

Lives and Landscapes Assessment for Rossendale Borough Council

Volume 4: Appendix 9 Supporting information for Assessed sites

Penny Bennett *Landscape Architects*
with
Annette Birch Landscape Manager

July 2015

Appendix 9

The information given in the appraisal report for each landscape assessment is a summary of the landscape effects and the visual effects for each site, and gives the significance for each effect. Additional information which shows how the summary has been arrived at is given for each site below.

The information for each assessment also includes other receptors which have been considered but not included in the main assessment in order to keep the main assessment short and concise.

Other supporting information, relating to landscape character, local designations, historical context, footpaths and bridleways derived from Lancashire County Council's MARIO (Maps and Related Information Online) is also included.

The legends for the Landscape Character Areas map, Historical Landscape Character map and the Lancashire Ecological maps for grassland, woodland, and wetland and heath are shown opposite and below:

Lancashire Ecological Networks for grassland, woodland, wetland and heath
