list will be added to, or deducted from, by officers should ratings change in accordance with this policy.

The Council's investment policy has regard to the CLG's Guidance on Local Government Investments ("the Guidance") and the 2011 revised CIPFA Treasury Management in Public

Responsible Section/Team	Financial Services	Page	16
Responsible Author	Head of Finance	Version	5
Date last amended	February 2012	Due for review	Feb 2013

Services Code of Practice and Cross Sectoral Guidance Notes (“the CIPFA TM Code”). The Council’s investment priorities will be security first, liquidity second, then return.

Investment instruments identified for use in the financial year are listed in appendix 4 under the ‘Specified’ and ‘Non-Specified’ Investments categories. Counterparty limits will be as set through the Council’s Treasury Management Practices – Schedules.

Investment Counterparty Selection Criteria - The primary principle governing the Council’s investment criteria is the security of its investments, although the yield or return on the investment is also a key consideration. After this main principle the Council will ensure that:

- **It maintains a policy covering both the categories of investment types it will invest in, criteria for choosing investment counterparties with adequate security, and monitoring their security. This is set out in the Specified and Non-Specified investment sections below; and**
- **It has sufficient liquidity in its investments. For this purpose it will set out procedures for determining the maximum periods for which funds may prudently be committed. These procedures also apply to the Council’s prudential indicators covering the maximum principal sums invested.**

The Head of Financial Services will maintain a counterparty list in compliance with the following criteria and will revise the criteria and submit them to Council for approval as necessary. These criteria are separate to that which determines which types of investment instrument are either Specified or Non-Specified as it provides an overall pool of counterparties considered high quality which the Council may use, rather than defining what types of investment instruments are to be used.

The rating criteria use the **lowest common denominator** method of selecting counterparties and applying limits. This means that the application of the Council’s minimum criteria will apply to the lowest available rating for any institution. For instance, if an institution is rated by two agencies, one meets the Council’s criteria, the other does not, the institution will fall outside the lending criteria. This is in compliance with a CIPFA Treasury Management Panel recommendation in March 2009 and the CIPFA Treasury Management Code of Practice.

Credit rating information is supplied by Sector, our treasury consultants, on all active counterparties that comply with the criteria below. Any counterparty failing to meet the criteria would be omitted from the counterparty (dealing) list. Any rating changes, rating watches (notification of a likely change), rating outlooks (notification of a possible longer term change) are provided to officers almost immediately after they occur and this information is considered before dealing. For instance, a negative rating watch applying to a counterparty at the minimum Council criteria will be suspended from use, with all others being reviewed in light of market conditions.

The criteria for providing a pool of high quality investment counterparties (both Specified and Non-specified investments) is:

- Banks 1 - good credit quality – the Council will only use banks which:
 - i. are UK banks; and/or
 - ii. are non-UK and domiciled in a country which has a minimum sovereign long term rating of AAA

and have, as a minimum, the following Fitch, Moody’s and Standard and Poors credit ratings (where rated):

 - i. Short term - F1

Responsible Section/Team	Financial Services	Page	17
Responsible Author	Head of Finance	Version	5
Date last amended	February 2012	Due for review	Feb 2013

- ii. Long term – A
 - Banks 2 – Part nationalised UK banks – Lloyds Bank and Royal Bank of Scotland. These banks can be included if they continue to be part nationalised or they meet the ratings in Banks 1 above.
 - Banks 3 – The Council's own banker for transactional purposes if the bank falls below the above criteria, although in this case balances will be minimised in both monetary size and time.
 - Bank subsidiary and treasury operation -. The Council will use these where the parent bank has provided an appropriate guarantee or has the necessary ratings outlined above.
 - Local authorities, parish councils etc
 - Supranational institutions

Country and sector considerations - Due care will be taken to consider the country, group and sector exposure of the Council's investments. In part the country selection will be chosen by the credit rating of the sovereign state in Banks 1 above. In addition:

- no more than 20% will be placed with any non-UK country at any time;
- limits in place above will apply to a group of companies;
- sector limits will be monitored regularly for appropriateness.

Use of additional information other than credit ratings. Additional requirements under the Code require the Council to supplement credit rating information. Whilst the above criteria relies primarily on the application of credit ratings to provide a pool of appropriate counterparties for officers to use, additional operational market information will be applied before making any specific investment decision from the agreed pool of counterparties. This additional market information (for example Credit Default Swaps, negative rating watches/outlooks) will be applied to compare the relative security of differing investment counterparties.

Time and monetary limits applying to investments. All investments will be made for no more than 365 days.

3. The proposed criteria for Specified and Non-Specified investments are shown in Appendix 4 for approval.

Responsible Section/Team	Financial Services	Page	18
Responsible Author	Head of Finance	Version	5
Date last amended	February 2012	Due for review	Feb 2013

3.7.4 Investment Strategy

In-house funds. Investments will be made with reference to the core balance and cash flow requirements and the outlook for short-term interest rates (i.e. rates for investments up to 12 months).

Investment returns expectations. Bank Rate is forecast to remain unchanged at 0.5% before starting to rise from quarter 3 of 2013. Bank Rate forecasts for financial year ends (March) are:

- 2011/ 2012 0.50%
- 2012/ 2013 0.50%
- 2013/ 2014 1.25%
- 2014/ 2015 2.50%

There are downside risks to these forecasts (i.e. start of increases in Bank Rate is delayed even further) if economic growth remains weaker for longer than expected. However, should the pace of growth pick up more sharply than expected there could be upside risk, particularly if Bank of England inflation forecasts for two years ahead exceed the Bank of England's 2% target rate.

The suggested budgeted investment earnings rates for returns on investments placed for periods up to three months during each financial year for the next five years are as follows:

2012/13	0.80%
2013/14	1.30%
2014/15	2.50%
2015/16	3.30%
2016/17	4.10%

Investment treasury indicator and limit - total principal funds invested for greater than 364 days. These limits are set with regard to the Council's liquidity requirements and to reduce the need for early sale of an investment, and are based on the availability of funds after each year-end.

The Council is asked to approve the treasury indicator and limit: -

Maximum principal sums invested > 364 days	2012/13 £m	2013/14 £m	2014/15 £m
Principal sums invested > 364 days	Nil	Nil	Nil

3.8 End of year investment report

At the end of the financial year, the Council will report on its investment activity as part of its Financial Monitoring and Annual Treasury Report.

3.9 External fund managers

The Council does not currently use external fund managers.

3.10 Policy on the use of external service providers

Responsible Section/Team	Financial Services	Page	19
Responsible Author	Head of Finance	Version	5
Date last amended	February 2012	Due for review	Feb 2013

The Council uses Sector as its external treasury management advisors.

The Council recognises that responsibility for treasury management decisions remains with the organisation at all times and will ensure that undue reliance is not placed upon our external service providers.

It also recognises that there is value in employing external providers of treasury management services in order to acquire access to specialist skills and resources. The Council will ensure that the terms of their appointment and the methods by which their value will be assessed are properly agreed and documented, and subjected to regular review.

3.11 Scheme of delegation

Please see appendix 6.

3.12 Role of the section 151 officer

Treasury Management Strategy Statement 2012/13

APPENDIX 2 Economic Background

4.1. Global economy

The outlook for the global economy remains clouded with uncertainty with the UK economy struggling to generate sustained recovery that offers solid optimism for the outlook for 2012, or possibly even into 2013. Consumer and business confidence levels are low and with little to boost sentiment, it is not easy to see potential for a significant increase in the growth rate in the short term.

At the centre of much of the uncertainty is the ongoing **Eurozone sovereign debt crisis** which has intensified, rather than dissipated throughout 2011. The main problem has been **Greece**, where, even with an Eurozone/IMF/ECB bailout package and the imposition of austerity measures aimed at deficit reduction, the lack of progress and the ongoing deficiency in addressing the underlying lack of competitiveness of the Greek economy, has seen an escalation of their problems. These look certain to result in a default of some kind but it currently remains unresolved if this will be either “orderly” or “disorderly”. Most commentators currently view that it is now inevitable that Greece will have to exit the Eurozone in 2012.

There is also growing concern about the situation in **Italy** and the risk that contagion has not been contained. Italy is the third biggest debtor country in the world but its prospects are limited given the poor rate of economic growth over the last decade and likely difficulties in implementing the required level of fundamental reforms in the economy. The Eurozone now has a well established track record of always doing too little too late to deal with this crisis; this augurs poorly for future prospects, especially given the rising level of electoral opposition in northern EU countries to bailing out profligate southern countries.

The US economy has encouraged with some positive news around the start of 2012 but any improvement in the weak rate of growth is likely to only generate slow progress in reducing the high level of unemployment which is acting as such a dampener on the economy. With Presidential elections due in November 2012, the current administration has been hamstrung by political gridlock with the two houses split between the main parties. In quarter 3 the Federal Reserve started “Operation Twist” in an effort to re-ignite the rate of growth in the economy. However, high levels of consumer indebtedness, a moribund housing market together with stubbornly high unemployment, will continue to weigh heavily on consumer confidence and so on the ability to generate a healthy and consistent rate of economic growth.

Hopes for broad based recovery have, therefore, focussed on the **emerging markets** but these areas have been struggling with inflationary pressures in their previously fast growth economies. China, though, has maintained its growth pattern, despite a major thrust to tighten monetary policy during 2011 to cool inflationary pressures which are now subsiding. However, some forward looking indicators are causing concern that there may not be a soft landing ahead, which would then be a further dampener on world economic growth.

4.2 UK economy

The Government’s austerity measures, aimed at getting the public sector deficit into order over the next four years, have yet to fully impact on the economy. However, coming at a time when economic growth has been weak and concerns at the risk of a technical recession (two quarters of negative growth) in 2012, it looks likely that the private sector will not make up for the negative impact of these austerity measures given the lack of an export led recovery due to the downturn in our major trading partner – the EU. The housing market, a gauge of consumer confidence, remains weak and the outlook is for house prices to be little changed for a prolonged period.

Responsible Section/Team	Financial Services	Page	23
Responsible Author	Head of Finance	Version	5
Date last amended	February 2012	Due for review	Feb 2013

Treasury Management Strategy Statement 2012/13

Economic Growth. GDP growth has, basically, flatlined since the election of 2010 and, worryingly, the economic forecasts for 2012 and beyond have been revised lower on a near quarterly basis. With concerns of a potential return to recession, the Bank of England embarked on a second round of Quantitative Easing to stimulate economic activity. It appears very likely that there will be another expansion of quantitative easing in quarter 1 2012 in order to stimulate economic growth.

Unemployment. With the impact of the Government's austerity strategy resulting in steadily increasing unemployment during 2011, there are limited prospects for any improvement in 2012 given the prospects for weak growth.

Inflation and Bank Rate. For the last two years, the MPC's contention has been that high inflation was the outcome of temporary external factors and other one offs (e.g. changes in VAT); that view remains in place with CPI inflation starting quarter 1 of 2012 at 4.8%, having peaked at 5.2% in September 2011. They remain of the view that the rate will fall back to, or below, the 2% target level within the two year horizon.

AAA rating. The ratings agencies have recently reaffirmed the UK's AAA sovereign rating and have expressed satisfaction with Government policy for deficit reduction. They have, though, warned that this could be reviewed if the policy were to change, or was seen to be failing to achieve its desired outcome. This credit position has ensured that the UK government is able to fund itself at historically low levels and, with the safe haven status from Eurozone debt also drawing in external investment, the pressure on rates has been down, and looks set to remain so for some time.

4.3 Sector's forward view

Economic forecasting remains troublesome with so many external influences weighing on the UK. There does, however, appear to be consensus among analysts that the economy remains weak and whilst there is still a broad range of views as to potential performance, they have all been downgraded throughout 2011. Key areas of uncertainty include:

- a worsening of the Eurozone debt crisis and heightened risk of the breakdown of the bloc or even of the currency itself;
- the impact of the Eurozone crisis on financial markets and the banking sector;
- the impact of the Government's austerity plan on confidence and growth and the need to rebalance the economy from services to exporting manufactured goods;
- the under-performance of the UK economy which could undermine the Government's policies that have been based upon levels of growth that increasingly seem likely to be undershot;
- a continuation of high levels of inflation ;
- the economic performance of the UK's trading partners, in particular the EU and US, with some analysts suggesting that recession could return to both;
- stimulus packages failing to stimulate growth;
- elections due in the US, Germany and France in 2012 or 2013;
- potential for protectionism i.e. an escalation of the currency war / trade dispute between the US and China.

Responsible Section/Team	Financial Services	Page	24
Responsible Author	Head of Finance	Version	5
Date last amended	February 2012	Due for review	Feb 2013

Treasury Management Strategy Statement 2012/13

The overall balance of risks remains weighted to the downside. Lack of economic growth, both domestically and overseas, will impact on confidence putting upward pressure on unemployment. It will also further knock levels of demand which will bring the threat of recession back into focus.

Sector believes that the longer run trend is for gilt yields and PWLB rates to rise due to the high volume of gilt issuance in the UK, and the high volume of debt issuance in other major western countries.

Given the weak outlook for economic growth, Sector sees the prospects for any interest rate changes before mid-2013 as very limited. There is potential for the start of Bank Rate increases to be even further delayed if growth disappoints.

APPENDIX 3 - Treasury Management Practice (TMP1) – Credit and Counterparty Risk Management Specified and Non-Specified Investments and Limits

SPECIFIED INVESTMENTS: All such investments will be sterling denominated, with **maturities up to maximum of 1 year**, meeting the minimum 'high' quality criteria where applicable.

NON-SPECIFIED INVESTMENTS: These are any investments which do not meet the Specified Investment criteria. A maximum of 0% ** will be held in aggregate in non-specified investment

A variety of investment instruments will be used, subject to the credit quality of the institution, and depending on the type of investment made it will fall into one of the above categories.

The criteria, time limits and monetary limits applying to institutions or investment vehicles are:

	* Minimum credit criteria / colour band	** Max % of total investments/ £ limit per institution	Max. maturity period
DMADF – UK Government	N/A	50% / £5m	6 months
UK Government gilts	AAA	50% / £5m	12 months
UK Government Treasury bills	AAA	50% / £5m	12 months
Money market funds	AAA	50% / £5m	Liquid
Local authorities	N/A	50% / £5m	12 months
Term deposits with banks and building societies	Yellow Purple Blue Orange Red Green No Colour	50% / £5m	Up to 5 years Up to 2 years Up to 1 year Up to 6 Months Up to 3 months Not for use
CDs or corporate bonds with banks and building societies	Yellow Purple Blue Orange Red Green No Colour	50% / £5m	Up to 5 years Up to 2 years Up to 1 year Up to 6 Months Up to 3 months Not for use

Date last amended	February 2012	Due for review	Feb 2013

Treasury Management Strategy Statement 2012/13

SPECIFIED INVESTMENTS:

(All such investments will be sterling denominated, with **maturities up to maximum of 1 year**, meeting the minimum 'high' rating criteria where applicable)

	* Minimum 'High' Credit Criteria	Use
Debt Management Agency Deposit Facility	--	In-house
Term deposits – local authorities	--	In-house
Term deposits – banks and building societies **	See note 1	In-house
Term deposits – banks and building societies **	* Short-term __, Long-term __, Individual __, Support __	Fund Managers

Term deposits with nationalised banks and banks and building societies

	Minimum Credit Criteria	Use	Max % of total investments	Max. maturity period
UK part nationalised banks	Green	In-house	50% / £5m	12 Months
Banks part nationalised by high credit rated (sovereign rating) countries – non UK	Sovereign rating (AAA)	In-house	50% / £5m	12 Months

50% equates to the percentage at the time the investment is placed with any one institution.

Certificates of deposit issued by banks and building societies covered by UK Government (explicit) guarantee	UK sovereign rating	In-house
Certificates of deposit issued by banks and building societies covered by UK Government (explicit) guarantee	UK sovereign rating	In-house
UK Government Gilts	UK sovereign rating	In-house
Treasury Bills	UK sovereign rating	In-house

Accounting treatment of investments. The accounting treatment may differ from the underlying cash transactions arising from investment decisions made by this Council. To ensure that the Council is protected from any adverse revenue impact, which may arise from these differences, we will review the accounting implications of new transactions before they are undertaken.

2. Maturities in excess of 1 year

This Council will limit its investments up to a maximum of 12 months.

Responsible Section/Team	Financial Services	Page	27

Date last amended	February 2012	Due for review	Feb 2013

Appendix 4 - Treasury Management Practice (TMP1) – Credit and Counterparty Risk Management

The CLG issued Investment Guidance in 2010, and this forms the structure of the Council's policy below. These guidelines do not apply to either trust funds or pension funds which operate under a different regulatory regime.

The key intention of the Guidance is to maintain the current requirement for councils to invest prudently, and that priority is given to security and liquidity before yield. In order to facilitate this objective the guidance requires this Council to have regard to the CIPFA publication Treasury Management in the Public Services: Code of Practice and Cross-Sectoral Guidance Notes. This Council adopted the Code on 24th February 2010 and will apply its principles to all investment activity. In accordance with the Code, the Head of Financial Services has produced its Treasury Management Practices (TMPs). This part, TMP 1(5), covering investment counterparty policy requires approval each year.

Annual Investment Strategy - The key requirements of both the Code and the investment guidance are to set an annual investment strategy, as part of its annual treasury strategy for the following year, covering the identification and approval of following:

- The strategy guidelines for choosing and placing investments, particularly non-specified investments.
- The principles to be used to determine the maximum periods for which funds can be committed.
- Specified investments that the Council will use. These are high security (i.e. high credit rating, although this is defined by the Council, and no guidelines are given), and high liquidity investments in sterling and with a maturity of no more than a year.
- Non-specified investments, clarifying the greater risk implications, identifying the general types of investment that may be used and a limit to the overall amount of various categories that can be held at any time.

The investment policy proposed for the Council is:

Strategy Guidelines – The main strategy guidelines are contained in the body of the treasury strategy statement.

Specified Investments – These investments are sterling investments of not more than one-year maturity, or those which could be for a longer period but where the Council has the right to be repaid within 12 months if it wishes. These are considered low risk assets where the possibility of loss of principal or investment income is small. These would include sterling investments which would not be defined as capital expenditure with:

1. The UK Government (such as the Debt Management Account deposit facility, UK Treasury Bills or a Gilt with less than one year to maturity).
2. Supranational bonds of less than one year's duration.
3. A local authority, parish council or community council.
4. Pooled investment vehicles (such as money market funds) that have been awarded a high credit rating by a credit rating agency. For category 4 this covers pooled investment

Responsible Section/Team	Financial Services	Page	28
Responsible Author	Head of Finance	Version	5
Date last amended	February 2012	Due for review	Feb 2013

Treasury Management Strategy Statement 2012/13

vehicles, such as money market funds, rated A by Standard and Poor's, Moody's or Fitch rating agencies.

5. A body that is considered of a high credit quality (such as a bank or building society For category 5 this covers bodies with a minimum short term rating of A(or the equivalent) as rated by Standard and Poor's, Moody's or Fitch rating agencies.

Within these bodies, and in accordance with the Code, the Council has set additional criteria to set the time and amount of monies which will be invested in these bodies. This criteria is 12 months and £5m.

Non-Specified Investments – Non-specified investments are any other type of investment (i.e. not defined as Specified above). The identification and rationale supporting the selection of these other investments and the maximum limits to be applied are set out below. Non specified investments would include any sterling investments with:

Non Specified Investment Category	
a.	<p>Supranational Bonds greater than 1 year to maturity</p> <p>(a) Multilateral development bank bonds - These are bonds defined as an international financial institution having as one of its objects economic development, either generally or in any region of the world (e.g. European Investment Bank etc.).</p> <p>(b) A financial institution that is guaranteed by the United Kingdom Government (e.g. The Guaranteed Export Finance Company {GEFCO})</p> <p>The security of interest and principal on maturity is on a par with the Government and so very secure. These bonds usually provide returns above equivalent gilt edged securities. However the value of the bond may rise or fall before maturity and losses may accrue if the bond is sold before maturity.</p>
b.	<p>Gilt edged securities with a maturity of greater than one year. These are Government bonds and so provide the highest security of interest and the repayment of principal on maturity. Similar to category (a) above, the value of the bond may rise or fall before maturity and losses may accrue if the bond is sold before maturity.</p>
c.	<p>The Council's own banker if it fails to meet the basic credit criteria. In this instance balances will be minimised as far as is possible.</p>
d.	<p>Building societies not meeting the basic security requirements under the specified investments. The operation of some building societies does not require a credit rating, although in every other respect the security of the society would match similarly sized societies with ratings. The Council may use such building societies which were originally considered Eligible Institutions and have a minimum asset size of £250m, but will restrict these type of investments to £2m</p>
e.	<p>Any bank or building society that has a minimum long term credit rating of A, for deposits with a maturity of greater than one year (including forward deals in excess of one year from inception to repayment).</p>

Treasury Management Strategy Statement 2012/13

Within categories c and d, and in accordance with the Code, the Council has developed additional criteria to set the overall amount of monies which will be invested in these bodies. This criteria is UK high street presence (if applicable) for all specified and non-specified investments. Non-specified investments are also limited to 30% of available funds for investment. The current custom and practice is however to restrict investments to high street banks only.

The Monitoring of Investment Counterparties - The credit rating of counterparties will be monitored regularly. The Council receives credit rating information (changes, rating watches and rating outlooks) from Sector as and when ratings change, and counterparties are checked promptly. On occasion ratings may be downgraded when an investment has already been made. The criteria used are such that a minor downgrading should not affect the full receipt of the principal and interest. Any counterparty failing to meet the criteria will be removed from the list immediately by the Head of Financial Services, and if required new counterparties which meet the criteria will be added to the list.

APPENDIX 5 Approved countries for investments

Based on lowest available rating

AAA

- Australia
- Canada
- Denmark
- Finland
- France
- Germany
- Luxembourg
- Netherlands
- Norway
- Singapore
- Sweden
- Switzerland
- U.K.

AA+

- Belgium
- Hong Kong
- U.S.A.

AA

- Kuwait
- UAE

AA-

- Japan
- Qatar
- Saudi Arabia

APPENDIX 6 Treasury management scheme of delegation

(i) Full Council

- receiving and reviewing reports on treasury management policies, practices and activities;
- approval of annual strategy.

(ii) Cabinet

- approval of/amendments to the organisation's adopted clauses, treasury management policy statement and treasury management practices;
- budget consideration and approval;
- approval of the division of responsibilities;
- receiving and reviewing regular monitoring reports and acting on recommendations;
- approving the selection of external service providers and agreeing terms of appointment.
- reviewing the treasury management policy and procedures and making recommendations to the responsible body.

APPENDIX 7 The treasury management role of the section 151 officer and other officers

The S151 (responsible) officer

- recommending clauses, treasury management policy/practices for approval, reviewing the same regularly, and monitoring compliance;
- submitting regular treasury management policy reports;
- submitting budgets and budget variations;
- receiving and reviewing management information reports;
- reviewing the performance of the treasury management function;
- ensuring the adequacy of treasury management resources and skills, and the effective division of responsibilities within the treasury management function;
- ensuring the adequacy of internal audit, and liaising with external audit;
- recommending the appointment of external service providers.

The Deputy S151 officer (being the Finance Manager)

In the absence of the S151 officer, the Deputy S151 officer will take over the responsibilities noted above.

The Exchequer Manager

- Transfer of Funds between the Councils approved call accounts.
- Transfer of funds to the Councils approved investors for a period no greater than 7 days.

APPENDIX 12 Glossary

Authorised Limit for External Debt

The Authorised Limit, like all other prudential indicators, has to be set and revised by elected members. It should not be set so high that it would never in any possible circumstances be breached but rather reflect a level of borrowing which while not desired, could be afforded but may not be sustainable

bp – basis points (in relation to, inter alia, bank base rates)

Capital Expenditure

Expenditure on the acquisition of a fixed asset or expenditure which adds to and not merely maintains the value of an existing fixed asset.

Capital Financing Requirement

This important component of an authority's capital strategy is the amount of capital spending that has not been financed by capital receipts, capital grants, and contributions from revenue. It is a measure of the underlying need to borrow for capital purposes.

CIPFA – Chartered Institute of Public Finance and Accountancy.

CPI – Consumer Price Index

Debt Rescheduling

Similar to re-mortgaging a house, in so far as, loans are repaid before maturity, and replaced with new loans, usually at a more advantageous rate of interest.

DCLG - Department of Communities and Local Government.

ECB – European Central Bank

GDP – Gross Domestic Product

IMF – International Monetary Fund

LIBOR – London Inter Bank Offer Rate

Liquidity

Access to cash deposits at very short notice.

Long term Investments

Investments with a duration of more than one year.

Market Loans

Loans borrowed from financial institutions such as banks and building societies.

Maturity

The date at which loans are due for repayment.

Net Borrowing Requirement

The Council's borrowings less cash and short term investments.

Treasury Management Strategy Statement 2012/13

Operational Boundary for External Debt

This indicator is, as its name suggest, the focus of day to day treasury management activity within the authority. It is a means by which the authority manages its external debt to ensure that it remains within the self imposed 'Authorised Limit'. However it differs from the 'Authorised Limit' in being based on expectations of the maximum external debt of the authority according to probable- not simply possible-events and being consistent with the maximum level of external debt projected by the estimates.

Prudential Borrowing

This is borrowing wholly supported by the Council and would include 'invest to save projects'. Market conditions permitting it may well be cheaper to borrow rather than lease vehicles and or plant.

Public Works Loan Board

A Government agency that provides longer term loans to local authorities.

Ratio of Financing costs to Net Revenue Stream

This is the proportion of interest payments plus debt repaid less interest receipts expressed as a proportion of the revenue stream. In the case of General Fund the revenue stream equates to the budget requirement of £11.9m (funded by Rate Support Grant, Business Rates and Council Tax).

Repurchase Rate (Repo)

This is equivalent to the Bank of England base rate.

Short-term investment

Investments with a duration of less than or equal to 365 days.

Supported Borrowing

This is borrowing that is supported by the government through the revenue support grant and housing subsidy grant.

Term Deposit

Investments for a pre-defined period of time at a fixed interest rate.

Upper Limit for fixed/variable interest rate exposure

This relates to the limit in loans which can be held in either fixed interest rates or variable interest rates. Whilst fixed interest-rate borrowing can contribute significantly to reducing the uncertainty surrounding future interest rate scenarios, the pursuit of optimum performance may justify, or even demand, retaining a degree of flexibility through the use of variable interest rates.

Volatility

Sudden upward or downward movements in interest rates in reaction to economic, market and political events.
